Elihu Grant

Pyramids of the Giza Plateau Charles Rigano, 2014-12-19 The most remarkable piece of ground in the World W. M. Flinders Petrie 1883 The Pyramid Complexes of Khufu, Khafre, and Menkaure have stood on the Giza Plateau for 4,600 years. They have been scientifically studied for the last 300 years; yet this is the first book that brings together all three into one volume. Here is a complete detailed look at the Giza pyramids and their complexes the Sphinx, subsidiary pyramids, temples, boat pits, and enclosures. The descriptions are supplemented by almost 300 photos and drawings to provide the reader a detail look which can only be surpassed by being there in person with a very knowledgeable guide. In addition Charles Rigano provides new ideas on: How Khufu was interred in his Great Pyramid. How the first robbers gained entry and robbed Khufus pyramid. How Caliph Al Mamun in 820AD really penetrated the Great Pyramid. Why Heterpheres tomb is at Giza. Why there is a field of stone bases near Khafres Pyramid. The initial smaller plan for Khafres Pyramid. Conclusive evidence that ties the Sphinx to Khafre. How Menkaures Burial Chamber and Inclined Passage were built.

The Secret Chambers of the Pyramids Johannis Sinnig, 2025-11-07 The Secret Chambers of the Pyramids: It was assumed that the Egyptian pyramids of the Old Kingdom had been robbed and emptied. The author of this book proves that the burial chambers of three great pyramids have not yet been discovered. New theories, photos and drawings lead to the location of the still hidden chambers with their treasures and pharaohs. A fascinating book about the secrets of the pyramids.

Pyramids of the Giza Plateau Charles Rigano, 2014 The most remarkable piece of ground in the World as Flinders Petrie described the Giza Plateau. Here the Pyramid Complexes of Khufu, Khafre, and Menkaure have stood for 4,600 years. The Giza pyramids have been scientifically studied for the last 300 years; now for the first time all three are brought together in one book. Virtually all contemporary pyramid books address only Khufu's Great Pyramid. This book provides a complete detailed look at all three Giza pyramids and their complexes: the Sphinx, subsidiary pyramids, temples, boat pits, and enclosures. The descriptions are supplemented by almost 300 photos and drawings to provide the reader a detail look which can only be surpassed by being there in person with a very knowledgeable guide. But it is not just descriptions as the complexes are today, but how the early explorers entered the pyramids and what they found. In addition Charles Rigano provides new ideas on: * How Khufu was interred in his Great Pyramid. * How the first robbers gained entry and robbed Khufu's pyramid. * How Caliph Al Mamun in 820AD really penetrated the Great Pyramid. * Why Heterpheres tomb is at Giza.

* Why there is a field of stone bases near Khafre's Pyramid. * The initial smaller plan for Khafre's Pyramid. * Conclusive evidence that ties the Sphinx to Khafre. * How Menkaure's Burial Chamber and Inclined Passage were built. In this book Charles Rigano combines both his on-site examinations and study of more than 200 references from the early explorers to the recent Egyptologists to form a complete picture of the Pyramid Complexes. This material is available nowhere else in a single volume.

Discoveries: The Great Pyramids Jean-Pierre Corteggiani, 2007-11 The newest installment of Abrams' Discoveries series brings the reader to the last of the Seven Wonders of the World, the Pyramids of Giza, which remain among the world's most mysterious architectural and archaeological achievements. The Great Pyramid and the two smaller pyramids that make up the Giza Necropolis, commissioned by the pharaoh Khufu, or Cheops, around 2560 BC, have fascinated scientists and historians from Antiquity to the present. Beginning with Herodotus's fifth-century B.C. observations of these massive monuments, author Jean-Pierre Corteggiani leads the reader through historical theories, sketches, and excavations of the Pyramids, including the 2004 investigation by amateur Egyptologists Gilles Dormion and Jean-Yves Verd'hurt into a previously undiscovered room of the Great Pyramid. In addition to the central conundrum—the question of how the pyramids were built—Corteggiani examines the attraction of the site throughout the ages; many explorers, conquerors, soldiers, and pilgrims made their way to the Pyramids, often leaving their marks in graffiti on the stones. Perhaps the most famous emblems of Ancient Egypt, to this day the Pyramids of Giza continue to confound and seduce visitors and scientists alike.

Stones and Quarries in Ancient Egypt Rosemarie Klemm, Dietrich D. Klemm, 2008 An important study not only of the geological structure of Egypt and the mineral composition of its rocks, but also of ancient Egyptian stone quarries. Illustrated with almost 500 photographs and diagrams, microscopic sections and electronic scans, as well as colour photographs of all the types of stone discussed, the detailed descriptions of the quarries and numerous examples of quarrying and masonry techniques make this book an indispensable tool for the provenancing of museum exhibits. Originally published in German in

1993, this edition has been updated to take account of new research, and a new chapter on the building stones of the western oases has been added. Archaeologists, Egyptologists and travellers to Egypt will find a wealth of fascinating information on ancient quarry sites, working methods and transport in ancient Egypt, as well as an introduction to the geology of the Nile valley and the surrounding desert regions.
