De la deconstrucción a la confección de lo humano Oscar Nicasio Lagunes López,Mauricio Urrea

Castillo,2020-10-02 En la historia de la humanidad siempre ha habido épocas en las que se dan grandes cambios. La nuestra es una de esas: hoy día, hay una crisis del hombre. Tanto es así, que es pertinente hablar del intento de una deconstrucción humana y de una posterior confección de aquello que nos constituye como personas. Si del hombre ya no queda nada, como creyó Foucault, o si está condenado a decidir de sí lo que quiera ser, como se dice de Sartre, entonces tendríamos que aceptar que no hay naturaleza humana y una ley natural, y quedarían los derechos humanos sometidos al arbitrio humano, sin fundamento objetivo. Ésta es la consecuencia inevitable de lo que se ha denominado ideología de género: una doctrina cultural, con implementación política e intereses económicos de fondo, que niega la naturaleza humana y la correspondencia

entre identidad sexual y sexo biológico. En este libro se discuten los principales problemas que afectan a la sociedad y al hombre actual. En sus quince capítulos, el libro presenta una problematización de temas de máxima actualidad desde diferentes disciplinas y campos de conocimiento, con la intención de cubrir, de la manera más idónea, un asunto de gran complejidad. Con toda seriedad y profundidad, sus autores, reconocidos especialistas de talla nacional e internacional, desarrollan tópicos que versan sobre la naturaleza humana como fundamento de los derechos humanos; el uso político de la posverdad en las sociedades actuales; la tensión, provocada, de sexo contra género; la necesidad de una nueva antropología de la sexualidad humana; la superación del posfeminismo de género; la ideología de género y los falsos derechos humanos; los derechos humanos en la era de la globalización; la eutanasia y el aborto; la singularidad del hombre y el inicio de la vida humana; el transhumanismo o la deconstrucción biotecnológica de la naturaleza humana; el varón y la mujer desde la antropología cristiana; y la aspiración religiosa del ser humano como anhelo metafísico. El libro termina con el actualísimo tema de los cristianos frente al problema de la corrupción en las iglesias y la sociedad, desde una perspectiva histórica. La intención es, pues, ayudar a que todos pensemos, por cuenta propia, en un tema que a todos nos implica; impidiendo así que nos opinen al respecto los poderes de la sociedad, que lucran con la temática.

Invitación a la Biología. Helena Curtis, 2006 Esta nueva edición ha adquirido nuevos recursos didácticos, conservando a su vez el estilo tan querido por los lectores de Invitación. Cada capítulo comienza con una frase que incita al lector a reflexionar sobre los aspectos más relevantes que se desarrollan en el texto. A lo largo del libro, se han incorporado recuadros que profundizan sobre algunos de los temas mencionados en el texto; estos recuadros pueden leerse en forma independiente. En la mayoría de los capítulos se incluyeron, como en ediciones anteriores, ensayos cortos sobre diversos temas relacionados directa o indirectamente con los conceptos desarrollados. En estos ensayos, el lector encontrará debates actuales sobre problemáticas científicas que, en ocasiones, tienen un alcance social. También se discuten aspectos de la historia de la Biología, entre otros temas de interés general. Cada capítulo finaliza con una situación problemática cuyo objetivo es poner a prueba los conocimientos adquiridos por el lector en el correspondiente capítulo. También se ha actualizado la representación gráfica de los procesos y estructuras descritos a lo largo del texto. Se han renovado además, muchas de las fotografías originales, agregando nuevas o reemplazando imágenes existentes por otras que ilustran los nuevos contenidos. A lo largo del libro, se ha privilegiado un ordenamiento lógico, que permite construir los conceptos en forma paulatina, en la medida en que ciertos temas sientan la base para otros. Pero de alguna manera, la historia de las ideas siempre está presente a lo largo de los capítulos, demostrando una y otra vez que la Biología, como toda una ciencia, no es un producto acabado. A la hora de seleccionar los temas a incorporar en esta nueva edición, se ha tenido en cuenta su relevancia, su capacidad de ilustrar principios biológicos básicos y su importancia como parte necesaria de la cultura general de un ciudadano. También se ha considerado el atractivo inherente que tienen esos temas. Pero sobre todo, se ha tratado de

sentar cimientos firmes sobre los cuales el lector pueda construir su conocimiento biológico. El eje principal de este libro sigue siendo, como lo fue desde sus comienzos, la evolución que es el eje alrededor del cual se estructura toda la Biología. En torno a ese eje, se organizan la Introducción y las ocho Secciones de este libro.
