**Pilar Larranaga, Pedro Guijarro-Fuentes**

*Challenges of Anglophone Language(s), Literatures and Cultures* Alena Kačmárová, 2017-01-06 This book explores scholarly challenges within the fields of Anglophone language, literature, and culture. The section focusing on language details issues falling within two areas: namely, language contact and the language-culture relationship, and stylistic and syntactic perspectives on the English language. The literature part investigates twentieth-century American, English, and Australian literature, dealing with both poetry and prose and discussing topics of identity, gender, metafiction, postmodern conditions, and other relevant theoretical issues in contemporary literature. The culture part treats theoretical approaches in cultural studies that are vital in today's cultural context, especially in Central European universities, the Irish language and culture, and contemporary cultural phenomena inspired by the growing ubiquity of technological intrusions into various fields of cultural production.

The Crosslinguistic Study of Language Acquisition Dan Isaac Slobin, 2022-03-01 Extending the tradition of this series, which has become a standard reference work in language acquisition, this volume contains chapters on seven more languages, including a section on ergative languages. Languages in this volume include: Georgian; Greenlandic; K'iche Mayan; Warlpiri; Mandarin; Scandinavian and Sesotho.

Pāli Workbook Lynne Martineau, 2000-01-01

The View from Building 20 Kenneth Locke Hale, Samuel Jay Keyser, 1993 These seven original essays commissioned in tribute to MIT Philosophy Professor Sylvain Bromberger present some of the most exciting research being conducted today in linguistics. Each essay is informed by Bromberger's ongoing inquiry into how we come to know that there are things in the world that we don't know. Included in the collection is the edited version of Noam Chomsky's minimalist paper.

*Pronouns and Clitics in Early Language* Pilar Larranaga, Pedro Guijarro-Fuentes, 2012-08-31 Traditional grammars have stated that clitics are subject or object pronouns whose distributional features make them different from personal pronouns. This book focuses on the acquisition of personal and demonstrative pronouns as well as clitics with respect to determinative phrases in a variety of languages of the Romance family and several indigenous languages, such as Quechua. A particularly original aspect of the present volume is that it not only addresses syntactic issues, but also semantic and pragmatic questions that have been widely neglected in the literature. It also reports on acquisition data of languages, such as Quechua, which

have not attracted the attention of researchers until very recently.

**The Uralic Languages** Daniel Abondolo, Riitta-Liisa Valijärvi, 2023-03-31 The Uralic Languages, second edition, is a reference book which brings together detailed discussions of the historical development and specialized linguistic structures and features of the languages in the Uralic family. The Uralic languages are spoken today in a vast geographical area stretching from Dalarna County in Sweden to Dudinka, Taimyr, Russia. There are currently approximately 50 languages in the group, the largest one among them being the state languages Finnish, Estonian, and Hungarian; other Uralic languages covered in the book are South Saami, Skolt Saami, Võro, Moksha Mordvin, Mari, Udmurt, Zyrian Komi, Mansi, Khanty, Nganasan, Forest and Tundra Enets, Nenets, and Selkup. The book also contains a chapter on Finnic languages, the reconstruction of Uralic, the history of Uralic studies, connections of Uralic to other language families, and language names, demographics, and degrees of endangerment. This second and thoroughly revised edition updates and augments the authoritative accounts of the first edition and reflects recent and ongoing developments in linguistics and the languages themselves, as well as our further enhanced understanding of the relations and patterns of influence between them. Each chapter combines modern linguistic analysis and documentary linguistics; a relatively uniform structure allows for easy typological comparison between the individual languages. Written by an international team of experts, The Uralic Languages will be invaluable to students and researchers within linguistics, folklore, and Siberian studies.

 dynamic mechanical properties refer to  
 the response of a material as it is  
 subjected to a periodic force these  
 properties may be expressed in terms

of a dynamic modulus a dynamic loss  
 modulus and a mechanical damping  
 term typical values of dynamic moduli
