What is this thing called The Meaning of Life? Stewart Goetz, Joshua W. Seachris, 2020-04-06 What are we asking when we ask, What is the meaning of life?? Can there be meaning without God? Is a happy life a meaningful life? Can an immoral life be meaningful? Does our suffering have meaning? Does death threaten meaning? What is this thing called The Meaning of Life? provides an engaging and stimulating introduction to philosophical thinking about life's meaning. Goetz and Seachris provide the reader with accessible examples, before looking at the main theoretical approaches to meaning and key philosophers associated with them. Topics covered include: What does the question, What is the meaning of life?, even mean? Does life have a purpose? What is valuable? Do we matter? Does life (or my life) make any sense? Is there any meaning in suffering? Does death threaten meaning? Would immortality be good or bad news for us? With boxed summaries of key concepts and noteworthy examples, discussion questions, and suggestions for further reading included within each chapter, this book is the ideal introduction to life's meaning for philosophy students coming to the subject for the first time.

Walker Percy and the Crisis of Meaning Justin N. Bonanno, 2023-08-12 In this book, Justin N. Bonanno builds off of the recent philosophical work on Walker Percy's writings. While it is valuable to appreciate Percy as a novelist, Bonanno approaches Percy from the perspective of Continental philosophy and the rhetorical tradition. Unpacking the works of several key authors that influenced Percy (e.g. Sartre and Heidegger), Bonanno offers a fresh philosophical account of Percy's ideas concerning the relationship between symbols and existence. In particular, he focuses on how Percy's ideas emerge from the thought of Ernst Cassirer, Susanne Langer, Jacques Maritain, Jean-Paul Sartre, Gabriel Marcel, Martin Heidegger, Viktor Shklovsky, Søren Kierkegaard, and St. Thomas Aquinas.

The Mystical in Wittgenstein's Early Writings James R. Atkinson, 2009-03-23 The aim of this book is to consider what reasonably follows from the hypothesis that the *Tractatus Logico-Philosophicus* can be interpreted from a mystical point of view. Atkinson intends to elucidate Wittgenstein's thoughts on the mystical in his early writings as they pertain to a number of topics such as, God, the meaning of life, reality, the eternal and the solipsistic self.

Philosophy of Childhood Today Brock Bahler, David Kennedy, 2016-10-28 Although philosophy of childhood has always played some part in philosophical discourse, its emergence as a field of postmodern theory follows the rise, in the late nineteenth century, of psychoanalysis, for which childhood is a key signifier. Then in the mid-twentieth century Philippe Aries's

seminal *Centuries of Childhood* introduced the master-concept of childhood as a social and cultural invention, thereby weakening the strong grip of biological metaphors on imagining childhood. Today, while philosophy of childhood per se is a relatively boundaryless field of inquiry, it is one that has clear distinctions from history, anthropology, sociology, and even psychology of childhood. This volume of essays, which represents the work of a diverse, international set of scholars, explores the shapes and boundaries of the emergent field, and the possibilities for mediating encounters between its multiple sectors, including history of philosophy, philosophy of education, pedagogy, literature and film, psychoanalysis, family studies, developmental theory, ethics, history of subjectivity, history of culture, and evolutionary theory. The result is an engaging introduction to philosophy of childhood for those unfamiliar with this area of scholarship, and a timely compendium and resource for those for whom it is a new disciplinary articulation.

Husserl and the A Priori Daniele De Santis, 2021-06-09 This book presents a systematic discussion of the development of Husserl's concept of the a priori from his early and through his later writings. The chapters contained herein analyze the different phases and aspects of Husserl's phenomenology of the a priori in light of his twofold notion of reason, construed as both ontological and transcendental. Starting from the assessment of the introduction of the notion of a priori knowledge in the context of the *Logical Investigations*, this text uniquely explores its development during the Göttingen years. It is at this time during his work on *The Crisis of European Sciences*, that Husserl comes to see the a priori as a criterion to interpret the history of philosophy, notably, modern philosophy. This book sheds light upon such concepts as: essence and eidos; ideation, eidetic attitude and eidetic reduction; as well as formal and material, innate and contingent a priori. The author argues that the a priori becomes for Husserl the expression of an ontological form of rationality, i.e., the rationality immanent to being. This book appeals to students and researchers working on Husserl and phenomenology.

**Wittgenstein's Moral Thought** Reshef Agam-Segal, Edmund Dain, 2017-10-19 Wittgenstein's work, early and later, contains the seeds of an original and important rethinking of moral or ethical thought that has, so far, yet to be fully appreciated. The ten essays in this collection, all specially commissioned for this volume, are united in the claim that Wittgenstein's thought has much to contribute to our understanding of this fundamental area of philosophy and of our lives. They take up a variety of different perspectives on this aspect of Wittgenstein's work, and explore the significance of Wittgenstein's moral thought throughout his work, from the *Tractatus Logico-Philosophicus*, and Wittgenstein's startling claim there that there can be no ethical propositions, to the *Philosophical Investigations*.

Understanding is a chapter-by-chapter rebuttal by Gottfried Leibniz of John Locke's major work, *An Essay Concerning Human Understanding*. It was finished in 1704 but Locke's death was the cause alleged by Leibniz to withhold its publication. The book appeared some sixty years later. Like many philosophical works of the time, it is written in dialogue form. The two speakers in the book are Theophilus, who represents the views of Leibniz, and Philalethes, who represents those of Locke. The famous rebuttal to the empiricist thesis about the provenance of ideas appears at the beginning of Book II: Nothing is in the mind without being first in the senses, except for the mind itself. All of Locke's major arguments against innate ideas are criticized at length by Leibniz, who defends an extreme view of innate cognition, according to which all thoughts and actions of the soul are innate. In addition to his discussion of innate ideas, Leibniz offers penetrating critiques of Locke's views on personal identity, free will, mind-body dualism, language, necessary truth, and Locke's attempted proof of the existence of God.

A Picture Held Us Captive Tea Lobo, 2019-05-20 While there are publications on Wittgenstein's interest in Dostoevsky's novels and the recurring mentions of Wittgenstein in Sebald's works, there has been no systematic scholarship on the relation between perception (such as showing and pictures) and the problem of an adequate presentation of interiority (such as intentions or pain) for these three thinkers. This relation is important in Wittgenstein's treatment of the subject and in his private language argument, but it is also an often overlooked motif in both Dostoevsky's and Sebald's works. Dostoevsky's depiction of mindset discrepancies in a rapidly modernizing Russia can be analyzed in terms of multi-aspectivity. The theatricality of his characters demonstrates especially well Wittgenstein's account of interiority's interrelatedness with overt public practices and codes. In Sebald's *Austerlitz*, Wittgenstein's notion of family resemblances is an aesthetic strategy within the novel. Visual tropes are most obviously present in Sebald's use of photography, and can partially be read as an ethical-aesthetic imperative of rendering pain visible. Tea Lobo's book contributes towards a non-Cartesian account of literary presentations of inner life based on Wittgenstein's thought.
