Phenomena Annie Jacobsen, 2017-03-28 The definitive history of the military's decades-long investigation into mental powers and phenomena, from the author of Pulitzer Prize finalist *The Pentagon's Brain* and international bestseller *Area 51*. This is a book about a team of scientists and psychics with top secret clearances. For more than forty years, the U.S. government has researched extrasensory perception, using it in attempts to locate hostages, fugitives, secret bases, and downed fighter jets, to divine other nations' secrets, and even to predict future threats to national security. The intelligence agencies and military services involved include CIA, DIA, NSA, DEA, the Navy, Air Force, and Army—and even the Joint Chiefs of Staff. Now, for the first time, New York Times bestselling author Annie Jacobsen tells the story of these radical, controversial programs, using never before seen declassified documents as well as exclusive interviews with, and unprecedented access to, more than fifty of the individuals involved. Speaking on the record, many for the first time, are former CIA and Defense Department scientists, analysts, and program managers, as well as the government psychics themselves. Who did the U.S. government hire for these top secret programs, and how do they explain their military and intelligence work? How do scientists approach such enigmatic subject matter? What interested the government in these supposed powers and does the research continue? *Phenomena* is a riveting investigation into how far governments will go in the name of national security.

Nuclear War Annie Jacobsen, 2024-03-26 The INSTANT New York Times bestseller Instant Los Angeles Times bestseller Finalist, Dayton Literary Peace Prize One of NPR's Books We Love One of Newsweek Staffers' Favorite Books of the Year Shortlisted for the Baillie Gifford Prize “In *Nuclear War: A Scenario*, Annie Jacobsen gives us a vivid picture of what could happen if our nuclear guardians fail...Terrifying.”—Wall Street Journal There is only one scenario other than an asteroid strike that could end the world as we know it in a matter of hours: nuclear war. And one of the triggers for that war would be a nuclear missile inbound toward the United States. Every generation, a journalist has looked deep into the heart of the nuclear military establishment: the technologies, the safeguards, the plans, and the risks. These investigations are vital to how we understand the world we really live in—where one nuclear missile will beget one in return, and where the choreography of the world's end requires massive decisions made on seconds' notice with information that is only as good as the intelligence we have. Pulitzer Prize finalist Annie Jacobsen's *Nuclear War: A Scenario* explores this ticking-clock scenario,

based on dozens of exclusive new interviews with military and civilian experts who have built the weapons, have been privy to the response plans, and have been responsible for those decisions should they have needed to be made. *Nuclear War: A Scenario* examines the handful of minutes after a nuclear missile launch. It is essential reading, and unlike any other book in its depth and urgency.

First Platoon Annie Jacobsen, 2021-01-12 A powerful story of war in our time, of love of country, the experience of tragedy, and a platoon at the center of it all. This is a story that starts off close and goes very big. The initial part of the story might sound familiar at first: it is about a platoon of mostly nineteen-year-old boys sent to Afghanistan, and an experience that ends abruptly in catastrophe. Their part of the story folds into the next: inexorably linked to those soldiers and never comprehensively reported before is the U.S. Department of Defense's quest to build the world's most powerful biometrics database, with the ability to identify, monitor, catalog, and police people all over the world. *First Platoon* is an American saga that illuminates a transformation of society made possible by this new technology. Part war story, part legal drama, it is about identity in the age of identification. About humanity—physical bravery, trauma, PTSD, a yearning to do right and good—in the age of biometrics, which reduce people to iris scans, fingerprint scans, voice patterning, detection by odor, gait, and more. And about the power of point of view in a burgeoning surveillance state. Based on hundreds of formerly classified documents, FOIA requests, and exclusive interviews, *First Platoon* is an investigative exposé by a master chronicler of government secrets. *First Platoon* reveals a post-9/11 Pentagon whose identification machines have grown more capable than the humans who must make sense of them. A Pentagon so powerful it can cover up its own internal mistakes in pursuit of endless wars. And a people at its mercy, in its last moments before a fundamental change so complete it might be impossible to take back.

Biological War Annie Jacobsen, 2026-07-30

Operation Paperclip Annie Jacobsen, 2014-02-11 The “remarkable” story of America's secret post-WWII science programs (The Boston Globe), from the New York Times bestselling author of *Area 51*. In the chaos following World War II, the U.S. government faced many difficult decisions, including what to do with the Third Reich's scientific minds. These were the brains behind the Nazis' once-indomitable war machine. So began Operation Paperclip, a decades-long, covert project to bring Hitler's scientists and their families to the United States. Many of these men were accused of war crimes, and others had stood trial at Nuremberg; one was convicted of mass murder and slavery. They were also directly responsible for major advances in rocketry, medical treatments, and the U.S. space program. Was Operation Paperclip a moral outrage, or did it help America win the Cold War? Drawing on exclusive interviews with dozens of Paperclip family members, colleagues, and interrogators, and with access to German archival documents (including previously unseen papers made available by direct descendants of the Third Reich's ranking members), files obtained through the Freedom of Information Act, and dossiers

discovered in government archives and at Harvard University, Annie Jacobsen follows more than a dozen German scientists through their postwar lives and into a startling, complex, nefarious, and jealously guarded government secret of the twentieth century. In this definitive, controversial look at one of America's most strategic, and disturbing, government programs, Jacobsen shows just how dark government can get in the name of national security. Harrowing...How Dr. Strangelove came to America and thrived, told in graphic detail. —Kirkus Reviews

The Pentagon's Brain Annie Jacobsen, 2015-09-15 Discover the definitive history of DARPA, the Defense Advanced Research Project Agency, in this Pulitzer Prize finalist from the author of the New York Times bestseller *Area 51*. No one has ever written the history of the Defense Department's most secret, most powerful, and most controversial military science R&D agency. In the first-ever history about the organization, New York Times bestselling author Annie Jacobsen draws on inside sources, exclusive interviews, private documents, and declassified memos to paint a picture of DARPA, or the Pentagon's brain, from its Cold War inception in 1958 to the present. This is the book on DARPA -- a compelling narrative about this clandestine intersection of science and the American military and the often frightening results.

The Pentagon's Brain Annie Jacobsen, 2015-09-25 From the bestselling author of *Nuclear War: A Scenario*. Discover the untold story of America's most powerful military science agency. In this first-ever history of the Defense Department's most secret, most powerful and most controversial military science R&D agency, Sunday Times bestselling author Annie Jacobsen draws on inside sources, exclusive interviews, private documents, and declassified memos to demystify DARPA, 'the Pentagon's brain'. Since its Cold War inception in 1958, DARPA's innovations have shaped the modern world – from its role in the development of the Internet and GPS to stealth technology. Yet, the agency's cutting-edge projects remain cloaked in secrecy, often outpacing public domain advancements by decades. In this groundbreaking account, Jacobsen uncovers DARPA's hidden history, triumphs and controversies, exploring its role in pioneering technologies that redefine warfare and society as it questions the wisdom of allowing DARPA to determine what lies ahead.

Area 51 Annie Jacobsen, 2011-05-17 This compellingly hard-hitting bestseller from a Pulitzer Prize finalist gives readers the complete untold story of the top-secret military base for the first time (New York Times). It is the most famous military installation in the world. And it doesn't exist. Located a mere seventy-five miles outside of Las Vegas in Nevada's desert, the base has never been acknowledged by the U.S. government — but Area 51 has captivated imaginations for decades. Myths and hypotheses about Area 51 have long abounded, thanks to the intense secrecy enveloping it. Some claim it is home to aliens, underground tunnel systems, and nuclear facilities. Others believe that the lunar landing itself was filmed there. The prevalence of these rumors stems from the fact that no credible insider has ever divulged the truth about his time inside the base. Until now. Annie Jacobsen had exclusive access to nineteen men who served the base proudly and secretly for decades and are now aged 75-92, and unprecedented access to fifty-five additional military and intelligence personnel, scientists,

pilots, and engineers linked to the secret base, thirty-two of whom lived and worked there for extended periods. In *Area 51*, Jacobsen shows us what has really gone on in the Nevada desert, from testing nuclear weapons to building super-secret, supersonic jets to pursuing the War on Terror. This is the first book based on interviews with eye witnesses to Area 51 history, which makes it the seminal work on the subject. Filled with formerly classified information that has never been accurately decoded for the public, *Area 51* weaves the mysterious activities of the top-secret base into a gripping narrative, showing that facts are often more fantastic than fiction, especially when the distinction is almost impossible to make.

Surprise, Kill, Vanish Annie Jacobsen, 2019-05-14 From Pulitzer Prize finalist Annie Jacobsen, the untold USA Today bestselling story of the CIA's secret paramilitary units. Surprise . . . your target. Kill . . . your enemy. Vanish . . . without a trace. When diplomacy fails, and war is unwise, the president calls on the CIA's Special Activities Division, a highly-classified branch of the CIA and the most effective, black operations force in the world. Originally known as the president's guerrilla warfare corps, SAD conducts risky and ruthless operations that have evolved over time to defend America from its enemies. Almost every American president since World War II has asked the CIA to conduct sabotage, subversion and, yes, assassination. With unprecedented access to forty-two men and women who proudly and secretly worked on CIA covert operations from the dawn of the Cold War to the present day, along with declassified documents and deep historical research, Pulitzer Prize finalist Annie Jacobsen unveils -- like never before -- a complex world of individuals working in treacherous environments populated with killers, connivers, and saboteurs. Despite Hollywood notions of off-book operations and external secret hires, covert action is actually one piece in a colossal foreign policy machine. Written with the pacing of a thriller, *Surprise, Kill, Vanish* brings to vivid life the sheer pandemonium and chaos, as well as the unforgettable human will to survive and the intellectual challenge of not giving up hope that define paramilitary and intelligence work. Jacobsen's exclusive interviews -- with members of the CIA's Senior Intelligence Service (equivalent to the Pentagon's generals), its counterterrorism chiefs, targeting officers, and Special Activities Division's Ground Branch operators who conduct today's close-quarters killing operations around the world -- reveal, for the first time, the enormity of this shocking, controversial, and morally complex terrain. Is the CIA's paramilitary army America's weaponized strength, or a liability to its principled standing in the world? Every operation reported in this book, however unsettling, is legal.

UFOs Karl Svozil, 2023-08-01 Unidentified phenomena in space, in the Earth's atmosphere, and in waters are too important to leave their exploration to the military and scientific laypersons. Their proper scientific study is important for a variety of reasons; in particular, scientists and the public at large need to know the basic facts, to be informed about the way evidence is recorded, and to understand the difference between reliable evidence and fiction, as well as between plausible explanations and fantasy. With this objective, the book surveys the history of UFO observations, the variety of recorded phenomena, and recounts the efforts of investigative commissions and their published findings. Although wild rumors are

demystified in the process, this is not an exercise in rumor-bashing. An open and at the same time critical mindset is the key. Many narratives and hypothesis appear implausible relative to our present state of knowledge; but this alone should not lead to their outright exclusion. Thus the author also pays attention to UFO sightings that have so far eluded explanation in terms of known physics or meteorology. Here the reader will encounter some of the more speculative but scientifically tenable proposals, for example, relating to sudden zigzag motion without apparent inertia or recognizable propulsion, yet always with a clear guide to their plausibility. Last but not least, the book outlines plans and suggestions for future research capable of revealing the existence and intentions of extraterrestrial intelligences, outer-space engineers, or technologies so far known only from science fiction.

Summary of Annie Jacobsen's Operation Paperclip Everest Media,2022-04-16T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 Operation Alsos was a top secret mission that was an offshoot of the Manhattan Project. It was tasked with tracking down and capturing German scientists who were believed to be working on atomic, biological, or chemical warfare. #2 Goudsmit and his team read the documents, and found out that the University of Strasbourg had been doubling as a biological warfare research base for the Third Reich. They also found out that the Nazis were conducting human medical experiments. #3 In December 1944, a party was under way at a medieval showpiece called Varlar Castle in Germany. The castle was being readied for a celebration. On this night, the banquet hall was decorated in full Nazi Party regalia. #4 The V-2 rocket was the most advanced flying weapon ever created. It was 46 feet long, and could travel a distance of 190 miles at speeds up to five times the speed of sound. Its earlier version, the V-1 flying bomb, had been raining terror down on cities across northern Europe since the first one hit London in 1944.

American Cosmic D.W. Pasulka,2019-01-23 More than half of American adults and more than seventy-five percent of young Americans believe in intelligent extraterrestrial life. This level of belief rivals that of belief in God. In *American Cosmic*, D.W. Pasulka examines the mechanisms that foster a thriving belief in extraterrestrial life. Her work takes her from Silicon Valley to the Vatican Secret Archive and reveals how media has supplanted religion as a cultural authority that offers believers answers about non-human intelligent life.

Annie Jacobsen's Area 51 Book Scandal Rob McConnell, Kal Karlton Korff, 2020-09-28 While there are many books which have been written about the purported Roswell UFO crash of 1947, there are NONE like this! This is the DEFINITIVE EXPOSE of Annie Jacobsen's false claims about Roswell as made in her famed Area 51 book. In 2011, former Los Angeles Times Editor Annie Jacobsen shocked the publishing world with her book Area 51: An Uncensored History of America's Top Secret Military Base. Although it was a Number #1 bestseller, arguably it rose to this spot specifically because of a lie that it promoted as possibly having any credibility at all. This was Annie Jacobsen's sensational and PROVABLY FALSE claim of both Nazi and Russian Communist involvement in, of all things, the Roswell UFO crash of 1947. You can't make this up. According to Jacobsen (via her trusted source, a man who is exposed and shown in this book) Nazi Holocaust Angel of Death mastermind Dr. Joseph Mengele helped Russian Soviet Communist dictator Joseph Stalin after World War II ended by surgically altering human children so they resembled aliens. These 'altered children' were then put into a special captured Nazi era Horton brothers Batwing type aircraft, secretly flown to the USA, where they crashed in the New Mexico desert. Arguably, these assertions which are outright loopy. Jacobsen might as well also say that Mengele cured cancer, that Mengele was the first man to land on the Moon, or that it was Joseph Mengele who really murdered President John F. Kennedy because he was bored after having just invented gravity - it would be just as factual. We must not allow journalists who profess to report the truth, to get away with spreading myths and even worse, outright lies - especially falsehoods about history and human suffering; even more so where it concerns the sanctity of the tragedy of the Holocaust, which was the attempted systematic extermination of the entire Jewish people. Roswell has no place in the real history of the Holocaust anymore than a black hole in outer space does. Annie Jacobsen's claims via her trusted source belong in the same steaming pile of untruth like other fringe, extremist CONspiracy fake news and false history boasts also do. REAL History, Matters - period! UFOlogy or UFOlogy is part of the Real History Matters Series of books which are dedicated to investigating controversial subjects such as JFK's assassination, and others. Each book is focused on a single case and/or issue, and SOLVES IT. Please don't take our word for it. feel free to verify the claims yourself!

Sample Book Insights: #1 On March 1, 1954, a group of American scientists entered a time when a machine they had created could trigger the end of the world. The most powerful bomb in the history of the world was about to be detonated just nineteen miles away. No human being had ever before been this close to the kind of power this bomb was expected to deliver. #2 The men on the USNS Ainsworth heard O'Keefe's voice loud and clear outside, standing beside Freedman. These were the physicists who had designed and built the bomb. They were here to witness the results of their engineered creation. #3 The Teller-Ulam scheme meant that the hydrogen bomb was designed to hold itself together for an extra hundred-millionth of a second, allowing its hydrogen isotopes to fuse and create a chain reaction of

nuclear energy, called fusion, producing a potentially infinite amount of power. #4 The scientists were shocked by the size of the explosion. The mushroom cloud was forty miles wide, and the fallout was headed in an easterly direction, directly for Enyu Island.
