**State of Wonder** Ann Patchett, 2012-04-26 SHORTLISTED FOR THE ORANGE PRIZE FOR FICTION 2012 There were people on the banks of the river. Among the tangled waterways and giant anacondas of the Brazilian Rio Negro, an enigmatic scientist is developing a drug that could alter the lives of women for ever. Dr Annick Swenson's work is shrouded in mystery; she refuses to report on her progress, especially to her investors, whose patience is fast running out. Anders Eckman, a mild-mannered lab researcher, is sent to investigate. A curt letter reporting his untimely death is all that returns. Now Marina Singh, Anders' colleague and once a student of the mighty Dr Swenson, is their last hope. Compelled by the pleas of Anders's wife, who refuses to accept that her husband is not coming home, Marina leaves the snowy plains of Minnesota and retraces her friend's steps into the heart of the South American darkness, determined to track down Dr. Swenson and uncover the secrets being jealously guarded among the remotest tribes of the rainforest. What Marina does not yet know is that, in this ancient corner of the jungle, where the muddy waters and susurrating grasses hide countless unknown perils and temptations, she will face challenges beyond her wildest imagination. Marina is no longer the student, but only time will tell if she has learnt enough.

Wonder-Full Education Kieran Egan, Annabella I. Cant, Gillian Judson, 2013-07-24 For many children much of the time

their experience in classrooms can be rather dull, and yet the world the school is supposed to initiate children into is full of wonder. This book offers a rich understanding of the nature and roles of wonder in general and provides multiple suggestions for to how to revive wonder in adults (teachers and curriculum makers) and how to keep it alive in children. Its aim is to show that adequate education needs to take seriously the task of evoking wonder about the content of the curriculum and to show how this can routinely be done in everyday classrooms. The authors do not wax flowery; they present strong arguments based on either research or precisely described experience, and demonstrate how this argument can be seen to work itself out in daily practice. The emphasis is not on ways of evoking wonder that might require virtuoso teaching, but rather on how wonder can be evoked about the everyday features of the math or science or social studies curriculum in regular classrooms.

**Bronze Monsters and the Cultures of Wonder** Nassos Papalexandrou, 2021-11-23 The eighth and seventh centuries BCE were a time of flourishing exchange between the Mediterranean and the Near East. One of the period's key imports to the Hellenic and Italic worlds was the image of the griffin, a mythical monster that usually possesses the body of a lion and the head of an eagle. In particular, bronze cauldrons bore griffin protomes—figurative attachments showing the neck and head of the beast. Crafted in fine detail, the protomes were made to appear full of vigor, transfixing viewers. *Bronze Monsters and the Cultures of Wonder* takes griffin cauldrons as case studies in the shifting material and visual universes of preclassical antiquity, arguing that they were perceived as lifelike monsters that introduced the illusion of verisimilitude to Mediterranean arts. The objects were placed in the tombs of the wealthy (Italy, Cyprus) and in sanctuaries (Greece), creating fantastical environments akin to later cabinets of curiosities. Yet griffin cauldrons were accessible only to elites, ensuring that the new experience of visuality they fostered was itself a symbol of status. Focusing on the sensory encounter of this new visuality, Nassos Papalexandrou shows how spaces made wondrous fostered novel subjectivities and social distinctions.

**Asia in the Making of Europe, Volume II: A Century of Wonder. Book 2** Donald F. Lach, 2010-01-15 Praised for its scope and depth, *Asia in the Making of Europe* is the first comprehensive study of Asian influences on Western culture. For volumes I and II, the author has sifted through virtually every European reference to Asia published in the sixteenth-century; he surveys a vast array of writings describing Asian life and society, the images of Asia that emerge from those writings, and, in turn, the reflections of those images in European literature and art. This monumental achievement reveals profound and

pervasive influences of Asian societies on developing Western culture; in doing so, it provides a perspective necessary for a balanced view of world history. Volume I: The Century of Discovery brings together everything that a European could know of India, Southeast Asia, China, and Japan, from printed books, missionary reports, traders' accounts and maps (The New York Review of Books). Volume II: A Century of Wonder examines the influence of that vast new body of information about Asia on the arts, institutions, literatures, and ideas of sixteenth-century Europe.
