

Maps Of The Ancient Sea Kings

Tim Wallace-Murphy, Marilyn Hopkins

Maps of the Ancient Sea Kings Charles H. Hapgood, 1966 Hapgood utilizes ancient maps as concrete evidence of an advanced worldwide civilization existing many thousands of years before ancient Egypt. Hapgood concluded that these ancient mapmakers were in some ways much more advanced in mapmaking than any people prior to the 18th century. Hapgood believes that they mapped all the continents. This would mean that the Americas were mapped thousands of years before Columbus. Antarctica would have been mapped when its coasts were free of ice. Hapgood supposes that there is evidence that these people must have lived when the Ice Age had not yet ended in the Northern Hemisphere and when Alaska was still connected with Siberia by the Pleistocene, Ice Age 'land bridge'.

Templars in America Tim Wallace-Murphy, Marilyn Hopkins, 2025-09-12 This book is a must-read for anyone wanting to understand the true history of the founding of the most powerful nation on earth. —Scott Wolter, host of America Unearthed and author of Cryptic Code of the Templars in America Using archival and archaeological sources, two historians reveal the hidden history of the Knights Templar and their travels to pre-Columbian America . . . and their influence on the Founding Fathers. Templars in America reveals the story of two leading European Templar families who combined forces to create a new commonwealth in America nearly a century before the voyages of Christopher Columbus. Henry St. Clair of the Orkney Islands, then part of Normandy, and Carlo Zeno, a Venetian trader, made peaceful and mutually beneficial contact with the Mi'qmaq people of what is now Canada. Proof of their travels is carved in stone on both sides of the Atlantic and can be found in documentary evidence borne out by a strong oral tradition that has withstood the test of time. Historians Tim Wallace-Murphy and Marilyn Hopkins demonstrate how this early contact with the Americas ties into the centuries-long development of the Templars and Freemasonry, which in turn shaped the thinking of the Founding Fathers—and the American Constitution. Wallace-Murphy and Hopkins also reveal the continuous history of American exploration from the time of ancient Egypt, Greece, and Rome, through the age of the Vikings. Templars in America is a wild ride from the golden age of exploration to the founding of the United States.

The Piri Reis Map of 1513 Gregory C. McIntosh,2000 One of the most beautiful maps to survive the Great Age of Discoveries, the 1513 world map drawn by Ottoman admiral Piri Reis is also one of the most mysterious. Gregory McIntosh has uncovered new evidence in the map that shows it to be among the most important ever made. This detailed study offers new commentary and explication of a major milestone in cartography. Correcting earlier work of Paul Kahle and pointing out the traps that have caught subsequent scholars, McIntosh disproves the dubious conclusion that the Reis map embodied Columbus's Third Voyage map of 1498, showing that it draws instead on the Second Voyage of 1493-1496. He also refutes the popular misinterpretation that Reis's depictions of Antarctica are evidence of either ancient civilizations or extraterrestrial visitation. McIntosh brings together all that has been previously known about the map and also assembles for the first time the translations of all inscriptions on the map and analyzes all place-names given for New World and Atlantic islands. His work clarifies long-standing mysteries and opens up new ways of looking at the history of exploration.

Ley Lines and Earth Energies David Cowan,2003 This exploration shows how natural forces affect our behavior, how they can be used to enhance our health and well being, and ultimately, how they bring us closer to penetrating one of the deepest mysteries being explored.

Technology of the Gods David Hatcher Childress,2000 Technology of the Gods lays out the mind-bending evidence that long-lost civilizations had attained and even exceeded our modern level of advancement. Westerners have been taught that humankind has progressed along a straight-line path from the primitive past to the proficient present, but the hard, fast evidence (literally written in stone!) proves that the ancients had technologies we cannot even replicate today.

Oracle of the Illuminati William Henry,2006-03-15 From crop circles to Atlantis to nanotechnology, this book is an illustration-packed interpretation of ancient gateway stories of the Illuminati.
