**Vegetation of the Tropical Pacific Islands** Dieter Mueller-Dombois, F.R. Fosberg, 2013-11-26 Written by the leading authorities on the plant diversity and ecology of the Pacific islands, this book is a magisterial synthesis of the vegetation and landscapes of the islands of the Pacific Ocean. It is organized by island group, and includes information on geography, geology, phytogeographic relationships, and human influences on vegetation. *Vegetation of the Tropical Pacific Islands* features over 400 color photographs, plus dozens of maps and climate diagrams. The authors' efforts in assembling the existing information into an integrated, comprehensive book will be welcomed by biogeographers, plant ecologists, conservation biologists, and all scientists with an interest in island biology.

*Pacific Ways* Stephen Levine, 2016-06-01 Examining the politics of each Pacific Island state and territory, this well-researched volume discusses historical background and colonial experience, constitutional framework, political institutions, political parties, elections and electoral systems, and problems and prospects. Pacific Island countries and territories included are the original seven member states—New Zealand, Australia, Fiji, Samoa, Tonga, Nauru, and the Cook Islands—along with all the new member states and organizations. A wide-ranging political survey, this comprehensive and completely up to date reference will appeal to Pacific peoples and anyone with an interest in politics.

Handbook of Public Administration Reform Shaun F. Goldfinch, 2023-11-03 Reform is a politicized, ideological, sometimes drifting, and chaotic process. As such, what public administration reform means, why it occurs, whose interests it serves, and whether it makes the world a better place, remain contested. Addressing these questions, this major comparative study sheds new light on existing and emerging issues in the field of public administration reform.

**Sixteenth International Seaweed Symposium** Joanna M. Kain, M. Lahaye, M. T. Brown, 1999 International Seaweed Symposia have been held at three-year intervals for nearly 50 years. In the early days they formed the only international forum for marine phycologists, and although there are now frequent phycological meetings their value has not diminished, both because of the increased commercial importance of seaweeds, and because of the unique mix of disciplines that the meetings attract. Industrialists interact with chemists and biologists with the common aim of understanding seaweeds. The main development during the last few decades has been an increase in the cultivation of algae, as natural stocks of the useful species become depleted. Of the first ten Symposia, nine were held in western countries where seaweed cultivation is almost non-existent. It is appropriate that the last two have been held where algal exploitation is relatively big business.
