The Meaning of "enterprise", "business" and "business Profits" Under Tax Treaties and EU Tax Law Guglielmo Maisto, 2011 The Meaning of Enterprise, Business and Business Profits under Tax Treaties and EU Tax Law, comprising the proceedings and working documents of an annual seminar held in Milan in November 2010, provides an in-depth analysis of the meaning of these three essential concepts in relevant tax treaties and law. The analysis starts from an EU tax law perspective, with a particular emphasis on the European Directives. The above concepts are then considered from domestic tax law viewpoints. The book then moves to tax treaty law. Most notably, an examination of the history and interpretation of the concepts of enterprise, business and business profits is presented, starting from the works of the League of Nations to the current OECD Model Tax Convention. Next, specific tax treaty issues are considered. In particular, the controversial issues concerning the interpretation of the notions of enterprise and enterprise of a Contracting State are discussed. Also, the concepts of profits and business profits are thoroughly reviewed. The concept of enterprise in the context of the non-discrimination clause laid down by Art. 24 of the OECD Model Tax Convention is then examined. Individual country surveys provide an in-depth analysis of the aforementioned concepts and issues from a national viewpoint in selected European and North American jurisdictions, as well as in Australia and Japan. The book concludes with a round-table discussion among some of the most renowned international tax scholars on the desirability to change the OECD Model Tax Convention and its Commentaries. This book is essential reading for all those dealing with issues of taxation of enterprises engaged in cross-border activities and can be considered a new cornerstone in the subject matter.--Publisher's website

Social Entrepreneurship: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2019-04-01 Businesses are looking for methods to incorporate social entrepreneurship in order to generate a positive return to society. Social enterprises have the ability to improve societies through altruistic work to create sustainable work environments for future entrepreneurs and their communities. Social Entrepreneurship: Concepts, Methodologies, Tools, and Applications is a useful scholarly resource that examines the broad topic of social entrepreneurship by looking at relevant theoretical frameworks and fundamental terms. It also addresses the challenges and solutions social entrepreneurs face as they address their corporate social responsibility in an effort to redefine the goals of today's enterprises and enhance the potential for growth and change in every community. Highlighting a range of topics such

as the social economy, corporate social responsibility, and competitive advantage, this multi-volume book is ideally designed for business professionals, entrepreneurs, start-up companies, academics, and graduate-level students in the fields of economics, business administration, sociology, education, politics, and international relations.

Museum Innovation and Social Entrepreneurship Haitham Eid, 2019-03-14 Museum Innovation and Social Entrepreneurship makes a contribution towards building a museum perspective of innovation that takes into consideration the unique role of museums in society. Beginning and ending with the idea of museum innovation in a wider sense, the book takes digital innovation as a particular focus. Drawing on innovation theories from business studies and case studies from national museums in the US and the UK, as well as numerous examples of innovative museum projects around the globe, the author unpacks, in practical terms, what it means for museums to be innovative and socially enterprising. As a result, Eid presents a research-based model of innovation in museums, which is flexible enough to be fully or partially adopted by any museum, regardless of size, location, mission or nature of the collections it houses. As such, this model makes innovation in museums scalable, replicable and feasible to start and operate. Supplying the museum studies field with essential terminologies and conceptual frameworks related to innovation, Museum Innovation and Social Entrepreneurship helps to forge new ideas and create common ground with other disciplines. Therefore, the book should be essential reading for academics, researchers and graduate students working in the fields of museum and heritage studies, digital humanities and business studies. It should also be of great interest to practitioners working in museums around the globe.

Handbook of Research on Managerial Solutions in Non-Profit Organizations Potocan, Vojko, Ün?an, Mustafa C., Nedelko, Zlatko, 2016-08-23 Non-profit Organizations (NPOs) are the fastest growing organizations in modern society. They exist in a liminal realm between public and private organizations, and because of this, new jurisdictions are created for NPOs. The existence of NPOs is contingent upon their adequacy, and management is a key determining factor as to whether an organization survives. The Handbook of Research on Managerial Solutions in Non-Profit Organizations provides relevant theoretical frameworks and the latest empirical research findings related to the successful management of nonprofits. Providing insights into the best practices and valuable comparisons between strategies in different contexts, this book gives invaluable support for nonprofit managers, policy makers, students, and researchers.

Complex Systems Design & Management Daniel Krob,Lefei Li,Junchen Yao,Hongjun Zhang,Xinguo Zhang,2021-04-09

This book contains all refereed papers accepted during the fourth asia-pacific edition & twelve edition - which were merged this year - of the CSD&M conference that took place in Beijing, People's Republic of China by 2021. Mastering complex systems requires an integrated understanding of industrial practices as well as sophisticated theoretical techniques and tools. This explains the creation of an annual go-between European and Asian forum dedicated to academic researchers & industrial actors working on complex industrial systems architecting, modeling & engineering. These proceedings cover the most recent trends in the emerging field of complex systems, both from an academic and professional perspective. A special focus was put this year on "Digital Transformation in Complex Systems Engineering". CESAM Community The CSD&M series of conferences are organized under the guidance of CESAM Community, managed by CESAMES. CESAM Community aims in organizing the sharing of good practices in systems architecting and model-based systems engineering (MBSE) and certifying the level of knowledge and proficiency in this field through the CESAM certification. The CESAM systems architecting & model-based systems engineering (MBSE) certification is especially currently the most disseminated professional certification in the world in this domain through more than 1,000 real complex system development projects on which it was operationally deployed and around 10,000 engineers who were trained on the CESAM framework at international level.

The Business Environment Paul Wetherly, Dorron Otter, 2008 Designed specifically for students new to the study of business, this book gives context to the subject in the range of environments in which business operates. Part One introduces the environments through the well-used PESTLE framework; this structure ensures that the core political, economic, socio-cultural, technological, legal and environmental influences on business are fully covered. A range of themes is clearly presented in each chapter to ensure this approach does not over-simplify the presentation of the business environment. These themes are designed to demonstrate to the reader that business is diverse and complex and there are many inter-relationships between the environments. The themes also outline the factors which influence business, for example the diversity of business, the complexity of the external environment, and the interaction between business and its environment. Part Two departs from the PESTLE framework and focuses on a range of contemporary issues relevant to each environment; this enables the reader to access the theory through lively current debates. These include the changing public sector, corporate social responsibility and ethics, globalization, and work-life balance. There are interesting short cases and examples throughout, as well as a longer case study at the end of each chapter; cases include the Nintendo Wii, BlackBerry, Nike, eBay, Nokia, EasyJet, Toyota, and the 2012 Olympics. The analytical approach the text takes, showing different opinions and perspectives and challenging key issues, will stimulate lively discussion and debate. Online Resource Centre A comprehensive Online Resource Centre provides all the teaching and learning materials needed to support each chapter, removing the need for lecturers to look for additional seminar and test materials, and giving students the resources they need to check and build upon their understanding. Lecturers can track students' progress and understanding using an online test bank of 300 questions offering immediate answers that can be customised and loaded on to the university's VLE. Seminar activities can be based around the additional online case studies, whilst lecturer's notes with outline answers and discussion points to accompany the review questions in the text provide a framework for class debate. Students can test themselves using online multiple choice questions with feedback or the online flashcard glossary. Weblinks to useful sites provide a quick resource for further research, and web exercises guide the student to specific articles on the web, accompanied by questions to stimulate critical thinking.
