J. Edwin Hartill, J. E. Hartill

The Thirteenth Tribe Arthur Koestler, 1976 The Khazars (Turkish: Hazarlar) were a semi-nomadic Turkic people who created one of the largest states of medieval Eurasia, Khazaria, with its capital at Atil. Astride one of the major arteries of commerce between northern Europe and southwestern Asia, Khazaria commanded the western marches of the Silk Road and played a key commercial role as a crossroad between China, the Middle East, and Europe.--Wikipedia.

The Lost 13th Tribe Marlin Kime, 2005-11-01 The Lost 13th Tribe: America in Prophecy by Dr. Marlin Kime is the first volume of a multi-volume work that, for the first time, answers the most important questions about America. Who are we in history? Where did we come from? What does the future hold for us? For the first century and a half of America's existence, it was invincible as it achieved unprecedented heights of power, wealth, and greatness. And it did all of this in the face of daunting, hopeless and impossible obstacles arrayed against it. These volumes show exactly how and why this was accomplished. Conversely, why was America able to achieve such overwhelming and incredible victories against its powerful Axis foes of World War II and yet fail miserably against the third rate Third World nations of Korea and Vietnam? These volumes thoroughly explain the hidden reasons behind these enigmas of history. Centuries ago, all of this was foretold in the most intricate, precise, and accurate detail in the pages of the ancient prophets of the Bible. What great purpose awaits America? Does the future hold the promise of an even greater destiny than ever before imagined for this nation? Or perhaps an ominous foreboding looms on the horizon?

Ribbon of Darkness Rev. Mel Jolley, 2018-12-28 Throughout history, God has made covenants with humankind. And while the very first covenant was between God and first man, Adam, many of us do not realize that even today, God has made a covenant with America. Yet like that original alliance, our covenant as a nation with God is breaking. In Ribbon of Darkness, author Rev. Mel Jolley offers his insights into the various social issues happening in our nation, taking us through the election period and the candidates running; this commentary explores the deterioration of America and the breaking of our pact as a nation with God. Jolley explains how this agreement mirrors the covenant Israel has with God—the only covenant nations with the sovereign God. Nothing is more important than the covenant God has with our nation today, and all of us need to be

aware of the changes in our society and pray for guidance in these harrowing times. Because in the end, we must make a stand for Christ and the true heritage of our nation.

Principles of Biblical Hermeneutics J. Edwin Hartill,J. E. Hartill,1960-10-05 Biblical hermeneutics is the science of interpreting the Bible. The aim of this book is to explain and illustrate the various principles of Bible interpretation that must be followed if one is to understand the teachings of God's Word correctly. Such a study is pivotal to anyone who studies the Bible. Unless consistent principles of interpreting its passages are followed the truth of God becomes blurred and confused. Determining what the Bible means must precede all application of its words to the lives of its readers and hearers. Dr. S. Franklin Logsdon, Bible teacher and evangelist, says of this book: These principles of Bible study by Dr. J. Edwin Hartill have been tested and proved in his own personal teaching for many years. They are succinct, pointed, practical, original, understandable -- simple keys to unlock the storehouse of Scripture to things both old and new. This publication makes a distinct contribution to Bible lovers in their search for increased knowledge of divine truth. It is a privilege and an honor to commend it to God's people. Using a graphic combination of text, charts, and outlines, Dr. Hartill states, I trust that as you study these principles, your understanding of the Word and your love for its truth may deepen, so that you may more ably pass it on to others. Included are chapters on: - The Dispensational Principle - The Covenantal Principle - The Ethnic Division Principle - The Discrimination Principle - The Predictive Principle - The Application Principle - The Typical Principle - The Principle of Human Willingness in Illumination - The First Mention Principle - The Progressive Mention Principle - The Full Mention Principle - The Context Principle - The Agreement Principle - The Direct Statement Principle - The Gap Principle - The Three-fold Principle - The Election Principle - The Repetition Principle - The Synthetic Principle - The Principle of

Illustrative Mention - The Double Reference Principle - The Christo-Centric Principle - The Numerical Principle

ATLANTIS IS REAL FACT INDONESIA HISTORY BEFORE Santo Saba, KONSTANTA SUMURUPING GENI NUSANTARA The literal meaning of the word constant is constancy, constant or unchanging In mathematics, constant or constant is a constant value. Constants are used in various scientific disciplines as opposed to arbitrary variables. The definition of variable includes meaning changeable, not fixed, the declaration of something that has a variety of values in the programming language is also called a symbol that represents a certain value, variables known in sub-programs are called local variables, while those that are known in general / intact in one program are called Global Variables History or real events in the past is Certain not Variable, only the records are affected by the interests of the Subjective in power which makes this uncertain and even Ambiguous, this must be straightened out. Constant is a type of variable whose value cannot be changed. Value initialization is only done once at the beginning, after which it cannot be changed. Some constants are named according to the name of the discoverer. Examples of constants: ● c (speed of light) = 299,792,458 meters per second ● h (Planck's constant) = 6.626×10^{-34} Joule seconds ● G (constant gravity) = 6.6742×10^{-11} m³ s⁻² kg⁻¹ ● Hubble constant = 70 (km / s) / Mpc ● π (pi), the constant of the ratio of the circle to the diameter, the value is close to 3.141592653589793238462643 ... E , the value is close to 2.718281828459045235360287 ... ● ϕ (golden ratio), the value is close to 1.618033988749894848204586 So Constant is Constant whose value cannot be changed. Value initialization is only done once at the beginning, after which the value cannot be changed, the number of years in recording real events in history is correct in that year not Variable If the determination of the number of years in historical recording is ambiguous or can be refuted truth then it needs to be corrected and revised ... this is what happened to our country's history recording ... The discoveries at the end of the 20th century showed that the Cosmological Constant was needed to explain the existence of Dark energy The cosmological constant is the density of space energy or vacuum energy that appears in the field equation in General Relativity. This constant was introduced by Einstein in his theory of General Relativity so that the universe remains static Einstein then discarded or abandoned the cosmological constant when observations showed that the universe is expanding or moving to expand This is the biggest mistake in my life Einstein, who once modified the nature of the general theory of relativity, felt that he had 'corrupted' his own theory.He regretted so much that the addition of the cosmological constant was the biggest mistake of his life. Naturally, as an ordinary human, Einstein is not free from mistakes, here we learn that mistakes are a very human nature, they can happen to anyone, including scientists of Einstein's caliber. Likewise in the calculation of the year in the recording of historical years in the archipelago, Konstanta or the determination of the calculation of the historical year on the inscription with the number of Saka which has been calculated as Must started in 78

AD, is obsolete, must be discarded or not. used again, because it is proven that there are many historical facts that occurred before that year in the archipelago Mistakes or in polite language is Mistakes can happen to anyone, including scientists of Einstein's caliber, as well as chroniclers in this country ... that the year 78 AD is the year of the Saka nation of the ancestors of the Archipelago nation. that year conquered Raja Salivahana in south India It is not the beginning of the Saka year to calculate the number of years in the Inscription of this early calculation of the Saka year, causing our history to be lost before the year 78 AD, in fact there is already an advanced civilization in this country, ... and if this is considered to the Khilafan. .. so when do we want to be considered a Primitive nation ...? That means ... If we have found the numbers Constants or Decisions in the early years of the calculation of the Saka year in the inscriptions, we will find a lot of real facts that the History of the Archipelago is more advanced than what is written today ... The Sumuruping Geni Constant is the determination of the return of the bright light from the fire that once lit the world, and the source of that fire has ever occurred and originated in this land. History naturally rotates towards the point where it was once passed, and that triumph has occurred and will be repeated again with valid provisions or constants ... so now the time has come for the Sumuruping Geni Constant to occur again in this archipelago. ... The generation of this nation will understand who their true ancestors were that their ancestors were not Primitive, did not embrace Animism. Dynamics were also the philosophy of their teachings that colored 3/4 of the earth, which underlies the birth and growth of 3 teachings on Indian soil
