Public Gardens of Michigan Miriam Easton Rutz, 2002 Vast industrial fortunes allowed tycoons such as Henry Ford, Edsel and Eleanor Ford, and Charles Stewart Mott to build immense estates with beautifully structured gardens that are now public spaces. A commitment to green space, as evidenced by Michigan State University's land grant mission and horticulture/landscape architecture emphasis, also contributed to Michigan's unusual and enchanting beauty..

Higher Education - Reflections From the Field - Volume 1 ,2023-11-02 COVID wrought havoc on the world's economic systems. Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems. Some institutions were prepared for the required transition to online learning. Most were not. Whether prepared or not, educators rose to the challenge. The innovativeness of educators met the challenges as digital learning replaced the face-to-face environment. In fact, some of the distance models proved so engaging that many students no longer desire a return to the face-to-face model. As with all transitions, some things were lost while others were gained. This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century. The book is organized into four sections on 'The Perspectives of Higher Education', 'COVID as a Catalyst for Change', 'Embracing Online Learning as a Response to COVID', and 'Post Covid: The Way Forward'. It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process. These discussions shed light on the impact of the pandemic and the future of higher education post-COVID. Higher education has been forever changed, and higher education as it once was may never return. While many questions arise, the achievements in meeting and

overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic.

Women in Landscape Architecture Louise A. Mazingo, Linda Jewell, 2011-12-22 While many fields struggle to specify feminine contributions, the work of women has always played a fundamental role in American landscape architecture. Women claim responsibility for many landscape types now taken for granted, including community gardens, playgrounds, and streetscapes. This collection of essays by leaders in the discipline addresses the ways that gender has influenced the history, design practice and perception of landscapes. It highlights women's relation to landscape architecture, presents the professional efforts of women in the landscape realm, examines both the perception and experience of landscapes by women, and speculates on ways to re-imagine gender and the landscape.
