Margarete Louise Myers

Hitler's Twilight of the Gods Alexandra Birch, 2025-02-28 Music was an integral part of statecraft and identity formation in the Third Reich. Structured thematically and semiotically around the Wagnerian tetralogy of the Ring cycle, Hitler's Twilight of the Gods provides a sonic read of the Second World War and the Holocaust. Alexandra Birch sheds light on the specific type of music promoted under Nazism, linked to larger Teutonic mythologies and histories espoused in rhetoric and personal styling. The book explores the musical fixation of the command as it was extended to the ordinary troops of the Wehrmacht and SS in instances of musical sadism and destruction during the Holocaust. It reveals how, in constructing what was "German," this process also intentionally fashioned a subaltern other with an assigned set of music and aesthetics. The book draws on analysis of testimony and perpetrator documents to reveal the execution of this binary identity and the inclusion of music even in extreme genocidal conditions. From drinking games in the interwar period, to musical sadism in the Holocaust, to the final delusions of the command in collapse, Hitler's Twilight of the Gods illuminates how music was a component of camaraderie, identity, masculinity, and warfare.

State Symbols Margarete Myers Feinstein, 2021-10-25 After World War II Germans not only had to rebuild, they had to redefine their national political identity as well. This book traces how state symbols such as national colors, anthems, holidays, capital cities, and postage stamps were used to legitimize the two Germanies from 1949 to 1959. Although the Federal Republic of Germany and the German Democratic Republic (GDR) developed distinct post-war identities, the one cannot be understood apart from the other, for they were in direct competition to define the same state symbols. The study of symbols offers valuable insights into the realms of identity formation and of politics, that is, how symbols can promote political integration. By examining the creation of state symbols and the processes by which they were established in the public realm, Feinstein evaluates the extent to which German political culture overcame the Nazi past to legitimize both a republican and a socialist system. This book is especially relevant to scholars who want to understand the common ground upon which the citizens of today's unified Germany can construct a shared identity.

International Folklore Review, 1995

Music and German National Identity Celia Applegate, Pamela Potter, 2002-08 Concert halls all over the world feature mostly the works of German and Austrian composers as their standard repertoire: composers like the three Bs of classical

music, Bach, Beethoven, and Brahms, all of whom are German. Over the past three centuries, many supporters of German music have even nurtured the notion that the German-speaking world possesses a peculiar strength in the cultivation of music. This book brings together seventeen contributors from the fields of musicology, ethnomusicology, history, and German literature to explore these questions: how music came to be associated with German identity, when and how Germans came to be regarded as the people of music, and how music came to be designated the most German of arts. Unlike previous volumes on this topic, many of which focused primarily on Wagner and Nazism, the essays here are wide-ranging and comprehensive, examining philosophy, literature, politics, and social currents as well as the creation and performance of folk music, art music, church music, jazz, rock, and pop. The result is a striking volume, adeptly addressing the complexity and variety of ways in which music insinuated itself into the German national imagination and how it has continued to play a central role in the shaping of a German identity. Contributors to this volume: Celia Applegate Doris L. Bergen Philip Bohlman Joy Haslam Calico Bruce Campbell John Daverio Thomas S. Grey Jost Hermand Michael H. Kater Gesa Kordes Edward Larkey Bruno Nettl Uta G. Poiger Pamela Potter Albrecht Riethmüller Bernd Sponheuer Hans Rudolf Vaget

Fighting Songs and Warring Words Brian Murdoch, 2002-01-08 The accepted canon of war poetry usually includes only those underlining patriotic or nationalistic views. This study opens up the view of war poetry with the inclusion of such material as Nazi poetry and song, and the poetry of the atomic bomb.

The Chosen People, 1923

Storming to Power Time-Life Books, 1989 Chronicles the rise and eventual fall of Nazi Germany.

The Rhetoric of the National Socialist Speakers Haig A. Bosmajian, 1960

Fascists of the World, Unite? Martin Kristoffer Hamre, 2025-08-04 This book analyzes the ideas and forms of international cooperation between Fascist Italy, Nazi Germany, and fascist movements from Denmark, Norway, Sweden, Switzerland, Ireland, and Britain. The study examines how fascists attempted to unite across borders by forming international organizations and networks, hosting conferences and exhibitions, disseminating multilingual publications, and exchanging propaganda. Their transnational cooperation was fuelled by shared ideas of ultranationalism, anti-liberalism, anti-communism, antisemitism, racism, white supremacism, and Europeanism. The book argues that fascist internationalism, marked by contradictions, limitations, and an Italo-German rivalry, emerged in the 1930s as a counter-reaction to liberal and communist internationalism. The epilogue discusses reverberations in the Second World War and the postwar period and outlines the relevance of this history for understanding contemporary forms of far-right internationalism.

Propaganda and Mass Persuasion Nicholas J. Cull, David H. Culbert, David Welch, 2003-07-15 A truly international, authoritative A-Z guide to five centuries of propaganda, in both wartime and peacetime, which covers key moments, techniques, concepts, and some of the most influential propagandists in history. This fascinating survey provides a

comprehensive introduction to propaganda, its changing nature, its practitioners, and its impact on the past five centuries of world history. Written by leading experts, it covers the masters of the art from Joseph Goebbels to Mohandas Gandhi and examines enormously influential works of persuasion such as Uncle Tom's Cabin, techniques such as films and posters, and key concepts like black propaganda and brainwashing. Case studies reveal the role of mass persuasion during the Reformation, and wars throughout history. Regional studies cover propaganda superpowers, such as Russia, China, and the United States, as well as little-known propaganda campaigns in Southeast Asia, Ireland, and Scandinavia. The book traces the evolution of propaganda from the era of printed handbills to computer fakery, and profiles such brilliant practitioners of the art as Third Reich film director Leni Riefenstahl and 19th-century cartoonist Thomas Nast, whose works helped to bring the notorious Boss Tweed to justice.
