**The English Language in the Digital Age** Georg Rehm, Hans Uszkoreit, 2012-07-05 This white paper is part of a series that promotes knowledge about language technology and its potential. It addresses educators, journalists, politicians, language communities and others. The availability and use of language technology in Europe varies between languages. Consequently, the actions that are required to further support research and development of language technologies also differ for each language. The required actions depend on many factors, such as the complexity of a given language and the size of its community. META-NET, a Network of Excellence funded by the European Commission, has conducted an analysis of current language resources and technologies. This analysis focused on the 23 official European languages as well as other important national and regional languages in Europe. The results of this analysis suggest that there are many significant research gaps for each language. A more detailed expert analysis and assessment of the current situation will help maximise the impact of additional research and minimize any risks. META-NET consists of 54 research centres from 33 countries that are working with stakeholders from commercial businesses, government agencies, industry, research organisations, software companies, technology providers and European universities. Together, they are creating a common technology vision while developing a strategic research agenda that shows how language technology applications can address any research gaps by 2020.

*Language Education in Multilingual Colombia* Norbella Miranda, Anne-Marie de Mejía, Silvia Valencia Giraldo, 2022-08-04 This collection brings together cutting-edge research and theoretical discussions on the linguistic, cultural, and political forces that shape multilingual Colombia, highlighting the country's unique sociolinguistic landscape and offering new insights into multilingualism in the Global South. The volume outlines the changing dynamics of multilingualism in Colombia, where Spanish, Spanish-based and English-based Creoles, the linguistic and cultural heritages of Indigenous communities and migrant groups, and the prevalence of English in language education policy intersect. The chapters explore the implications of policy making on language policy discourse and especially on language teacher education for those working on the margins in urban and rural areas. They also explore existing understandings of interculturality and the work of academics and local communities in minority language revitalization efforts. Problematizing essentialized views of language

and culture and raising awareness around the complex relationship between language, identity, and interculturality in the Global South, this book will be of interest to scholars in multilingualism, sociolinguistics, language education, teacher education, and applied linguistics.

*Turkey and EU Integration* Çigdem Nas,Yonca Özer,2017-05-18 What has been achieved regarding Turkey's efforts at integration to the EU and what obstacles remain to it achieving full membership? Like other developing countries, Turkey displays visible signs of advancement with rapid increases in living standards, greater mobility and the rapid spread of technology. Much of its legislation and political, economic and administrative systems are also now aligned to the EU and this process has undoubtedly contributed to democratization and modernization. At the same time problems in politics and society persist; the Gezi protests, limitations of freedom of expression, frequent occupational accidents in the mining and construction sectors, honour killings and political upheaval which has manifested itself most starkly with the recent coup attempt all call attention to the challenges facing a country in the process of change. Charting the political, legal and economic relations between Turkey and the European Union since 1959 this book explores the relationship through phases such as association, customs union and candidacy. Each chapter covers a particular period in the relations and/or a theme which has both current and overall relevance to the conduct of the relations. In this way, the authors examine the impact of the EU in affecting change, what has been achieved and the obstacles that remain.
