Lost Crops of the Incas National Research Council,Policy and Global Affairs,Board on Science and Technology for International Development,Ad Hoc Panel of the Advisory Committee on Technology Innovation,1989-02-01 This fascinating, readable volume is filled with enticing, detailed information about more than 30 different Incan crops that promise to follow the potato's lead and become important contributors to the world's food supply. Some of these overlooked foods offer special advantages for developing nations, such as high nutritional quality and excellent yields. Many are adaptable to areas of the United States. Lost Crops of the Incas includes vivid color photographs of many of the crops and describes the authors' experiences in growing, tasting, and preparing them in different ways. This book is for the gourmet and gourmand alike, as well as gardeners, botanists, farmers, and agricultural specialists in developing countries.

Sustainability of the Food System Noelia Betoret,Ester Betoret,2020-01-31 Sustainability of the Food System:

Sovereignty, Waste, and Nutrients Bioavailability addresses the concept of global sustainability, focusing on three key areas of action within the food production system: food sovereignty, environmentally friendly food processes, and food technologies that increase the bioavailability of bioactive compounds. The book defines key concepts in the food production system and provides examples of specific and tailored actions that contribute to global sustainability. Sustainability of the Food System: Sovereignty, Waste, and Nutrients Bioavailability will serve as a welcomed resource for food scientists and technologists, agriculturists, agronomic engineers, food engineers, environmental technologists, nutritionists, and post-graduate students studying bioresource technology and sustainability. - Addresses global sustainability as a three-dimensional concept - Describes the use and recovery of crops with high content in bioactive compounds as a preliminary and necessary step to achieve food sovereignty - Presents advances in the development of environmentally friendly food processes that reduce and

revalue food waste and byproducts - Considers the development of functional foods with innovative food technologies that increase the bioavailability of nutrients and bioactive compounds to achieve social and economic sustainability
