*Discurso de los métodos de la filosofía y la fenomenología realista* Josef Seifert,2011-09-01 Este Discurso de los métodos es, en efecto, un discurso de los métodos, y no de un Discurso del método, como el célebre de Descartes, porque la tesis principal que en él se defiende es que ni la palabra «método» se dice en un único sentido ni cada una de sus acepciones cobija una única clase de método. Cuando se aplica a la investigación filosófica, «método» significa primordialmente el conocimiento mismo que utiliza la filosofía. Pero la palabra mienta también, secundariamente, aquellos elementos de que constan los actos cognoscitivos propios de la filosofía y aun los procedimientos especiales de que se sirve el filósofo para obtener nuevos saberes. Por eso, los tres capítulos de esta obra versan respectivamente sobre los tipos de conocimiento filosófico, los modos concretos en que se verifica dicho conocimiento y los recursos de que puede echar mano el filósofo para conocer. Es este, en verdad, un tratado sobre los métodos de la filosofía, pero también, y de modo especial, sobre los métodos de la «fenomenología realista». A juicio del pensador austriaco, la fenomenología realista no es una mera escuela más dentro del amplio movimiento fenomenológico, sino que constituye su parte más importante. A ella --y desde luego a la obra del propio Seifert-- debemos uno de los intentos más sólidos de fundamentar sobre nuevas bases la metafísica clásica y de refutar el subjetivismo de toda laya que es propio de gran parte de la filosofía moderna.

**La Filosofía y el Psicoanálisis** , Para poner en contexto al lector sobre este libro, me gustaría poder hablarles sobre los por qué y para qué de su creación, todo comenzó en el año de 2014 cuando comencé a impartir un seminario sobre filosofía para psicólogos en algunas universidades de México, me di cuenta en ese momento que durante la formación de los psicólogos no se tiene más que dieciséis clases en los cuatro años de estudio para poder problematizar los recorridos de los pensadores de la antigua Grecia, o de los pensadores renacentistas o los grandes ilustres que como bien sabemos son la base para explicar los conocimientos teóricos o científicos en nuestra actualidad.
