Tratando... bulimia nerviosa José I. Baile Ayensa, María J. González Calderón, 2014-09-18 La bulimia nerviosa es un trastorno del comportamiento alimentario caracterizado por un patrón de atracones y conductas compensatorias, asociado a una preocupación excesiva en relación a la imagen corporal y el peso. Se estima que afecta a un número elevado de mujeres pero, dado que no tiene muchas manifestaciones externas, en la mayoría de los casos pasa desapercibido. El tratamiento de este trastorno requiere la aplicación de diversas técnicas psicológicas e intervenciones dietéticas, siendo, al igual que las otras alteraciones de comportamiento alimentario, como la anorexia o el trastorno por atracón, un reto para los profesionales de la salud. Además, en bulimia nerviosa las habituales comorbilidades suelen complicar la intervención terapéutica. Este libro es una guía terapéutica de ayuda al profesional de la psicología que afronta un caso de bulimia nerviosa con un enfoque eminentemente práctico. Se ha estructurado por sesiones estableciendo un plan de intervención completo con objetivos, técnicas y materiales que se pueden utilizar con un o una paciente afectado o afectada por este problema. Igualmente, en cada sesión se comentan las dificultades terapéuticas que pueden surgir proporcionando posibles soluciones a las mismas.

Técnicas de modificación de conducta Francisco Javier Labrador Encinas, 2014-06-02 En poco más de treinta años la psicología ha pasado de ser una profesión del futuro a ser una profesión con un gran presente. Hoy la actuación profesional de los psicólogos es demandada y valorada positivamente en campos tan dispares como el clínico, el laboral, el jurídico o el escolar. Los psicólogos tienen habilidades profesionales eficaces para mejorar las condiciones de vida de las personas, grupos u organizaciones. El desarrollo de la investigación y conocimientos de la psicología ha resultado, sin duda, muy importante, pero lo verdaderamente determinante ha sido disponer de habilidades o técnicas de intervención psicológica. En esta obra se recopilan las técnicas de modificación de conducta. Estas técnicas se exponen de forma detallada, teniendo como referencia constante la evaluación empírica de su eficacia y una búsqueda sistemática de sus fundamentos científicos, a fin de que puedan servir como guía de actuación para expertos, ya que su objetivo fundamental es ser útil al psicólogo profesional. El libro está organizado en tres partes. La primera se centra en el proceso y procedimientos de evaluación. La segunda expone, de forma pormenorizada y orientada a la práctica, las principales técnicas de modificación de conducta. La tercera y última parte incluye, bajo el epígrafe «Ayudas a la intervención psicológica», seis capítulos que servirán para la aplicación profesional de dichas técnicas.
