

Los Materiales Y Sus Transformaciones

Real Academia de Ciencias Exactas, Físicas y Naturales de Madrid

Conocer Los Materiales Juan A. Lloréns Molina, 1996 Este libro tiene como objetivo proponer al profesorado de la E.S.O. ejemplos de actividades de las áreas de Ciencias de la Naturaleza y Tecnología.

Los medios de comunicación y sus transformaciones Leonor Cremayer Mejía, 2017 En esta obra lo que el lector encontrará es un recorrido detallado de cómo fue configurándose cada medio, sus precedentes, sus protagonistas, los entornos y los contextos. También se busca evidenciar que no hay inventores únicos y solitarios; todos los medios tienen un nombre que ha pasado a la historia por identificarse como el creador, pero siempre, antes de ellos, existieron otras personas, científicos de múltiples áreas y empresarios o visionarios que contribuyeron y sentaron las bases para la consolidación del invento

Aprender y enseñar ciencia Juan Ignacio Pozo Municio, Juan Ignacio Pozo, Miguel Ángel Gómez Crespo, 1998 En una sociedad en donde la ciencia está cada vez más presente en la vida cotidiana, parece necesario hacerla accesible a la mayor parte de los alumnos. No obstante, muchos datos revelan que éstos, en vez de asimilar las teorías y modelos científicos enseñados en clase, siguen interpretando el mundo según esquemas intuitivos o culturales ajenos a la ciencia. Por otra parte, cada vez hay más profesores de ciencias que comprueban, con frustración, que sus estudiantes apenas están interesados en ese saber científico y tienen también serias dificultades para utilizarlo en la resolución de problemas escolares o cotidianos. La respuesta a esta crisis de la educación científica debe basarse en su renovación profunda que, sin renunciar a sus propósitos y contenidos esenciales -hacer participar a los alumnos y futuros ciudadanos de las actitudes, las formas de pensamiento y los modelos y teorías propios de la ciencia como discurso social- se apoye en la psicología de los alumnos. Este libro, producto de la cooperación de un psicólogo con un profesor de química, propone un acercamiento entre la ciencia y la mente de los estudiantes, necesario para los profesores de ciencias, ya que suelen tener una formación específica en su materia pero un menor conocimiento de la psicología y de la didáctica que les ayude a beneficiarse de ese saber disciplinar. No se trata de proporcionar recetas ni soluciones preconcebidas, sino de ayudar a esos docentes a dar más sentido a su práctica y a superar las dificultades que conlleva, comprendiendo cómo aprenden ciencia sus alumnos y cómo, a través de su enseñanza, pueden ayudarles a asimilarla mejor.

Química 1 Ramírez, Víctor, 2022-12-30 Química 1 aborda de manera integral los contenidos señalados en el programa de

estudios del bachillerato general por competencias de la Universidad de Guadalajara. El libro está centrado en el aprendizaje con un enfoque en competencias y orientado hacia el constructivismo. La obra promueve el trabajo colaborativo y el desarrollo de habilidades, actitudes y valores. Se divide en tres unidades de competencia que tratan los siguientes contenidos: Química, materia y sus transformaciones; Lenguaje y proporciones en la química y Funciones inorgánicas. Algunas de las características que destacan son: proyecto de integración al inicio de cada unidad de competencia, actividades complementarias, actividades con TIC, actividades socioemocionales, actividades formativas, así como evaluaciones diagnóstica, formativa y sumativa.

Diseño de una propuesta didáctica y su contribución a la enseñanza y aprendizaje del tema Equilibrio Químico, para alumnos que ingresan en la Universidad. Adriana Leticia Rocha de Busto,

Química. Materiales didácticos. Bachillerato Ministerio de Educación,1995 Recoge reflexiones sobre el proceso de enseñanza y aprendizaje de esta materia, presentando una posible organización de los contenidos.
