**Medicinal Plants and their Bioactive Compounds in Human Health: Volume 1** Mohammad Azam Ansari,Shoaib Shoaib,Najmul Islam,2024-10-18 This book delves into the vital role of plants and their bioactive compounds in human health, emphasizing their medicinal and nutritional significance. It highlights the growing concern of drug resistance in anticancer and antimicrobial medications, compelling clinicians, and researchers worldwide to seek alternative solutions. Plants offer a diverse array of compounds, serving as a promising resource for novel and safe drug candidates and potentially enhancing drug efficacy while being easily metabolized in the human body. Their cost-effectiveness, safety profile, and minimal side effects make them an ideal source for developing new drug regimens. The book aims to attract students, teachers, and researchers across various disciplines, covering topics such as biochemistry, pharmacology, botany, medicinal chemistry, virology, nutrition, clinical biochemistry, and biomedicine. The book will explore the medicinal and nutritional importance of plants and their products, showcasing their applications in medicine, industries, cosmetics, therapeutics, and preventive measures.

*Medicinal Foods* UCHECHUKWU ANASTASIA UTOH-NEDOSA,Toxicology, Faculty of Pharmaceutical,2022-03-14 This book on medicinal foods is an essential reading material in this era when more people are including plant materials, which they call veggies, in their diets to obtain micronutrients. Knowledge of medicinal foods will enable a person to eat food to promote good health and prevent disease. Knowledge of medicinal foods will also help a person to use food for the adjunct dietary management of some health disorders.

**Seeds: Anti-proliferative Storehouse for Bioactive Secondary Metabolites** Dilipkumar Pal,2024-08-31 This book presents extensive and up-to-date information on the anti-proliferative properties of various plant seeds for their application in pharmaceutical industry and medicinal research. This information is imperative for understanding and developing high quality products from the seeds. The book provides insights about anticancer and antitumour activities present in seeds. Different chapters cover the traditional knowledge as well as recent innovations in various seeds, such as prune, pumpkin, grape fruit, sesame, sunflower, bitter gourd, papaya, mango, apple, black plum, cumin, water melon, musk melon, cotton, carambola, pear, cardamon, moringa, wallich, Chinese cabbage, pistachio, etc. and their bioactivities for the applications in cancer and malignancy proliferation. The book introduces the readers to seed as a bioactive compound, and delineates the various health effects. It further explains the relation between the different metabolites and their effect on cell proliferation. Finally the book goes on to explain different seeds and their specific anti-cancer properties. This book is useful for students and researchers of pharmacology, botany and cancer research. It also caters to industry experts in pharmaceutical sciences.

**Emerging Sustainable Aquaculture Innovations in Africa** Ndakalimwe Naftal Gabriel,Edosa Omoregie,Kenneth Prudence Abasubong,2023-05-11 This edited book presents the emerging sustainable innovations in all areas of aquaculture in Africa with a view to create an opportunity whereby scientific outputs and recommendations can be endorsed for improved aquaculture outputs towards poverty alleviation and food security on the continent. Food insecurity and poverty are some of the challenges faced on the African continent. These challenges are further exacerbated by the growing human population and the impacts of climate change. Today, aquaculture has become one of the fastest food producing sectors in the world, with the potential to contribute significantly to food security and poverty alleviation in developing countries. In Africa,

aquaculture is at an infant stage, however, many African countries have recognized the potential roles of aquaculture in food security, poverty alleviation and conservation of aquatic resources through their commitment to achieve the United Nation Sustainable Development Goals. The book reviews and synthesizes research work from these thematic areas across Africa and provide a unique perspective on the emerging aquaculture innovations and illustrate how aquaculture practices could be feasible and cost effective while promoting social and environmental sustainability. The book also draws from global discussions on sustainable aquaculture practices and provides recommendations on what is feasible for Africa. This book is a great tool for the university students, scholars, aquaculture farmers, investors, and policymakers to understand the scientific based sustainable aquaculture innovations from an African perspective. This book is focused on SDG 2 and SDG 14.

**Herbal Medicine Phytochemistry** Sylvester Chibueze Izah, Matthew Chidozie Ogwu, Muhammad Akram, 2024-07-09

This book offers a comprehensive perspective of herbal medicine phytochemistry and explores the application of plant extracts as bioactive compounds in disease prevention and treatment in modern or traditional medicine. The book starts with an introduction to the history and value of herbal medicine, followed by 3 parts covering the main phytochemical components and metabolites in herbal medicine, different uses and practices in herbal medicine, including a region-wise analysis of methods and practices and an overview of regulations and policies for herbal medicinal practitioners, and the advances and challenges in quality assessment of herbal medicine. Plants generally have the tendency to bioaccumulate trace metals from the environment and they are easily contaminated by microorganisms from water sources and poor hygiene practices of the herbalist. Quality assessment and assurance is, thus, a pertinent challenge in herbal medicine practice (i.e., in remedy formulation and application), and this book offers an authoritative perspective on this topic, covering aspects such as quality control strategies, preparation techniques, chemical quantification in phytomedicine, and the efficacy and safety of herbal remedies. Moreover, in this book, readers will find valuable insights into the latest trends and developments in the field, and a critical review of the application of medicinal plants to treat cardiovascular, digestive, respiratory neurological and reproductive diseases. Particular attention is given to the advances and trends in the field, and readers will learn about the latest biotechnological approaches, the use of nanotechnology in herbal medicine, metabolomic analysis of medicinal plants, big data application in herbal medicine, and the value of herbal medicine towards sustainability. Given its breadth, this book is aimed at researchers, academics, practitioners and professionals working in the fields of natural, life, health, clinical, and biomedical sciences, and interested in herbal remedies, pharmacology, pharmacognosy, human nutrition and dietetics, plant biology, and biotechnology/microbiology.

Resources Use Efficiency in Agriculture Sandeep Kumar, Ram Swaroop Meena, Manoj Kumar Jhariya, 2020-09-18

Achieving zero hunger and food security is a top priority in the United Nations Development Goals (UNDGs). In an era characterized by high population growth and increasing pressure on agricultural systems, efficiency in the use of natural resources has become central to sustainable agricultural practices. Fundamentally speaking, eco-efficiency is about maximizing agricultural outputs, in terms of quantity and quality, using less land, water, nutrients, energy, labor, or capital. The concept of eco-efficiency involves both the ecological and economic aspects of sustainable agriculture. It is therefore essential to understand the interaction of ecosystem constituents within the extensive agricultural landscape, as well as farmers' economic needs. This book examines the latest eco-efficient practices used in agro-systems. Drawing upon research and examples from around the world, it offers an up-to-date overview, together with insights into directly applicable approaches for poly-cropping systems and landscape-scale management to improve the stability of agricultural production systems, helping achieve food security. The book will be of interest to educators, researchers, climate change scientists, capacity builders and policymakers alike. It can also be used as additional reading material for undergraduate and graduate courses on agriculture, forestry, soil science, and the environmental sciences.
