**Climatic and Environmental Threats to Cultural Heritage** Robyn Sloggett, Marcelle Scott, 2022-11-04 Climatic and Environmental Threats to Cultural Heritage examines the challenges that environmental change, both sudden and long-term, poses to the preservation of cultural material. Acknowledging the diversity of human cultural heritage across collecting institutions, heritage sites and communities, the book highlights how, in Australia, Southeast Asia and the Pacific, the quest to preserve such precious knowledge relies on records and narratives being available to inform decisions now and into the future. Bringing together a diverse range of stakeholders who have an interest in – and responsibility for – the care of cultural heritage material and places of cultural heritage value, the book explores their thinking on and actions in relation to issues of climate change and environmental risk. Sloggett and Scott highlight the stakeholders' shared interest in drawing on their expertise to meet the challenges that environmental change brings to the future of our cultural heritage and our cultural identity. Based on the understanding that this global challenge requires local, national and international co-operation, the book also considers how local knowledge can have international application. Climatic and Environmental Threats to Cultural Heritage will be of interest to those engaged in the study of heritage, conservation, archaeology, archives, anthropology, climate change and the environment. It will also be useful to practitioners and others attempting to understand the effect of environmental change on cultural heritage around the globe.

**Terra 2022** Leslie Rainer, Luis Fernando Guerrero Baca, Frank Matero, Lauren Meyer, 2025-04-22 Featuring a global compendium of sites, buildings, urban settlements, and cultural landscapes, this volume combines recent research with practical approaches to conservation of earthen architectural heritage. Earthen architecture is one of the oldest forms of construction and is evidenced around the globe. This volume gathers the research and presentations from Terra 2022: 13th World Congress on Earthen Architectural Heritage, which brought together in Santa Fe, New Mexico, 350 conservation professionals and practitioners from fifty-two countries. Seventy richly illustrated papers, fifty-seven in English and thirteen in Spanish, address a range of conservation issues. Abstracts are provided in both English and Spanish for each paper. Themes covered include advances in research, strategies for archaeological sites, community-based care and decision-making, cultural landscapes, decorated surfaces, education, historic and modern buildings, conservation history, risks and vulnerabilities, and traditional materials and practices. Sections that draw on symposia held at the congress spotlight two

recent architectural heritage initiatives: the rehabilitation of an urban settlement by the AlUla Old Town and Oasis Conservation Project in Saudi Arabia, and the conservation and management of eight monumental enclosure complexes at the Hopewell Ceremonial Earthworks in Ohio.

*The Palgrave Handbook on Art Crime* Saskia Hufnagel, Duncan Chappell, 2019-06-27 This handbook showcases studies on art theft, fraud and forgeries, cultural heritage offences and related legal and ethical challenges. It has been authored by prominent scholars, practitioners and journalists in the field and includes both overviews of particular art crime issues as well as regional and national case studies. It is one of the first scholarly books in the current art crime literature that can be utilised as an immediate authoritative reference source or teaching tool. It also includes a bibliographic guide to the current literature across interdisciplinary boundaries. Apart from legal, criminological, archeological and historical perspectives on theft, fraud and looting, this volume contains chapters on iconoclasm and graffiti, underwater cultural heritage, the trade in human remains and the trade, theft and forgery of papyri. The book thereby hopes to encourage scholars from a wider variety of disciplines to contribute their valuable knowledge to art crime research.

**Transforming Biology** Juliet Flesch, 2015-04-01 Transforming Biology opens a window on the lives and work of the scientists, teachers and students who have contributed to the achievements of the Department of Biochemistry and Molecular Biology at the University of Melbourne. Established in 1938, the department teaches and undertakes research in a discipline that links chemistry, physiology, genetics, microbiology, virology and physics, and has championed new techniques and biotechnology innovations that reverberate around the world. Highlighting the successful careers of many of its alumni and staff, including the influential Victor Trikojus, and the impact of benefactors such as Russell Grimwade, Juliet Flesch tells the story of the evolution of a department engaged in fundamental biomolecular science, as well as the translation of discoveries to industry and the clinic. It has been one of the most important national and international bodies engaged in transforming biology.

*Research Handbook on Art and Law* Jani McCutcheon, Fiona McGaughey, 2020-01-31 Featuring international contributions from leading and emerging scholars, this innovative Research Handbook presents a panoramic view of how law sees visual art, and how visual art sees law. It resists the conventional approach to art and law as inherently dissonant – one a discipline preoccupied with rationality, certainty and objectivity; the other a creative enterprise ensconced in the imaginary and inviting multiple, unique and subjective interpretations. Blending these two distinct disciplines, this unique Research Handbook bridges the gap between art and law.

*Preserving Aboriginal Heritage, Technical and Traditional Approaches* Carole Dignard, 2008 In September 2007, the Canadian Conservation Institute hosted an international symposium Preserving Aboriginal Heritage: Technical and Traditional Approaches. The goal of the symposium was to provide an opportunity for Aboriginal people and conservation

Australia has benefited from the visits of almost a hundred international academics and thought leaders under the auspices of the Miegunyah Distinguished Visiting Fellows program. The University's cultural collections have been enriched by the extraordinary treasures of the Grimwade collections, encompassing significant works of art as well as rare books and items of Australian history. Russell Grimwade's passion for chemistry, appreciation of art, and sense of obligation to preserve the past for future generations is given tangible form through the Miegunyah Fund Committee's long-standing support of the University's Centre for Cultural Materials Conservation. Almost forty years later, the vision and generosity of the Grimwade philanthropy remains one of the University of Melbourne's most significant gifts.
