Leitidee Daten und Zufall Andreas Eichler, Markus Vogel, 2009-10-27 Die Leitidee „Daten und Zufall“ stellt einen der fünf Inhaltsbereiche dar, die für den Mathematikunterricht in der Sekundarstufe I maßgeblich und aufgrund der Bildungsstandards bundesweit verbindlich sind. Wie aber kann man diese Leitidee mit Leben füllen? Wie kann man Statistik und Wahrscheinlichkeitsrechnung zu der einen Leitidee Daten und Zufall für die Schule verknüpfen? Das Buch Leitidee Daten und Zufall für die Sekundarstufe I gibt hierauf unterrichtspraktische und didaktisch-methodische Antworten. Es geht von konkreten unterrichtsrelevanten Problemstellungen aus und entfaltet an diesen die aktuellen Fragen der Stochastikdidaktik. Über tragfähige Beispiele werden inhalts- und prozessbezogene Standards zur Stochastik vernetzt, um lebensnahe statistische Phänomene im Unterricht erfahrbar werden zu lassen.

Application of Search Engine Marketing Methods in order to generate High-Quality Traffic Nina King, geb. Schweinsberg, 2006-11-22 Inhaltsangabe: Abstract: In a time of tightening budgets, rising bankruptcies and heightened job insecurity, all commerce, be it a major corporation or simply that of a sole operator, must improve its ROI (Return On Investment) rate in order to ensure its continued sustainability. This factor is the key performance indicator (KPI) for any business. The goal of improved ROI becomes all the more difficult when comparing the effectiveness of competing marketing strategies because intangible factors in the purchasing decision such as brand awareness as well as product credibility and loyalty cannot be easily quantified. Even the consumer often has an unconscious preference for one particular product over another. In this regard online marketing offers the advantage of the pull-principle: the user, who pulls the information that he/she is seeking for directly from the Internet, initiates all activities. This implies that a relationship is established between the corporation and consumer. With 90 percent of all Internet users choosing to access a SE during a given session, this first point of contact becomes often decisive in the success or failure for the online marketing concept. Nevertheless, there is an inter-dependency between both the attractiveness and the ability to locate a website, i.e. its findability. A website's content may be highly interesting and appropriate to the user's needs but it will be condemned to failure if it cannot be correctly sourced (i.e. ranked) by a SE. Be that as it may, every top ranked website will be rejected if content and usability disappoint expectations. This report intends to show how Search Engine Optimization (SEO) can be used in a strategic context as the first part of the lead process. SEO highlights the importance of keyword decisions in order to attract customers who secure

high conversion rates and thus increase sales, be it online or offline. The first part of this analysis will explain the technical background of how SEs and keywords work. Also, there are several influential factors that should be considered when optimizing keywords for one's business, such as SE algorithms, the SE market, the consumer and his position in the buying cycle as well as online competitors. These aspects are discussed in the second part of this analysis. The final part will present the concept of Online Performance Measurement & Management (OPMM) and demonstrate how Search Engine Marketing (SEM) can affect a business [...]

Students', Graduates' and Young Professionals' Critical Use of Online Information Olga Zlatkin-Troitschanskaia, Marie-Theres Nagel, Verena Klose, Alexander Mehler, 2024-11-20 This book addresses the topic of online information for everyday personal and professional use by students, graduates, and young professionals. It focuses on the development of the job-related use of online information by young professionals in their practical phases of education (traineeship/practical year) in the domains of law, teaching, and medicine. The research conducted in this context investigates the general and domain-specific use of online resources in educational contexts and examines the effectiveness of an innovative digital training approach in enhancing skills required for the competent use of online information. For this purpose, the presented research uses a yet unprecedented approach of data triangulation, in which self-rated data, digitally and in vivo assessed response process data and expert ratings are integrated into a theoretically founded assessment framework and are examined from various interdisciplinary perspectives with different analysis methods. Overall, this work addresses key research questions related to the use of online information in practical tasks as well as to the impact of digital training. It provides in-depth multidisciplinary analyses of multimodal processes and performance data, allowing implications equally relevant for practitioners, policymakers, and researchers in the field of education.
