Introduction to Business Patrice Flynn, 2019-11-27 Do we need yet another textbook on business fundamentals when every publishing house has stacks of such books ready for sale? No, we do not need another standard textbook. What we need is a new kind of teaching tool that at once accommodates the modern-day classroom and exposes new century students to the contemporary world of global capitalism in which today's businesses operate. In primer form, Dr. Patrice Flynn clarifies the functional areas of business, a term used to describe what every businessperson needs to understand to be

successful, from entrepreneurship to small business development, legal structure, going global, finance, big data, marketing, management, and more. This primer demonstrates how a master teacher teaches new century students, thus giving supremacy to pedagogy along with rigorous content. The primer can be used with both business students and the growing number of nonbusiness students interested in learning how business works before entering the world of work. Every student will come away not only with a sense of the business areas that pique their interest but also with a deeper understanding of business from which to craft next career steps.

Introduction to Business Raymond E. Glos, 1967

Introduction to Business Julian E. Gaspar, 2006 This text stands apart from other entries in the market for its ability to make the fundamentals of business understandable, functional, and relevant to students with little or no business background. The authors believe the key to unlocking Introduction to Business for novice students lies in their unique, engaging pedagogy based on consistency, active learning, and currency. Gaspar et al., is the first cross-functionally authored text in the marketplace. Each author--a recognized authority in his field--brings his own expertise to the course while keeping the discussion focused and concise for introductory level students. The text presents a balanced and consistent voice across each of the unique content areas, enabling students to quickly gain an understanding of concepts, practices, and relationships across businesses without unnecessary or disjointed narrative. Recognizing that contemporary business, regardless of where it is conducted, will be heavily influenced by rapid globalization, advances in technology, and enforcement of ethical standards, the authors focus on these three hot button themes--Global Business, Technology and Business, and Ethics in Business--throughout the text. In addition, the strategies and operations of three major companies--DaimlerChrysler, McDonald's, and Sony--reflecting three dynamic regions of the world, i.e., Europe, North America, and Asia respectively, are also spotlighted throughout the text. Each chapter includes at least one case featuring one of these companies and how it has responded to or been influenced by the theme of that chapter. The use of consistent examples for these case studies is intended to heighten student interest and underscore the relevancy of the themes in each chapter. A variety of tools to keep the text current including a faculty newsletter providing frequent updates, case updates through the student and faculty websites, and links to recent articles in the news will be available. Learning Objectives are listed at the opening of each chapter, repeated again at the beginning of each major section of the chapter, and again in the end-of-chapter

summary. Chapter Opening Vignettes introduce concepts in a brief story. Within the chapter, reference is made to the vignette to connect the opening story to chapter content. Reality Check questions follow the learning objectives in each chapter-encouraging the reader to consider how that section's learning objective relates to real life. Key Terms appear in bold type and are defined clearly and concisely. They are also listed in an end-of-book Glossary. Case in Point Boxes examine the strategies and operations of three major global companies-DaimlerChrysler, McDonald's, and Sony-and how they related to chapter topics. Each company represents a dynamic region of the world, Europe, North America, and Asia, respectively. Questions accompany each box to encourage critical thinking, and the continuous, integrated coverage allows students to see how companies are both interrelated and relevant. Theme Boxes help students see how the key themes of the text, Global Business, Technology and Business, and Ethics in Business, are relevant to the specific topic of each chapter. These boxes spotlight a variety of large and small companies and are accompanied by questions. Portfolio Projects in every chapter ask students to complete a variety of projects such as developing a plan for opening a business, or selecting a real business to research, track, and analyze throughout the course. These projects can be assigned individually or as group work, and help students understand and apply what they are learning to their own lives. Career Opportunities specific to a given chapter's theme are provided before the summary of each chapter. These inform students about the various job possibilities that are g
