Fundamentals of Herbal Medicine Kofi Busia, 2016-11-10 This book consists of cutting-edge materials drawn from diverse, authoritative sources, which are sequentially arranged into a multipurpose, one-stop shop, user-friendly text. It is divided into four parts as follows: part 1: historical overview of some indigenous medical systems, an outline of the basic concepts of pharmacognosy, ethnopharmacology, common analytical methods for isolating and characterising phytochemicals, and the different methods for evaluating the quality, purity, and biological and pharmacological activities of plant extracts part 2: phytochemistry and mode of action of major plant metabolites part 3: systems-based phytotherapeutics, discussion on how the dysfunction of the main systems of the human body can be treated with herbal remedies part 4: 153 monographs of some medicinal plants commonly used around the world, including 63 on African medicinal plants. This book therefore demonstrates the scrupulous intellectual nature of herbalism, depicting it as a scientific discipline in its own right.

Migraine. Review of 600 methods of healing without drugs. Non-drug ways to treat and relieve headaches. Oleg Nashchubskiy, In a world where every step is accompanied by stress, and the noise of the city haunts you, migraine is becoming an increasingly common ailment, darkening the lives of millions of people. This book is not just a book, but your guide to the world of alternative medicine, opening the doors to the world of pain-free existence. To a world where everyone can find their own path to healing. This unique publication brings together centuries of knowledge and the latest discoveries, offering natural, safe methods to combat migraines. From medicinal herbs and plants provided by nature itself, to hydrotherapy, restorative aquatic environments; from sound therapy that transports you into a world of harmony and calm, to the ancient practices of acupuncture and acupressure that open up new paths to pain relief. We dive into nutrition, supplements, and diets, exploring how dietary changes may be the key to reducing the frequency and intensity of migraine attacks. Let's look at how physical exercise and activity, incorporated into daily life, can strengthen the body and spirit, reducing susceptibility to stress and, as a result, to migraines. Meditation and relaxation techniques will open you up to a world of inner peace where headaches have no power. Lifestyle changes, breathing techniques, massage and many other methods will offer you tools for self-regulation and self-healing. This book is a comprehensive resource that includes not only traditional but also innovative approaches such as light therapy, color therapy, heat therapy, and a variety of psychotherapeutic and psychological treatments. She offers a comprehensive view of migraine, emphasizing the importance

of an integrative approach to treatment, combining the best of alternative and conventional medicine. Zootherapy, magnetic therapy, energy therapy, oxygen therapy are just some of the unique techniques presented in the book. Each page will open up new horizons and opportunities for you to achieve health without the use of medications, offering alternative ways to achieve harmony of body and spirit. The tips, methods and clear techniques provided in the book will help you find an individual method of curing migraines, or at least significantly relieving headaches. The book is your faithful companion on the path to freedom from pain, which gives hope and support to everyone who strives to live a full life and look for their own personal method of combating migraines and possible complete healing. Together we will find the path to health, because not everyone can benefit from standard medications that can be purchased at the pharmacy, and thanks to alternative methods we have hundreds of additional chances to find the joy of life in every manifestation without headaches and migraines.

The 9th Annual International Seminar on Trends in Science and Science Education (AISTSSE) 2022, 2023-10-04 This is the ninth time we are hosting this seminar and we are proud to inform you that this seminar is an annual event in our calendar and has been held every year since 2014. This year, for the third year, we are holding it via Zoom meeting (online meeting) due to Covid-19 pandemic. We are inviting internationally recognized speakers from several countries to share their latest discoveries in the fields of Biology, Chemistry, Physics, Mathematics and Science Education. Well-known researchers in science and science education will share their experiences and knowledge so that we can stay up-to-date with the latest

information. This is one of the goals of this seminar. As science researchers, we realize the importance of information exchange among us. The new information enlightens our minds and gives us ideas on what to do next in our research and how to do it. This new information often becomes the foundation for our next project in particular and sets the research trends for the upcoming year in general. Information exchange also keeps us updated, allowing us to give and receive suggestions and critiques that will lead to better results. Therefore, we need a forum where we can share and exchange information. Seminars, conferences, and other scientific gatherings are the media through which we can do this.
