**Applying the Roper-Logan-Tierney Model in Practice** Jane Jenkins, BA MSc SRN RNT, Jackie Solomon, MA, PGDip, SRN, Sue Whittam, Karen Holland, 2008-06-03 This title is directed primarily towards health care professionals outside of the United States. Applying the RLT Model in Practice has been written to enable students and their teachers in both Higher Education and clinical practice to explore the different dimensions of the model through a variety of case studies and exercises. The case studies can be viewed as 'triggers' for student problem-solving skills in using the Model. Many of the exercises are aimed at enabling readers to find evidence to support nursing activities. The authors have incorporated an international perspective throughout the text. Based on the most popular model used in general nursing care throughout the world Explicitly demonstrates how the RLT model can be used to assess, plan, deliver and evaluate individualised nursing care Applies the RLT model in the context of today's health services and links it to clinical governance and the multi-disciplinary context of care Uses a problem solving approach with extensive use of exercises and case studies Attractive two-colour design using boxes, tables and summaries Fully updated throughout in line with changes in practice, developments in the evidence base, changes in the NHS e.g. modern matrons, Modernisation Agency etc More material on how to apply the model in an inter disciplinary context Updated infection control section More on discharge planning More material relating to primary care

**The Roper-Logan-Tierney Model of Nursing** Nancy Roper, Winifred W. Logan, Alison J. Tierney, 2000 This book provides the definitive account of the Roper-Logan-Tierney model of nursing, including in-depth discussion of its conceptual development, its place within the wider body of nursing theory and a critique of its application in practice. The book concludes with a wider discussion of the place of this model for nursing in the face of ongoing challenges in both nursing and health care throughout the world.

*Applying the Roper-Logan-Tierney Model in Practice - E-Book* Karen Holland, Jane Jenkins, 2025-11-28 The Roper-Logan-Tierney Model of Nursing (RLT model) supports nurses in taking a holistic approach to care by considering how an illness or injury affects an individual's psychological, social, economic and spiritual life. The RLT model has become synonymous with nursing practice and education and is widely used in health care worldwide. This important textbook supports students in applying the RLT model in real life. It covers how to assess the 12 Activities of Living that impact patients' lives and health,

and then plan, implement and evaluate appropriate care according to the latest evidence and within the current health care context. This new fourth edition has been comprehensively updated to align with NMC standards and is packed full of learning activities that will appeal to student nurses, nurse associates and nurse educators alike. - Comprehensively updated to reflect latest evidence and emerging health issues - Explains the theory underpinning the RLT Model and how to apply this in practice - 'Many books in one' - explores and explains aspects of the unique model from physiology to social policy to genetics and cultural issues - Aligned to the requirements of the NMC proficiencies for nurses - Addresses the needs of nurse associate students - Learning is supported by case studies in each chapter plus a range of learning activities including reflection, reading and critical analysis - Links to government policies and reports for students to extend their knowledge - Important issues of nursing and health care are placed in the context of wider issues that impact health - Online resources include a range of images - Introduces and links the topic of nursing - A stronger focus on the role of supervisors and assessors as qualified nurses in supporting student learning to care for patients in practice - Introduces graduate skills and expectations for those obtaining their degree level award alongside their professional award of RN - Support for student nurse associates in their journey in completing their proficiencies - All evidence and references updated - New content reflects global issues such as the health impact of climate change, the ageing population and COVID 19 - New appendices for learning and teaching to support practice supervisors

The Roper, Logan and Tierney Model in Action Charleen Newton, 1991-11-11 Human physiological and psychosocial behaviour essential to maintain life underpins Roper et al's activities of living model. Examples of these activities are breathing, eating, personal cleansing, learning, working, playing. Originating in Britain, the model stresses continual patient assessment, facilitation of the patient's normal activities of living and individualised care.

*Autism in Nursing and Healthcare* Christopher Barber, 2025-06-03 Understand the healthcare needs of autistic patients with this essential volume Autism is a condition that directly affects as many as 2 million people in the United Kingdom, a figure which does not include family members and other loved ones. As most nurses, healthcare assistants, and other healthcare professionals will engage with autistic patients or service users at numerous points in their careers, the Health and Care Act 2022 requires healthcare professionals to be given autism training appropriate to their role. There is an urgent need for a publication which directly addresses this new training requirement and fulfills the learning needs of workers across the healthcare sector and beyond. *Autism in Nursing and Healthcare* offers a solid grounding in the issues relevant to the care and support of autistic people. Viewing autism as a lifelong condition, this book offers chapters covering the full lifespan of the autistic person, with information on the role of nurses in both community and hospital settings. Appropriate for both formal and informal carers, it's an indispensable resource for anyone with direct or indirect experience of autism.

Chapters on welfare benefits, sexuality, and discrimination against autistic people Detailed discussion of the 2009 Autism Act and related strategies Practical intervention strategies throughout Autism in Nursing and Healthcare is ideal for pre-registration nursing students from all four nursing branches, those in post-registration professional development sessions, Nursing Associates and Healthcare Assistants, as well as those who work with autistic people (either as patients or colleagues) looking to better understand autism.
