LaQue's Handbook of Marine Corrosion David A. Shifler,2022-07-01 The new edition of LaQue's classic text on marine corrosion, providing fully updated control engineering practices and applications Extensively updated throughout, the second edition of La Que's Handbook of Marine Corrosion remains the standard single-source reference on the unique nature of seawater as a corrosive environment. Designed to help readers reduce operational and life cycle costs for materials in marine environments, this authoritative resource provides clear guidance on design, materials selection, and implementation of corrosion control engineering practices for materials in atmospheric, immersion, or wetted marine environments. Completely rewritten for the 21st century, this new edition reflects current environmental regulations, best practices, materials, and processes, with special emphasis placed on the engineering, behavior, and practical applications of materials. Divided into three parts, the book first explains the fundamentals of corrosion in marine environments, including atmospheric corrosion,

erosion, microbiological corrosion, fatigue, environmental cracking, and cathodic delamination. The second part discusses corrosion control methods and materials selection that can mitigate or eliminate corrosion in different marine environments. The third section provides the reader with specific applications of corrosion engineering to structures, systems, or components that exist in marine environments. This much-needed new edition: Presents a comprehensive and up-to-date account of the science and engineering aspects of marine corrosion Focuses on engineering aspects, descriptive behavior, and practical applications of materials usage in marine environments Addresses the various materials used in marine environments, including metals, polymers, alloys, coatings, and composites Incorporates current regulations, standards, and recommended practices of numerous organizations such as ASTM International, the US Navy, the American Bureau of Shipping, the International Organization for Standardization, and the International Maritime Organization Written in a clear and understandable style, La Que's Handbook of Marine Corrosion, Second Edition is an indispensable resource for engineers and materials scientists in disciplines spanning the naval, maritime, commercial, shipping industries, particularly corrosion engineers, ship designers, naval architects, marine engineers, oceanographers, and other professionals involved with products that operate in marine environments.

Ireland's Long Economic Boom Eoin O'Malley, 2024-03-30 This Open Access book examines the long economic boom experienced in Ireland between the late 1980s and 2007, analysing why this boom occurred. The book situates Ireland as a relative latecomer to economic development, with specific challenges and advantages inherent to this position. It discusses the risks involved in remaining reliant on foreign companies, exploring how in Ireland's case the rapidly growing economy required active, interventionist and imaginative policy measures rather than relying primarily on free market forces. The book also offers an estimation of the value of the net foreign earnings associated with different categories of exports after deducting the profit outflows and payments for imported inputs, revealing a number of findings about the importance of Irish indigenous companies and services during this time. It shows that Irish indigenous companies, assisted by industrial policy measures, played a significant part, as did the services sector, alongside the more visible and widely recognised role of foreign multinationals in high-tech manufacturing. Offering fresh insights and analyses more than 15 years after the long boom ended at the precipice of the global financial crisis, this book will be a useful resource for economic historians, scholars of political economy and macroeconomic policy, as well as those interested in modern Irish history more broadly.

Cognitive Information Processing: Career Theory, Research, and Practice V. Casey Dozier, Susan Epstein, Jeff W. Garis, Myrna Hoover, Justin D. Hultman, Tristen Hyatt, Emily L. Kennelly, Jaana Kettunen, Kirsten M. Kinsley, Stephen J.

Leierer,Jukka Lerkkanen,Julia Panke Makela,Laura Reid Marks,Sarah Pearson,Gary W. Peterson,Robert C. Reardon,Denise E. Saunders,Erica L. Stallings,Raimo Vuorinen,2023-11-30 This book's aim is to improve the integration of Cognitive Information Processing (CIP) theory, research, and practice, leading to more cost-effective career interventions that help persons to make informed and careful career decisions over a lifetime. The starting point for the book's content was the 2004 Sampson, Reardon, Peterson, and Lenz book, *Career Counseling and Services: A Cognitive Information Processing Approach*, which itself was a revision of the 1991 Peterson, Sampson, & Reardon book, *Career Development and Services: A Cognitive Approach*. We had four goals for this edition of our book. Our first goal was to update the theory, research, and practice of CIP theory from 2004 through the end of 2022. Our second goal was to expand the authors to better reflect the diverse community of practice that has emerged for CIP theory over the past eighteen years. Our third goal was to remove cost as a potential barrier to disseminating knowledge about CIP theory by making the book accessible as an open-access publication through the Florida State Open Publishing. Finally, our fourth goal was to disseminate the book via open-source software available in libraries which can be used to make periodic book content updates more feasible.

The Legacy of Ireland's Economic Expansion Peadar Kirby,Padraig Carmody,2013-10-18 Ireland underwent a dramatic economic and social transformation from the 1990s onwards, earning it the title the Celtic Tiger. Rapid economic growth was accompanied by substantial in-migration. However in the later 2000s Ireland is also experiencing a severe economic recession. This book examines the nature and geographies of the Celtic Tiger, focusing on the evolution of industries such as information and communication technology and pharmaceuticals. It also examines the changing nature of social ties in cities, trends amongst knowledge workers and the experiences of return migrants. It concludes with reflections on the nature of the Celtic Tiger phenomenon and how this will shape Ireland's geography and society into the future. This book was published as a special issue of *Irish Geography*.
