One Belt One Road Eyck Freymann, 2022-03-07 In 2013, Chinese leader Xi Jinping announced a campaign for national rejuvenation. The One Belt One Road initiative, or OBOR, has become the largest infrastructure program in history. Nearly every Chinese province, city, major business, bank, and university have been mobilized to serve it, spending hundreds of billions of dollars overseas building ports and railroads, laying fiber cables, and launching satellites. Using a trove of Chinese sources, author Eyck Freymann argues these infrastructure projects are a sideshow. OBOR is primarily a campaign to restore an ancient model in which foreign emissaries paid tribute to the Chinese emperor, offering gifts in exchange for political patronage. Xi sees himself as a sort of modern-day emperor, determined to restore China's past greatness. Many experts assume that Xi's nakedly neo-imperial scheme couldn't possibly work. Freymann shows how wrong they are. China isn't preying on victims, Freymann argues. It's attracting willing partners—including Western allies—from Latin America to Southeast Asia to the Persian Gulf. Even in countries where OBOR megaprojects fail, Freymann finds that political leaders still want closer ties with China. Freymann tells the monumental story of Xi's project on the global stage. Drawing on primary documents in five languages, interviews with senior officials, and on-the-ground case studies from Malaysia to Greece, Russia to Iran, Freymann pulls back the veil of propaganda about OBOR, giving readers a page-turning world tour of the burgeoning Chinese empire, a guide for understanding China's motives and tactics, and clear recommendations for how the West can compete.

The One Belt One Road (OBOR) Initiative and the Port of Piraeus Tatiana Gontika, 2021-08-05 This book provides the reader with a better understanding of the One Belt One Road (OBOR) initiative, its various projects around the world, and its consequences at a local as well as an international level. Background information on both Chinese and Greek sociopolitical history and their maritime industry is provided. The book also provides readers with the opinions of people directly involved with the Piraeus Port—China Ocean Shipping (Group) Company (COSCO) deal through interviews conducted and included in the book. OBOR, a signature initiative of Chinese President Xi Jinping, is currently one of the most frequently discussed enterprises worldwide. This controversial mix of worldwide projects has put both China and Xi at the center of attention, and not in a positive way. Of course, not all projects included in the initiative have been or are likely to be successful, but the initiative has far-ranging economic, cultural, and political potential. OBOR, in its essence, is an attempt by the Chinese

government to secure a paramount position in global finance for the country and ensure that primacy extends far into the future. In particular, it is an attempt to ensure that there are enough natural resources for China to support itself in the long term. Therefore, the areas selected for the implementation and development of OBOR are deliberately strategic. One of the countries that China has chosen to invest in is Greece, specifically the Port of Piraeus. The OBOR initiative has many similarities with the ancient Silk Road. Although the ancient route and modern concept are in no way identical, many similarities become evident when the two are compared. To understand China's motivation to build such a network, looking back at history is required. This project was long in the making. Various discussions took place both on an international and a domestic level until all parties came to an agreement. The deal at Piraeus between Greece and China affected more people than the politicians and the shipowners—it affected everyone involved in the operations of the port as well as the residents of the area. To further comprehend the impact on their lives, one must see things through their eyes, and there is no better way than contacting individuals and conversing with them. In conclusion, the specific deal at Piraeus and the OBOR initiative as a whole have the potential of benefiting the international and local communities. However, specific measures must be taken, and governments must collaborate in order for the deal in Piraeus and the OBOR initiative to have the most beneficial and the least negative impact.

Regional Infrastructure Systems Colin Turner, 2018-09-28 As the international economy globalises, there is a need for national infrastructure systems to adapt to form a global infrastructure system. This network of networks aids mobility between national systems as a means of supporting their territorial needs and preferences. This reflects a strategic approach to state infrastructuring as nations seek to utilise these physical systems to support and enhance their territoriality. Providing a thorough examination through the lens of economic infrastructure, the book addresses the forces of integration and fragmentation in global networks. This book explores the trend towards the development of regional infrastructure systems within the context of territorial strategy. Regional systems emerge out of states seeking to position themselves within the international system. Colin Turner identifies the diverse processes that are driving regional infrastructures, as well as examining the formal and informal patterns of integration that are shaping developments. This book is ideal for international political economy and regional development scholars who seek an advanced understanding of current regional infrastructure systems. It will also serve as a vital tool for practitioners who need to understand the implications for policy-making.

The Rise of China and the Chinese Overseas Leo Suryadinata, 2017-01-25 With the rise of China and massive new migrations, China has adjusted its policy towards the Chinese overseas in Southeast Asia and beyond. This book deals with Beijing's policy which has been a response to the external events involving the Chinese overseas as well as the internal needs of China. It appears that a rising China considers the Chinese overseas as a source of socio-political and economic capital and

would extend its protection to them whenever this is not in conflict with its core national interest. The impacts on and the responses of the relevant countries, especially those in Southeast Asia, are also examined

South Asia and China Adluri Subramanyam Raju, 2021-10-05 This book brings together new perspectives on China's engagement with South Asian countries. It examines emerging trends in the ties between China and South Asia in the geo-political, geo-strategic and geo-economics context and looks at opportunities for collaboration and connectivity between them. Drawing on extensive case studies, this volume discusses issues such as China's overarching Belt Road Initiative (BRI), regional responses and alternatives to BRI, the new politico-economic drivers in the region, India's China puzzle, the Wuhan informal summit, Nepal and its security dilemma in the region and China's role in peace and stability in Afghanistan. It presents analysis, debates and the way forward for a comprehensive South Asian regional understanding in the wake of the advancing Chinese presence in South Asia. An important contribution in the study of the developing pan China-South Asia vision, this book will be of interest to scholars and researchers of international relations, Chinese studies, Asian studies, defence and strategic studies, regional cooperation, foreign policy, geopolitics, comparative politics and political studies.

Handbook of Research on Recent Perspectives on Management, International Trade, and Logistics Aytekin, Güner Koç, Dođru, Çağlar, 2021-01-29 In this era of globalization, entrepreneurship and its implications on international trade and supply chain management are becoming more critical. In today's change-oriented and complex business environment, both entrepreneurs and managers need to keep up with the latest developments around them. With the help of globalization, it is getting more attractive for entrepreneurs to generate innovative ideas to run business both nationally and internationally. Competitive advantages and the key for sustainable growth for globally founded institutions lies behind effective supply chain management originating from a single idea about establishing a company and the process to the end goal of reaching consumers. This focus on entrepreneurship, business, and supply chain comes at a time when rapid technological advances are continually being made. The Handbook of Research on Recent Perspectives on Management, International Trade, and Logistics reveals the latest data based on research on the issues of entrepreneurship, innovation, contemporary management techniques, and global supply chain management. Chapters include topics such as the effective management of the supply chain, supply chain modeling, e-business solutions, digitalizing the supply chain process, e-business applications, and more. This book is ideal for managers, executives, supply chain specialists, entrepreneurs, business professionals, researchers, academicians, and students interested in the latest findings in international trade, management, logistics, and business.

Annual Report Lynchburg (Va.), 1901

Sustainable Economic Development Vasilii Erokhin, Tianming Gao, Andrei Jean Vasile, 2020-12-15 This book is a pivotal publication that addresses the contemporary challenges of globalization and elaborate policy responses to environmental

pollution, climate change, economic disruptions, poverty, hunger, and other threats to sustainable economic development. Many parts of the world, territories, and societies are now changing at an unprecedented pace in ways that fundamentally affect the markets, people, the environment, and biodiversity. Such changes are primarily driven by rapid social and economic developments, economic disparities between countries, the internationalization of production and value chains, and industrialization. Increasingly frequently, business interests are interfering with sustainable development goals. The issue is how to converge the economic benefits with the urgent need for establishing resilient production chains, social networks, sustainably-operating markets, and environmental protection. This publication highlights the need for the balanced economic development and comprehensive coverage of many sustainability-business areas. Economic, production, financial, and social factors of sustainability are discussed by over 90 contributors representing 40 universities and research institutions from seven countries. Their findings are translated into workable approaches and policies for the benefit of the global economy, people, and the environment.
