Matemática inclusiva Àngel Alsina,Núria Planas,2023-05-22 Nuestra sociedad tiene la obligación de garantizar el acceso a una educación matemática de calidad para todo el mundo y, con ello, avanzar en la mejora de las condiciones de ciudadanía. Matemática Inclusiva. Propuestas para una educación matemática accesible pretende ser un instrumento de ayuda en la consecución de este objetivo. A lo largo del libro se proponen formas de reconstruir la relación de las personas con las matemáticas a través de diversos principios fundamentales de la educación matemática: el pensamiento crítico, la manipulación de materiales, el juego y la atención a la diversidad. Una educación matemática basada en estos principios tiene que destacar, a su vez, los principios más generales de contextualización en los lugares donde se llevan a cabo las prácticas: globalización de los grupos de conocimiento implicados y personalización de los contenidos matemáticos en

función de la especificidad de cada persona. Unos y otros principios se abordan de forma interrelacionada y en base a experiencias validadas de aula.

Educación, tecnología, innovación y transferencia del conocimiento Eloy López Meneses, César Bernal

Bravo, 2023-11-14 Esta publicación recopila doscientos dieciocho aportaciones científicas que representan una miscelánea de innovaciones y reflexiones docentes en distintas áreas del currículo y de las diversas etapas educativas. Estas contribuciones suponen un abanico de buenas prácticas para el desarrollo profesional. El trabajo agrupa tres conceptos clave para el desarrollo económico y social de cualquier país: innovación, educación y transferencia tecnológica. Sin embargo, no siempre se les presta la debida atención ni se les asigna los recursos necesarios para impulsarlos. La obra pretende ofrecer una visión integral y actualizada de estos temas, analizando sus fundamentos teóricos, sus experiencias prácticas y sus desafíos futuros. A lo largo de sus capítulos, se abordan aspectos como el papel de la investigación, la creatividad, el emprendimiento, la cooperación, la aplicabilidad de las tecnologías emergentes, la evaluación o el proceso de transferencia de conocimiento. Asimismo, se presentan casos de éxito y buenas prácticas de diferentes profesionales, que ilustran cómo la innovación, la

educación y la transferencia de conocimiento pueden contribuir al bienestar colectivo y al progreso sostenible formativo.
