Security Planning Susan Lincke,2015-06-11 This book guides readers through building an IT security plan. Offering a template, it helps readers to prioritize risks, conform to regulation, plan their defense and secure proprietary/confidential information. The process is documented in the supplemental online security workbook. Security Planning is designed for the busy IT practitioner, who does not have time to become a security expert, but needs a security plan now. It also serves to educate the reader of a broader set of concepts related to the security environment through the Introductory Concepts and Advanced sections. The book serves entry level cyber-security courses through those in advanced security planning. Exercises range from easier questions to the challenging case study. This is the first text with an optional semester-long case study: Students plan security for a doctor's office, which must adhere to HIPAA regulation. For software engineering-oriented students, a chapter on secure software development introduces security extensions to UML and use cases (with case study). The text also adopts the NSA's Center of Academic Excellence (CAE) revamped 2014 plan, addressing five mandatory and 15 Optional Knowledge Units, as well as many ACM Information Assurance and Security core and elective requirements for Computer Science.

Software Security - Theories and Systems Kokichi Futatsugi,Fumio Mizoguchi,Naoki Yonezaki,2004-10-15 This book constitutes the thoroughly refereed post-proceedings of the Second Mext-NSF-JSPS International Symposium on Software Security, ISSS 2003, held in Tokyo, Japan in November 2003. The 18 revised full invited and selected papers presented were carefully reviewed and improved for inclusion in the book. The papers are organized in topical sections on analysis of protocols and cryptography, verification of security properties, safe implementation of programming languages, secure execution environments, and secure systems and security management.

NIST 800-171: System Security Plan (SSP) Template and Workbook Mark A. RUSSO CISSP-ISSAP CEH,2019-01-04 THE SYSTEM SECURITY PLAN IS A CRITICAL DOCUMENT FOR NIST 800-171, AND WE HAVE RELEASED A MORE EXPANSIVE AND UP TO DATE SECOND EDITION FOR 2019A major 2019 NIST 800-171 development is the expected move by the Department of Justice (DOJ) against any company being held to either FAR Clause 52.204-21, DFARS Clause 252.204-7012,

or both; if DOJ can show the company has violated its contract it will be subject to federal prosecution if they fail to meet NIST 800-171. Discussions of the author with key personnel working with NIST and DOJ on this matter raises the seriousness of not meeting NIST 800-171. Sources to the author are expecting in 2019 and beyond the likelihood of civil and criminal prosecution for those companies who: 1) have a breach of their IT environment, 2) that data, specifically Controlled Unclassified Information (CUI)/Critical Defense Information (CDI), is damaged or stolen, and the 3) DOJ can demonstrate negligence by the company, will result in federal prosecution. This is part of a ongoing series of Cybersecurity Self Help documents being developed to address the recent changes and requirements levied by the Federal Government on contractors wishing to do business with the government. The intent of these supplements is to provide immediate and valuable information so business owners and their Information Technology (IT) staff need. The changes are coming rapidly for cybersecurity contract requirements. Are you ready? We plan to be ahead of the curve with you with high-quality books that can provide immediate support to the ever-growing challenges of cyber-threats to the Government and your business.

System Security Plan (SSP) Template and Workbook - NIST-Based Mark A. Russo CISSP-ISSAP,2018-03-13 This is a supplement to DOD NIST 800-171 Compliance Guidebook. It is designed to provide more specific, direction and guidance on completing the core NIST 800-171 artifact, the System Security Plan (SSP). This is part of a ongoing series of support documents being developed to address the recent changes and requirements levied by the Federal Government on contractors wishing to do business with the government. The intent of these supplements is to provide immediate and valuable information so business owners and their Information Technology (IT) staff need. The changes are coming rapidly for cybersecurity contract requirements. Are you ready?
