Fighting for the Higher Law Peter Wirzbicki,2021-03-26 How important black abolitionists joined famous Transcendentalists to create a political philosophy to fight slavery In Fighting for the Higher Law, Peter Wirzbicki explores how important black abolitionists joined famous Transcendentalists to create a political philosophy that fired the radical struggle against American slavery. In the cauldron of the antislavery movement, antislavery activists, such as William C. Nell, Thomas Sidney, and Charlotte Forten, and Transcendentalist intellectuals, including Ralph Waldo Emerson and Henry David Thoreau, developed a Higher Law ethos, a unique set of romantic political sensibilities—marked by moral enthusiasms, democratic idealism, and a vision of the self that could judge political questions from higher standards of morality and reason. The Transcendentalism that emerges here is not simply the dreamy philosophy of privileged white New Englanders, but a more populist movement, one that encouraged an uncompromising form of politics among a wide range of Northerners, black as well as white, working-class as well as wealthy. Invented to fight slavery, it would influence later labor, feminist, civil rights, and environmentalist activism. African American thinkers and activists have long engaged with American Transcendentalist ideas about double consciousness, nonconformity, and civil disobedience. When thinkers like Martin Luther King, Jr., or W. E. B. Du Bois invoked Transcendentalist ideas, they were putting to use an intellectual movement that black radicals had participated in since the 1830s.

Introduction to Comparative Political Culture Dezhi Tong, 2018-08-03 This book starts with four aspects - subject's cognition, way of thinking, political value and ideology, conducts comparative studies on political culture. Amid using the concept of political culture in western academic circles, it makes comprehensive supplement for this concept, and put forward an updated concept of political culture which is more localized. This new concept, on the grounds of the comparison with political system, takes political culture as the subjective side of political system and incorporates ideology into political culture, thus undoubtedly enriching our knowledge of political culture. On the basis of clarifying the concept of political culture and establishing the comparative dimension of it, this book widely refers to the outlooks of individuals, nations, society and power of political cognition; the modes of objectives, directions and methods of political ideas; democratic awareness, legal concept and system selection of political value; as well as liberalism and republicanism, etc. All these bring substantial benefits to promoting and deepening the comparative studies on political culture. This book can not only be used for the teaching undergraduate and graduates who major in Politics, but also used as the reference book for politics academic research.

Political Marketing: Theoretical and Strategic Foundations Wojciech Cwalina, Andrzej Falkowski, Bruce I. Newman, 2011-03-14 Comprehensive and clearly organized, this is the first integrated theory-to-practice text on marketing's role in the political process. It incorporates insights and concepts drawn from the disciplines of Marketing, Psychology, and Political Science, and covers every aspect of marketing's infiltration into politics, including campaign strategy, market segmentation, and media strategy. Using examples and models drawn from countries around the globe, the authors elucidate the importance of political marketing techniques for the stability of democratic institutions. They also note the potential threats to democracy, especially the use of marketing techniques to manipulate voters at the subconscious level. They conclude with a set of normative do's and don'ts for political marketing practice that strengthens civic education and democratic governance.

Social Interaction Muzafer Sherif,2017-07-05 Reflecting the many contributions of Muzafer Sherif to social psychology during the past thirty years, this volume presents selections from among Sherif's most widely known essays and provides a systematic overview of his evolving interests, concepts, methods and research findings. Twenty-five essays are divided into five sections according to content; the theoretical and methodological problems at the heart of Sherif's work; the experimental model for interaction process and products; problems of self and reference groups; concepts, attitudes and ego-involvements; and contributions to problems of in-group and intergroup relations through experimental and field research. Though the selections range over a broad spectrum each is characterized by the precise and incisive work techniques Sherif devised as well as by its intrinsic relevance to significant issues. Sherif writes to clarify theory, to define conceptual tools, and to use tools and theory to demonstrate the substantive results of his researches. Each research finding is added to its predecessors as the author advances to his goal of a social psychology that is consistent as it moves from the most basic psychological processes to the complexities of individual involvement in collective activity
