The Gentianaceae - Volume 1: Characterization and Ecology Jan J. Rybczyński,Michael R. Davey,Anna Mikula,2014-05-09 This is the first of two volumes on Gentianaceae. Comprising twelve chapters, it centres upon the characterization and ecology of Gentianaceae worldwide, with emphasis on the application of molecular and cytological approaches in relation to taxonomy. The first three chapters consider the classification of the family and review the advances in research since the earlier revision published in 2002, which resulted in the reclassification of some plants and the naming of new genera. The next chapter provides the most comprehensive report to date of the systematics of South American Neotropical woody Gentians. Other reviews include details of the Gentianaceae in Eastern Europe. The key biochemical steps that result in the diversity of Gentian flower colors, the cytology of European species and an historical account of the importance of Gentians in herbal medicines are also covered. Furthermore, an analysis of gene expression in overwintering buds is presented, discussing several aspects of plant taxonomy, phenotypic characteristics, phylogeography and pedigree. Two contributions highlight the importance of Gentians in India, and the last chapter presents evidence for the importance of Glomeromycota in developing arbuscular mycorrhizal associations with the roots of Gentians. This volume provides the basis for the biotechnological approaches that are considered in the companion book *The Gentianaceae - Volume 2: Biotechnology and Applications*.

The Adventure Guide to the Dominican Republic Harry S. Pariser,1994-10-01

The Coffee Planters of San Ignacio, Northern Peru Pascal Olivier Girot,1984

Birds New to Science David Brewer,2018-01-26 The story of the discovery of nearly 300 bird species new to science since 1960. Amazing as it might sound, ornithologists are still discovering several bird species each year that are completely new to science. These aren't all obscure brown birds on tiny islands - witness the bizarre Bare-faced Bulbul from Laos (2009), spectacular Araripe Manakin from Brazil (1998), or gaudy Bugun Liocichla from north-east India (2006). *Birds New to Science* documents more than half a century of these remarkable discoveries, covering around 300 species. Each account

includes the story of discovery, a brief description of the bird (many with accompanying colour photographs), and details of what is known about its biology, range and conservation status. Written in an engaging style, this is a rich reference to an incredible era of adventure in ornithology.

The Billboard Guide to Tejano and Regional Mexican Music Ramiro Burr,1999 In the 1990s Tejano basked in the media spotlight as one of the fastest-growing subgenres in American music. This sourcebook recounts the fascinating, never-before-told history of this innovative and influential musical genre - as well as of norteno, conjunto, grupo, mariachi, trio, tropical/cumbia, vallenato, and banda. Organized in an easy-to-use A-Z format, The Billboard Guide to Tejano and Regional Mexican Music features succinct but revealing biographies as well as discographies of 300 of these genres' most innovative and successful artists.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Key Areas for Threatened Birds in the Neotropics David C. Wege,Adrian J. Long,1995-10-17 Approximately 3,600 bird species occur in the 21 countries of mainland Central and South America, of which 290 are listed as threatened. Taking a country-by-country, site-based approach, this book documents the 596 most important areas for the conservation of these threatened birds. Introductory chapters define Key Areas and the distribution of threatened species, describe habitats, threats and conservation, and identify the gaps in our knowledge of Neotropical birds.
