Non-Semitic Loanwords in the Hebrew Bible Benjamin J. Noonan,2019-06-11 Ancient Palestine served as a land bridge between the continents of Asia, Africa, and Europe, and as a result, the ancient Israelites frequently interacted with speakers of non-Semitic languages, including Egyptian, Greek, Hittite and Luwian, Hurrian, Old Indic, and Old Iranian. This linguistic contact led the ancient Israelites to adopt non-Semitic words, many of which appear in the Hebrew Bible. Benjamin J. Noonan explores this process in *Non-Semitic Loanwords in the Hebrew Bible*, which presents a comprehensive, up-to-date, and linguistically informed analysis of the Hebrew Bible's non-Semitic terminology. In this volume, Noonan identifies all the Hebrew Bible's foreign loanwords and presents them in the form of an annotated lexicon. An appendix to the book analyzes words commonly proposed to be non-Semitic that are, in fact, Semitic, along with the reason for considering them as such. Noonan's study enriches our understanding of the lexical semantics of the Hebrew Bible's non-Semitic terminology, which leads to better translation and exegesis of the biblical text. It also enhances our linguistic understanding of the ancient world, in that the linguistic features it discusses provide significant insight into the phonology, orthography, and morphology of the languages of the ancient Near East. Finally, by tying together linguistic evidence with textual and archaeological data, this work extends our picture of ancient Israel's interactions with non-Semitic peoples. A valuable resource for biblical scholars, historians, archaeologists, and others interested in linguistic and cultural contact between the ancient Israelites and non-Semitic peoples, this book provides significant insight into foreign contact in ancient Israel.

The History of Science and Technology in Wei, Jin, Southern and Northern Dynasty Li Shi, The book is the volume of "The History of Science and Technology in Wei, Jin, Southern and Northern Dynasty" among a series of books of "Deep into China Histories". The earliest known written records of the history of China date from as early as 1250 BC, from the Shang dynasty (c. 1600-1046 BC) and the Bamboo Annals (296 BC) describe a Xia dynasty (c. 2070-1600 BC) before the Shang, but no writing is known from the period The Shang ruled in the Yellow River valley, which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River. These Yellow River and Yangtze civilizations arose millennia before the Shang. With thousands of years of continuous history, China is one of the world's oldest civilizations, and is regarded as one of the cradles of

civilization. The Zhou dynasty (1046–256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC, and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature and philosophy first developed during those troubled times. In 221 BC Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death, and was supplanted by the longer-lived Han dynasty (206 BC – 220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men, well-versed in calligraphy, history, literature, and philosophy, were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912, and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace, and periods of war and failed statehood – the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras control stretched as far as Xinjiang and Tibet, as at present. Traditional culture, and influences from other parts of Asia and the Western world (carried by waves of immigration, cultural assimilation, expansion, and foreign contact), form the basis of the modern culture of China.
