Child Development in Educational Settings Marilyn Fleer,2018-01-26 Child Development in Educational Settings provides a comprehensive introduction to traditional and contemporary theories of development and learning in the contexts of early childhood and primary education. Drawing upon the experiences and perspectives of children, families, educators and Aboriginal and Torres Strait Islander scholars, Marilyn Fleer provides insights into significant theories and approaches, including cultural-historical, constructivist, social constructivist, maturational and ecological systems. The book features four major case studies, which are revisited throughout, to examine how learning and development can be re-imagined within socially, culturally and linguistically diverse communities. This approach enables readers to use theories to analyse and measure learning and development in planning and curriculum, and to feel empowered to enact change in their educational settings. Written in an engaging and accessible style, Child Development in Educational Settings is an essential resource for pre-service teachers and professionals alike.

A Geography of the Lifeworld (Routledge Revivals) David Seamon,2015-06-11 Within the modern Western lifestyle increasing conflict is becoming apparent between that patchwork of isolated points such as the home or the office, which are linked by a mechanical system of transportation and communication devices, and a growing sense of homelessness and isolation. This work, first published in 1979, adopts a phenomenological perspective illustrating that this malaise may have partial roots in the deepening rupture between people and place. Whereas the problems of terrestrial space may have been overcome technologically and economically, it has been less successful regarding people. Experience indicates that people become bound to locality, and the quality of their life is thus reduced if these bonds are disrupted or broken in any way. The relationship between community and place is investigated, as is the opportunity for improving the environment, both from a human and an ecological perspective. This book will be of interest to students of human geography.

Mental Health in Pregnancy and Childbirth Sally Price,2007-01-01 This title is directed primarily towards health care professionals outside of the United States. It takes a comprehensive look at the issues surrounding mental illness and pregnancy. Describing common disorders and their relationship with pregnancy, it promotes an understanding of the issues

involved and offers tools to providing the most effective woman-centred maternity care. All health professionals concerned with the wellbeing of the pregnant woman will find invaluable help and guidance in this book. Given the identification of mental health problems as a leading cause of maternal death (CEMD 2001), this is an essential guide to the effects of pregnancy and childbirth on women and families coping with mental illness.
