*Parc de la Villette* Collin Mickey, 2013

*Bernard Tschumi: Parc de la Villette* Samantha Hardingham, Kester Rattenbury, 2012 This title addresses the groundbreaking public space with art installations. Supported by an extensive illustrated section, this innovative text is an invaluable resource for any architecture student and an inspiring record of this fascinating project.

*Parc de la Villette* Bernard Tschumi, Jacques Derrida, Anthony Vidler, 2014 Tschumi Parc de la Villette is the first publication to document comprehensively Bernard Tschumi's first, and arguably still most celebrated project. With new and republished writing including a text by Bernard Tschumi and Anthony Vidler's Trick-Track originally published in 1986, alongside a newly-commissioned essay assessing the Parc from a contemporary and historical perspective, this book documents Parc de la Villette from its conception, through the 30 years of its existence, to the present. Tschumi Parc de la Villette includes drawings, concept sketches, models and photographs showing the development of the Parc over three decades, brought together in a single volume for the first time since the 1980s. One of the Grands Projets commissioned by the French Government in the 1980s, Parc de la Villette set a benchmark for urban parks in the latter part of the twentieth century and into the twenty-first. Tschumi constructed a series of follies across the site, creating what he called the largest discontinuous building in the world. Published to coincide with the 30th anniversary of the Parc, Tschumi Parc de la Villette broadly celebrates the project, and particularly the way in which it has been embraced by generations of Parisians and a diverse international public.

*Constructing Gardens, Cultivating the City* Amanda Shoaf Vincent, 2023-05-16 Constructing Gardens, Cultivating the City is the first cultural history of major new parks developed in Paris in the late twentieth century, as part of the city's program of adaptive reuse of industrial spaces. Thanks to laws that gave the city more political autonomy, Paris's local government launched a campaign of park creation in the late 1970s that continued to the turn of the millennium. The parks in this book represent this campaign and illustrate different facets of their cultural and historical context. Archival research, interviews, and analyses of the parks reveal how postmodern debates about urban planning, the historic city, public space, and nature's presence in an urban setting influenced their designs. In sum, the city adopted the garden as a model for public parks,

investing in complex, richly symbolic and representational spaces. These parks were intended to represent contemporary twists on traditional designs and serve local residents as much as they would contribute to Paris's role as a world city. The parks' development process often included points of conflict, pointing to differing views on what Parisian space should represent and fundamental contradictions between the characteristics of public space and the garden as it is traditionally defined. These parks demonstrate the ongoing cultivation of the city over time, in which transformed sites not only fulfil new functions but also engage with history and their surroundings to create new meaning. They stand for landscape as a form of signifying cultural production that directly engages with other art forms and ways of knowing. Just as the Luxembourg Gardens, the Tuileries, and the Buttes-Chaumont parks exemplify their eras' cultural dynamics, such parks as the Jardin Atlantique, Parc André-Citroën, and the Jardin des Halles express contemporary French culture within the archetypal space of their era, the city. Finally, they point the way to current trends in landscape architecture, such as citizen gardening and ecological initiatives.

Architecture and Spectacle Gevork Hartoonian, 2012 Focusing on six leading contemporary architects: Peter Eisenman, Frank Gehry, Bernard Tschumi, Zaha Hadid, Rem Koolhaas and Steven Holl, this book puts forward a unique and insightful analysis of neo-avant-garde architecture. It discusses the spectacle and excess which permeates contemporary architecture in reference to the present aesthetic tendency for image making, but does so by applying the tectonic of theatricality discussed by the nineteenth-century German architect Gottfried Semper. In doing so, it breaks new ground by opening up a dialogue between the study of the past and the design of the present.

**Architectural Drawings as Investigating Devices** Marianna Charitonidou, 2023-07-10 Architectural Drawings as Investigating Devices explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived. The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and 21st centuries. It traces their transformations, paying special attention to Le Corbusier and Ludwig Mies van der Rohe's preference for perspective representation, to the diagrams of Team 10 architects, to the critiques of functionalism, and the upgrade of the artefactual value of architectural drawings in Aldo Rossi, John Hejduk, Peter Eisenman, and Oswald Mathias Ungers, and, finally, to the reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture (OMA). Particular emphasis is placed on the spirit of truth and clarity in modernist architecture, the relationship between the individual and the community in post-war era architecture, the decodification of design process as syntactic analogy and the paradigm of autonomy in the 1970s and 1980s architecture, the concern about the dynamic character of urban conditions and the potentialities hidden in architectural programme in the post-autonomy era. This book is based on extensive archival research in Canada, the USA and Europe, and will be of interest to architects, artists, researchers and students in

architecture, architectural history, theory, cultural theory, philosophy and aesthetics.

Architecture Competitions and the Production of Culture, Quality and Knowledge Jean-Pierre Chupin, Carmela Cucuzzella, Bechara Helal, 2015-01-26 [Winner of the 2016 Bronze medal in Architecture, Independent Publisher Book Awards] This book comprises a series of 22 case studies by renowned experts and new scholars in the field of architecture competition research. In 2015, it constitutes the most comprehensive survey of the dynamics behind the definition, organization, judging, archiving and publishing of architectural, landscape and urban design competitions in the world. These richly documented contributions revolve around a few questions that can be summarized in a two-fold critical interrogation: How can design competitions - these historical democratic devices, both praised and dreaded by designers - be considered laboratories for the production of environmental design quality, and, ultimately, for the renewing of culture and knowledge? Includes 340 illustrations, bibliographical references and index of over 200 cited competitions. Keywords: Architecture / International competitions / Architectural judgment / Design thinking / Digital archiving (databases) / Architectural publications / Architectural experimentation / Landscape architecture / Urban studies

*Space as Storyteller* Laura Chiesa, 2016-07-15 Walter Benjamin's Arcades Project suggests that space can become a storyteller: if so, plenty of fleeting stories can be read in the space of modernity, where repetition and the unexpected cross-pollinate. In *Space as Storyteller*, Laura Chiesa explores several stories across a wide range of time that narrate spatial jumps, from Benjamin's tangential take on the cityscape, the experimentalism of Futurist theatricality, the multiple and potential atlases narrated by Italo Calvino and Georges Perec, and the posturban thought and practice of Bernard Tschumi and Rem Koolhaas/OMA. *Space as Storyteller* diverts attention from isolated disciplines and historical or geographical contexts toward transdisciplinary encounters that mobilize the potential to invent new spaces of comparison, a potential the author describes as architecturability.

*Montage and the Metropolis* Martino Stierli, 2018-01-01 Montage has been hailed as one of the key structural principles of modernity, yet its importance to the history of modern thought about cities and their architecture has never been adequately explored. In this groundbreaking new work, Martino Stierli charts the history of montage in late 19th-century urban and architectural contexts, its application by the early 20th-century avant-gardes, and its eventual appropriation in the postmodern period. With chapters focusing on photomontage, the film theories of Sergei Eisenstein, Mies van der Rohe's spatial experiments, and Rem Koolhaas's use of literary montage in his seminal manifesto *Delirious New York* (1978), Stierli demonstrates the centrality of montage in modern explorations of space, and in conceiving and representing the contemporary city. Beautifully illustrated, this interdisciplinary book looks at architecture, photography, film, literature, and visual culture, featuring works by artists and architects including Mies, Koolhaas, Paul Citroen, George Grosz, Hannah Höch,

El Lissitzky, and Le Corbusier.
