Neuroscience and Legal Responsibility Nicole A Vincent, 2013-03-07 Adopting a broadly compatibilist approach, this volume's authors argue that the behavioral and mind sciences do not threaten the moral foundations of legal responsibility. Rather, these sciences provide fresh insight into human agency and updated criteria as well as powerful diagnostic and intervention tools for assessing and altering minds.

The Trouble with Principle Stanley Fish, 2001-03-02 Stanley Fish is an equal opportunity antagonist. A theorist who has taken on theorists, an academician who has riled the academy, a legal scholar and political pundit who has ruffled feathers left and right, Fish here turns with customary gusto to the trouble with principle. Specifically, Fish has a quarrel with neutral principles. The trouble? They operate by sacrificing everything people care about to their own purity. And they are deployed with equal highmindedness and equally absurd results by liberals and conservatives alike. In this bracing book, Fish argues

that there is no realm of higher order impartiality--no neutral or fair territory on which to stake a claim--and that those who invoke one are always making a rhetorical and political gesture. In the end, it is history and context, the very substance against which a purportedly abstract principle defines itself, that determines a principle's content and power. In the course of making this argument, Fish takes up questions about academic freedom and hate speech, affirmative action and multiculturalism, the boundaries between church and state, and much more. Sparing no one, he shows how our notions of intellectual and religious liberty--cherished by those at both ends of the political spectrum--are artifacts of the very partisan politics they supposedly transcend. *The Trouble with Principle* offers a provocative challenge to the debates of our day that no intellectually honest citizen can afford to ignore.

The Humanities and the Civic Imagination James Frank Veninga,1999 For those who believe that the humanities in America are in trouble, suffering from over-specialization and never-ending intramural conflicts, this collection of addresses and essays provides much needed hope. Since the early 1970s, state humanities councils, working under a Congressional mandate, have developed important models of how the study of history, literature, and culture can be infused into the public life of the nation. Often countering trends that have dominated the humanities on campus, state councils, drawing upon the energies and resources of volunteer boards, professional staff, and public-minded scholars, have demonstrated through thousands of public programs--documentary films, conferences, readings and discussions, public issues forums, interpretive exhibits, oral histories, lectures, discussions, and workshops--that the humanities retain the capacity to help foster a communal vision that can revitalize the public life of the nation.
