**The Girl from Gladden Street** Jeannette McDonald,2009-01-12 Sometimes, life plays little jokes. For Jeannette McDonald, growing up in a small town in West Virginia in the 1950s, life had three particular jokes in mind: naming her after a famous movie star, giving her a birthday just after Valentines Day, and letting her grow up on a street named Gladdena place as far from glad as Jeannette was from being a movie star. Growing up is supposed to be a time of wonder and joy. For the girl on Gladden Street, the wonder was in discovering that when life plays jokes, anything is possible if you keep a healthy attitude. Ms. McDonald relates that some of lifes harshest realities can lead to new awakenings and a better life. Peppered with a series of brief, episodic, coming-of-age vignettes that illustrate Ms. McDonalds life and much of the American landscape of the 1950s, *The Girl from Gladden Street* provides a reminder that some of our most valuable lessons come from events experienced during the most impressionable times of life.

**The Psychophysical Ear** Alexandra Hui,2012-11-16 An examination of how the scientific study of sound sensation became increasingly intertwined with musical aesthetics in nineteenth-century Germany and Austria. In the middle of the nineteenth century, German and Austrian concertgoers began to hear new rhythms and harmonies as non-Western musical ensembles began to make their way to European cities and classical music introduced new compositional trends. At the same time, leading physicists, physiologists, and psychologists were preoccupied with understanding the sensory perception of sound from a psychophysical perspective, seeking a direct and measurable relationship between physical stimulation and physical sensation. These scientists incorporated specific sounds into their experiments—the musical sounds listened to by upper middle class, liberal Germans and Austrians. In *The Psychophysical Ear*, Alexandra Hui examines this formative historical moment, when the worlds of natural science and music coalesced around the psychophysics of sound sensation, and new musical aesthetics were interwoven with new conceptions of sound and hearing. Hui, a historian and a classically trained musician, describes the network of scientists, musicians, music critics, musicologists, and composers involved in this redefinition of listening. She identifies a source of tension for the psychophysicists: the seeming irreconcilability between the idealist, universalizing goals of their science and the increasingly undeniable historical and cultural contingency of musical

aesthetics. The convergence of the respective projects of the psychophysical study of sound sensation and the aesthetics of music was, however, fleeting. By the beginning of the twentieth century, with the professionalization of such fields as experimental psychology and ethnomusicology and the proliferation of new and different kinds of music, the aesthetic dimension of psychophysics began to disappear.

The Great War rages overseas, and the whole of Europe, Africa, and western Asia is falling to the Central Powers. To win a war that must be won, Teddy Roosevelt, once again the American president, turns to his top secret Black Chamber organization--and its cunning and deadly spy, Luz O'Malley Aróstegui.
