*Managing Projects, Managing People* David Parker, David William Parker, Michael A. Craig, 2008 With so many organisations using projects to implement change, and easy-to-use computer packages greatly reducing the mechanistic aspects of project planning, project managers now require more highly developed leadership skills than even before. *Managing Projects, Managing People* draws on theoretical aspects of managing and mitigating risks, motivational and leadership theory and excellent communication to provide the reader with the skills required for project management in today's business environment. In addition to the theoretical foundations, attention is given to PRINCE (Projects IN Controlled Environments) that supports and frames the application of projects to ensure conformance, compliance, adequate reporting procedures, due diligence and communication to all stakeholders. *Managing Projects, Managing People* takes a nontraditional approach to project management and is designed to facilitate the reader's understanding of the principles of managing a project. The book addresses most types of project, but particular emphasis is given to the non-manufacturing sector and, especially, the services sector. Chapters contain examples and relevant case studies to further demonstrate and support the foundations and skills addressed throughout. For academics prescribing this text, a comprehensive instructor's manual and power point presentations are provided on CD.

*Risk and Financial Management in Construction* Simon A. Burtonshaw-Gunn, 2009 The book covers Risk Management describing the tools and methods to reduce the occurrence and consequences of risk, and the financial management of construction projects from raising funding, to contract strategy and through to estimating, budgeting and cost control. It includes a chapter covering international project risk, bringing together the issues of risk management, prime contracting, and PFI funding for construction projects undertaken away from the contractors main home market.

**Bid Writing for Project Managers** David Cleden, 2011 When do commercial projects go wrong? Conventional management texts only tackle the issues that arise between project startup and closure. Yet some of the worst problems (e.g. unrealistic objectives, faulty assumptions, poorly understood constraints) are 'programmed in' at conception when the bid is written, long before the project manager is brought on board at project startup. If the bid is misconceived, no amount of clever project management is going to recover the situation. Involving the designated project manager at the bidding stage is becoming the norm in many commercial organisations. Some go one step better, making the project manager the bid

manager where he or she is thus able to direct all aspects of the project's conception. This is the essence of planning for project success in the bidding stage, the main theme of this book. But many project managers are unfamiliar with the pitfalls of competitive bidding and don't know how to balance the competing demands of a compelling sales messages with a realistic delivery plan. Bid Writing for Project Managers will guide prospective project managers through the bid-writing lifecycle, providing comprehensive guidelines and numerous tips on how to craft a winning bid and how to set the project up with the best possible chance of success.
