Medios informáticos en la educación a principios del siglo XXI Diego Levis, Roxana Cabello, 2007

Curriculum, Culture, and Art Education Kerry Freedman, Fernando Hernández-Hernández, 2024-09-01 Through international case studies, this book explores the causes and effects of historical and contemporary cultural changes in art education. A general broadening of content and methods, a renewed emphasis on student interests, and diverse critical perspectives can currently be seen internationally in art curricula. This book explores ways that visual culture in education is helping to move art curricula off their historical foundations and open the field to new ways of teaching, learning, and prefiguring worlds. It highlights critical histories and contemporary stories, showing how cultural milieu influences and is influenced by the various practices that make up the professional field inside and outside of institutional borders. This book shows students how contemporary art educators are responding, revising, and re-creating the field.

Play and STEM Education in the Early Years Sue Dale Tunnicliffe, Teresa J. Kennedy, 2022-06-16 This edited book provides an overview of unstructured and structured play scenarios crucial to developing young children's awareness, interest, and ability to learn Science, Technology, Engineering and Mathematics (STEM) in informal and formal education environments. The key elements for developing future STEM capital, enabling children to use their intuitive critical thinking and problem-solving abilities, and promoting active citizenship and a scientifically literate workforce, begins in the early years as children learn through play, employing trial and error, and often investigating on their own. Forty-seven STEM experts come together from 16 countries (Argentina, Australia, Belgium, Canada, England, Finland, Germany, Israel, Jamaica, Japan, Malta, Mauritius, Mexico, Russia, Sweden, and the USA) and describe educational policies and experiences related to young learners 3-4 years of age, as well as students attending formal-nursery school, early primary school, and the

early years classes post 5 years of age. The book is intended for parents seeking to provide STEM activities for their children at home and in playgroups, citizen scientists seeking guidance to provide children with quality educational activities, daycare practitioners providing educational structures for young children from birth to formal education, primary school teachers and preservice teachers seeking to teach preschool, kindergarten or children typically aged 5-8 years old in grades 1-3, as well as researchers and policy makers working in science didactics with small children.

The Entrepreneurial Research University in Latin America Pedro Pineda, 2016-04-08 The Entrepreneurial Research University in Latin America examines the fascinating clashes between the Latin American tradition and the influence of new globalized forms of organization represented by entrepreneurial university models. Are these changes necessarily related to the improvement of the quality of teaching and research?
