**The Assessment of Child and Adolescent Personality** Howard M. Knoff, 2002-12-31 Now available in paper for the first time, this volume brings together leading contributors to provide a comprehensive review of theory, research, and practice in child and adolescent personality assessment. Organized for easy reference, the book is divided into four parts. Part I summarizes basic theories, issues, and concepts, setting forth a framework for assessment as a hypothesis-generating, problem-solving process. Part II describes and evaluates a wide range of relevant approaches, tests, and techniques, marshaling the available data and reviewing administration procedures, scoring, and interpretation. In Part III, the process by which personality assessment is translated into effective intervention strategies and programs for children is examined in depth. A summary of major perspectives and recommended practices is presented in Part IV, which also considers future needs and directions for the field.

**Kinetic-house-tree-person Drawings (K-H-T-P)** Robert C. Burns, 1987 This book contains the first documentation of combining house, tree, and person into a single drawing. It helps enrich clinician's test batteries and aids psychologists and physicians in understanding the emotions and self-awareness of their clients. It is richly illustrated and teaches the important skill of using visual metaphors in clinical settings to understand and assist clients. The author covers all aspects of drawing interpretation, including size, placement, stroke or line characteristics, and the possible individual characteristics of each element within the house, tree, and person drawings.

*The Psychological Examination of the Child* Theodore H. Blau, 1991-02-07 Unlike other books on child testing, this one establishes a conceptual framework for psychological evaluation of children. Instead of focusing on the assessment of particular conditions, it deals with what is important to find out about all children, normal and disturbed, and sets forth a standardized means of analysis, the Basic Psychological Examination. Covers practical aspects of the examination, including the interview group, the examination setting, preparing the child, formulating reports and recommendations, and conferring

with parents. Comparable in scope and comprehensiveness to a physician's medical exam, the Basic Psychological Examination enables the practitioner to identify virtually anything out of order in a child's development. Practical and boldly original, the text commends itself to educators, researchers and clinicians alike.

Psychological Experts in Divorce Actions Marc J. Ackerman, Andrew W. Kane, 2005-01-01 Emotionally charged issues abound in matrimonial practice, especially in custody disputes. Expert testimony can have a dramatic impact on the outcome of a case, and when matters are highly sensitive or sensational the seeming objectivity of an expert can be dispositive. To effectively reinforce or question that testimony, certain specialized knowledge is essential. Scientifically accepted standards and theories are constantly evolving. Keeping up with the data had been a challenge, but one integrated resource has made it simple. Aspen Publishers' Psychological Experts in Divorce Actions pulls all the research together into the definitive guide to understanding the role of psychological evaluations in divorce and custody actions. Focused on providing the best approach to protecting your client's interests, this work explains all the leading testing instruments, what conclusions may be drawn and how to challenge or support those conclusions. In addition to offering effective examination and cross-examination strategies, it assists you in handling the gamut of psychological factors that affect clients in divorce and custody cases. Authors Marc J. Ackerman, Ph.D., and Andrew W. Kane, Ph.D., are licensed psychologists who have been involved in hundreds of custody cases. Drawing on their extensive experience—testing parties to a divorce and treating psychological patients in the clinic—and as psychological experts in the courtroom, they identify the most important psychological evaluation research used in divorce and custody decision-making and distill the information into clear terms lawyers can readily apply. They also examine vital issues including: Ethics —confidentiality, privilege, duty to warn or protect (Tarasoff), sharing raw data, test integrity Sexual abuse —bona fide or fabricated allegations, psychological effects of sexual abuse, profiles of abuser and abused Testing —personality tests (including MMPI-2, And The new MMPI-2-RF, Rorschach, Millon, TAT); intelligence tests (Wechsler scales, Kaufman scales, Stanford Binet); custody tests (ASPECT, PCRI, PASS, BPS); and many more How divorce affects families —custody, placement, age and gender differences, grandparents, sexual preference, psychological problems

**Handbook of Psychological Assessment** Gary Groth-Marnat,1990-07-09 This comprehensive text provides a practical framework for selecting, administering, interpreting and integrating data from commonly used methods of clinical psychological assessment. More than a codebook or list of possible interpretations of tests, it stresses integrating data as a means of solving problems and making informed decisions. The first two chapters deal with introductory principles of assessment including historical trends, evaluating tests, issues, and guidelines, psychological assessment within the general

medical, legal, educational, psychological and psychiatric contexts. The middle chapters (3-11) cover methods of collecting information including interviewing, behavioral assessment, Wechsler intelligence scales, Bender Gestalt, Rorschach, Minnesota Multiphasic Personality Inventory and other means. The final chapter provides specific guidelines for report writing, detailed formats and four sample reports. Revised and updated for this Second Edition, the text stresses interrelationships among test scores, history, observational data, and other forms of input as being essential for arriving at accurate psychological assessment.
