Jacques Lacan

Reading Seminar XI Richard Feldstein, Bruce Fink, Maire Jaanus, 1994-12-23 This book provides the first truly sustained commentary to appear in either French or English on Lacan's most important seminar, The Four Fundamental Concepts of Psychoanalysis. The 16 contributors unpack Lacan's notoriously difficult work in simple terms, and supply elegant illustrations from a variety of fields: psychoanalytic treatment, film, literature, art, and so on. Each of Lacan's fundamental concepts--the unconscious, transference, drive, and repetition--is discussed in detail, and related to other important notions such as object a cause of desire, the gaze, the Name-of-the-Father, the subject, and the Other. This volume also includes a translation of Lacan's companion piece to Seminar XI, Position of the Unconscious (an article from the French edition of the *Ecrits* that has never before appeared in English), by one of the foremost translators of Lacan's work, Bruce Fink. As an indication of the importance of this article, Lacan considered it to be the sequel to his *Function and Field of Speech and Language in Psychoanalysis*, arguably his most important paper in the 1950s. The contributors include many of the best minds in the Lacanian psychoanalytic world in Paris today. Chapters include *Excommunication: Context and Concepts* by Jacques-Alain Miller, *The Subject and the Other I and II* by Colette Soler, *Alienation and Separation I and II* by Eric Laurent, *Science and Psychoanalysis* by Bruce Fink, *The Name-of-the-Father* by Francois Regnault, *Transference as Deception* by Pierre-Gilles Gueguen, *The Drive I and II* by Marie-Hele`ne Brousse, *The Demontage of the Drive* by Maire Jaanus, *The Gaze as an Object* by Antonio Quinet, *The Phallic Gaze of Wonderland* by Richard Feldstein, *The 'Evil Eye' of Painting: Jacques Lacan and Witold Gombrowicz on the Gaze* by Hanjo Berressem, *Art and the Position of the Analyst* by Robert Samuels, *The Relation between Voice and the Gaze* by Ellie Ragland, *The Lamella of David Lynch* by Slavoj Zizek, *The Real Cause of Repetition* by Bruce Fink, *Introductory Talk at Sainte-Anne Hospital* by Jacques-Alain Miller, and *The End of Analysis I and II* by Anne Dunand.

Anxiety and the Contradictions of Culture Stephen Felder, 2024-09-20 Anxiety and the Contradictions of Culture explores anxiety from the perspective of Lacan's claim that anxiety is a "signal of the Real." Showing how our relationship with anxiety is intertwined with our fantasies, Felder unpacks how anxiety is related to the gaze, sex, race, and our capacity for social change.

Beyond Gender Paul Verhaeghe, 2013-03-26 In this volume, Paul Verhaeghe's lectures on the development of psychoanalytic theory between Freud and Lacan are reproduced as a written work of astonishing versatility, which stands at the vanguard of Lacanian studies. *Beyond Gender* examines Freud's discovery of the unconscious, and Lacan's elaboration of this discovery as a gap in the subject between what (s)he knows and the real driving forces in the psyche. The implications of this gap are manifold, and their impact on areas of study and practice from gender theory to obsessional neurosis, trauma, hysteria, and dream interpretation are profound. It is Verhaeghe's contention that, far from being the bedrock of gender differentiation, castration masks another anxiety over another, original lack that is beyond gender. This book elaborates the relationship between body and psyche beyond the classic binary opposition. *Beyond Gender* postulates that the sexual relationship must be re-examined, as does the troublesome notion of gender identity.

God Is Undead Lorenzo Chiesa, Adrian Johnston, 2025-02-20 The undead are neither alive nor dead. They are animate yet non-living. In *God Is Undead*, Lorenzo Chiesa and Adrian Johnston contend that true unbelief today sees the divine precisely as exemplifying such undeath. In *God Is Undead*, Chiesa and Johnston delve into and deepen the insights of both Freudian and Lacanian psychoanalysis as regards unbelief. This analytic perspective reveals that modern atheisms appealing to a scientific worldview as an antidote to orthodox religious faith end up as heterodox theisms of Nature, Reason, Knowledge, or even the Market itself. They ironically place new gods of their own atop the graves of the traditional gods of old. They likewise forget the religious influences underlying modern science. One of the most important and novel contributions of *God Is Undead* is its gesture of dignifying unbelief as something that is able to contain multitudes. Far from a unified, homogeneous, and flatly bleak position, irreligiosity can come in many forms whose convergences and divergences contain possibilities for creatively thinking and living differently. This book shows such variegated non-belief in action. We have two unbelievers vigorously disagreeing with each other about fundamental ontological matters, thereby bringing to light critical questions going to the very heart of any unbelief whatsoever: Can an atheism, as thoroughly atheistic, ever believe in or be certain of itself? What is the role of agnosticism, and specifically of an agnosticism strengthening (rather than contrasting with) atheism, in all this? How might different unbelievers become what Freud calls "comrades in unbelief" without erecting new gods in the process?

Force, Drive, Desire Rudolf Bernet, 2020-02-15 In *Force, Drive, Desire*, Rudolf Bernet develops a philosophical foundation of psychoanalysis focusing on human drives. Rather than simply drawing up a list of Freud's borrowings from Schopenhauer and Nietzsche, or Lacan's from Hegel and Sartre, Bernet orchestrates a dialogue between philosophy and psychoanalysis that goes far beyond what these eminent psychoanalysts knew about philosophy. By relating the writings of Freud, Lacan, and other psychoanalysts to those of Aristotle, Leibniz, Schopenhauer, Nietzsche, Husserl, Heidegger, and, more tacitly, Bergson and Deleuze, Bernet brings to light how psychoanalysis both prolongs and breaks with the history of Western metaphysics and philosophy of nature. Rereading the long history of metaphysics (or at least a few of its key moments) in light of psychoanalytic inquiries into the nature and function of drive and desire also allows for a rewriting of the history of philosophy. Specifically, it allows Bernet to bring to light a different history of metaphysics, one centered less on Aristotelian substance (ousia) and more on the concept of *dunamis*—a power or potentiality for a realization toward which it strives with all its might. Relating human drives to metaphysical forces also bears fruit for a renewed philosophy of life and subjectivity.

Reading Seminar XX Suzanne Barnard, Bruce Fink, 2012-02-01 This collection offers the first sustained, in-depth commentary on Seminar XX, *Encore*, considered the cornerstone of Lacan's work on the themes of sexual difference, knowledge, *jouissance*, and love. Although Seminar XX was originally popularized as Lacan's treatise on feminine sexuality, these essays, by some of today's foremost Lacanian scholars, go beyond feminine sexuality to address Lacan's significant intertwining concern with the rupture between reality and the real produced by modern science, and the implications of this rupture for subjectivity, knowledge, *jouissance*, and the body. The essays clarify basic concepts, but for readers already familiar with Lacan they also offer sophisticated workings-through of the more challenging and obscure arguments in *Encore*—both by tracing their historical development across Lacan's *œuvre* and by demonstrating their relation to particular philosophical, theological, mathematical, and scientific concepts. They cover much of the terrain necessary for understanding sexual difference—not in terms of chromosomes, body parts, choice of sexual partner, or varieties of sexual practice—but in terms of one's position vis-à-vis the Other and the kind of *jouissance* one is able to obtain. In so doing, they make significant interventions in the debates regarding sex, gender, and sexuality in feminist theory, philosophy, queer theory, and cultural studies.

A Compendium of Lacanian Terms Huguette Glowinski, Zita M. Marks, Sara Murphy, 2001 Jacques Lacan (1901-81) was one of the most original and controversial thinkers of the post-war period. His ideas had a profound effect on the intellectual movements of his time and his work is of continuing importance to a wide range of disciplines: psychoanalytic theory and practice, literary criticism, critical social theory, linguistics, cinema, art criticism and political science. Lacan's ideas can, however, be notoriously difficult: convoluted, idiosyncratic, arcane, and almost always obscure! *A Compendium of Lacanian*

Terms provides students of Lacan with a clear and helpful exposition on some 40 key terms. Each entry outlines the conceptualization of the idea, locating it within Lacanian discourse, and the evolution of the term within the development of Lacan's ideas. A list of references is provided at the end of each entry. The editors' brief essay-like descriptions of key Lacanian terms are a superb idea, much needed in both academic and clinical arenas of psychoanalytic world. - Choice - Jan 2002

Masculinity, Psychoanalysis, Straight Queer Theory Calvin Thomas, 2008-04-15 Using Lacanian psychoanalysis and queer theory to explore the unstable relationship between heterosexual masculine identity and cultural representation, this book examines the ways straight men are queered and abjected in literature, theory, and film.

Lacan's Four Fundamental Concepts of Psychoanalysis Roberto Harari, 2004-10-15 The informal tone of these ten lectures by Roberto Harari reflects their original character as classes held at El Centro de Extension Psicoanalitica del Centro Cultural General, San Martin Buenos Aires. Destined for a wider audience than just the psychoanalytical camp, Harari's work presents the Lacanian endeavor without presupposition of specialized knowledge—and yet without conceding intellectual subtlety. Harari provides an introductory display of essential themes developed in Lacan's Four Fundamental Concepts of Psychoanalysis, and offers his own insightful reading of the text's central ideas. These ten classes, sparked by the crucial Seminar XI within the teaching of Lacan, reframe a wide range of questions in psychoanalysis for the professional in the field, scholars and students across disciplines, and interested lay readers. Harari is so at ease with Lacan's oeuvre that he can dismantle and rebuild its structure so that order and logic suddenly appear inherent to Lacan's way of thinking. The unconscious, transference, repetition, and the drive are here reintroduced, not only to do justice to Freud's insights, but also to link these concepts to the larger question of the complex relationships between psychoanalysis, religion, and science. Harari's didactic approach and his analytic style come together to bring us one step closer to understanding Lacan and one step closer to understanding ourselves.

Lacan on the Road Dan Collins, 2026-02-25 Lacan on the Road explores a large number of talks, lectures, and interviews that Jacques Lacan gave away from his famous seminar in Paris. As well as providing an opportunity to examine some lesser-known works of Lacan, the book specifically seeks to explore how Lacan's rhetoric and style changed for various audiences. Sometimes, Lacan used talks away from his seminar to summarize current developments from his teaching and state them more succinctly and aphoristically. At other times, he used the opportunity of talking to an unfamiliar audience to announce completely new ideas. Readers familiar with the seminars will know that Lacan often came back invigorated from trips abroad or even from locales closer to home, such as Belgium and Italy. This book provides the opportunity to examine what

he said on those occasions when he was away. What emerges here, then, is rich and rewarding supplemental body of Lacan's work.

Trauma, Postmodernism and the Aftermath of World War II Paul Crosthwaite,2009-01-29 The radical, 'postmodernist' waves of experimentation that swept Anglo-American fiction from the late 1960s constitute a delayed response to the upheavals of the Second World War, yet the legacy of the war barely figures in prevalent accounts of the postmodernist movement. As Paul Crosthwaite shows in this provocative book, to recognize the significance of the war in contemporary culture is to acknowledge that postmodernism, as a sensibility, aesthetic style, and mode of thought, must be entirely reconceived. Challenging dominant theorizations of the postmodern as depthless and dehistoricized, Crosthwaite demonstrates that postmodernism has not abandoned history but has rather reformulated it in terms of trauma, trauma that is traceable, time and again, to the catastrophes of the 1940s. The book stages a revealing confrontation between influential theories of trauma and postmodernism and offers innovative close readings of key texts by Virginia Woolf, Thomas Pynchon, Michael Moorcock, J.G. Ballard, Richard Powers and Ian McEwan.
