*Agricultural extension in transition worldwide* Food and Agriculture Organization of the United Nations ,2020-04-01 This publication contains twelve modules which cover a selection of major reform measures in agricultural extension being promulgated and implemented internationally, such as linking farmers to markets, making advisory services more demand-driven, promoting pluralistic advisory systems, and enhancing the role of advisory services within agricultural innovation systems. The reform issues consider the changing roles of the various public, private and non-governmental providers, and highlights the collaboration required to create synergies for more efficient and effective high quality services responding to the needs and demands of smallholder farmers. The modules draw on reform experiences worldwide and provide an introduction, definitions and a discussion for each specific reform measure, as well as case studies, tools, exercises and a reference list. The reform topics are envisaged for policy-makers, management and senior staff of institutions providing agricultural and rural advisory services. It can also be very useful for students studying agriculture, rural development, and

extension in particular. This is a substantially updated version of the 2009 publication of the same title, but with only nine modules. These nine modules were restructured and up-dated, and three modules were added. The layout of the modules changed to allow a better overview for the reader.

The Silent Patient Alex Michaelides, 2019-02-05 **\*\*THE INSTANT #1 NEW YORK TIMES BESTSELLER\*\*** An unforgettable—and Hollywood-bound—new thriller... A mix of Hitchcockian suspense, Agatha Christie plotting, and Greek tragedy. —Entertainment Weekly The Silent Patient is a shocking psychological thriller of a woman's act of violence against her husband—and of the therapist obsessed with uncovering her motive. Alicia Berenson's life is seemingly perfect. A famous painter married to an in-demand fashion photographer, she lives in a grand house with big windows overlooking a park in one of London's most desirable areas. One evening her husband Gabriel returns home late from a fashion shoot, and Alicia shoots him five times in the face, and then never speaks another word. Alicia's refusal to talk, or give any kind of explanation, turns a domestic tragedy into something far grander, a mystery that captures the public imagination and casts Alicia into notoriety. The price of her art skyrockets, and she, the silent patient, is hidden away from the tabloids and spotlight at the Grove, a secure forensic unit in North London. Theo Faber is a criminal psychotherapist who has waited a long time for the opportunity to work with Alicia. His determination to get her to talk and unravel the mystery of why she shot her husband takes him down a twisting path into his own motivations—a search for the truth that threatens to consume him....

*Handbook of Research on Innate Leadership Characteristics and Examinations of Successful First-Time Leaders* Guah, Matthew Waritay, 2021-02-05 For hundreds of years, different leadership theories have been explored to try to explain exactly how and why certain people become great leaders. Research spans a discussion of personality traits, the characteristics of the situation at hand, and qualifications of the leader to try to determine what causes people to become more likely than others to take charge. This can be in various settings: CEOs, presidents and prime ministers, managing directors, governors, senators, head coaches, and more. Through the examination of first-time leadership, new theories and ideas on leadership are explored. The Handbook of Research on Innate Leadership Characteristics and Examinations of Successful First-Time Leaders is a comprehensive reference source that focuses on what qualities distinguish first-time leadership from traditional leaders, while furthering leadership theories that look at other variables such as situational factors, knowledge base, skill levels, etc. It reviews the various approaches used by first-time leadership and how each of them uniquely approaches effective leadership, key outcomes, and the strengths and weaknesses of each approach. Furthermore, it distinguishes between the traditional route for leadership, the gradual moving up of an individual over time to higher positions, and a first-time leadership in which an individual begins right away in a position without climbing the professional ladder. This book will attempt to draw lessons from existing first-time leadership experience and provide evidence for the appropriateness of such a route to leadership. Topics highlighted include transformational leadership, political leaders, ethical and unethical leadership, and leadership development. This book is ideal for young professionals, leaders, executives, managers, graduate students, practitioners, government officials, researchers, academicians, and students.

*Handbook of Cognitive Aging* Quentin Gariépy,Raphaël Ménard,2010 Ageing is the accumulation of changes in an organism or object over time. Ageing in humans refers to a multidimensional process of physical, psychological, and social change. Some dimensions of ageing grow and expand over time, while others decline. Reaction time, for example, may slow with age, while knowledge of world events and wisdom may expand. Research shows that even late in life potential exists for physical, mental, and social growth and development. Ageing is an important part of all human societies reflecting the biological changes that occur, but also reflecting cultural and societal conventions. More people are reaching older age today than ever before and the incidence of dementia is thus expected to rise. It is important to investigate the possible prevention of dementia and cognitive decline. This new book gathers the latest research from around the globe in this field of study and related topics such as cardiovascular disease and cognitive function, physical exercise and cognitive function in the elderly, the dementia diagnosis, the role of MRI in Alzheimer's disease, oestrogen decline effects on the mental health of ageing women and the relationship between dementia and depression.
