

What Is An Ngo Definition

M Lipman

Non-Governmental Organisations in International Law Anna-Karin Lindblom, 2005 Even when governments have no democratic basis, they are regarded as the sole representatives of their populations on the international plane and take important decisions on their behalf. It is therefore important that other voices can be heard in international fora alongside governments. NGOs have an increasingly important legal and political role and use several different avenues for their work, such as lodging cases before international courts and other bodies and participating in international meetings and conferences. This book explores these possibilities for the participation of NGOs in international law.

Handbook of Research on NGOs Aynsley Kellow, Hannah Murphy-Gregory, 2018-09-28 This volume provides a critical overview of research on Non-governmental Organisations (NGOs). While it notes that the definition of NGOs is contested, and can include both business and national groups, it focuses primarily on international NGOs engaged with human rights, social and environmental concerns, and aid and development issues. With contributions by Peter Willetts, Tom Davies, Bob Reinalda and other leading scholars, it provides a series of critical essays on both general aspects of NGOs and significant issues of particular concern.

NGOs in Foreign Policy Andreas Werner, 2016 NGOs are seen as important actors of international relations and foreign policy by many scholars. However, such a perspective has rarely been empirically examined. This book therefore takes a look at the access granted to NGOs by the state to the planning and decision-making processes in foreign and security policy. By applying the theoretical concept of security governance, the author takes a look at frameworks such as the German Action Plan Civil Crisis Prevention, the Coordination Committee Humanitarian Aid, the Dutch PSD Network and the National Action Plan 1325. In conclusion, a comparison between Germany and the Netherlands reveals where NGOs can gain more access to foreign security policy. It eventually enables the author to argue how big or small the role of these non-state actors really is and what consequences this implies for both the empirical and theoretical side of foreign policy. Andreas Werner, M.A., studied Political Science, International Relations, Philosophy as well as Peace and Conflict Studies at the University of Marburg and at the Mount Allison University, Canada. He successfully defended his PhD thesis at the University of Münster in 2015. He currently works as a research associate at the German Police University.

Israeli-Palestinian Negotiations in the 1990s: How NGOs Facilitated the Peace Process Tilman Pradt, 2012-08 Non-

governmental organisations (NGOs) have become important actors in the globalised world. They run aid and relief programmes in the poorest countries, support international institutions (like the United Nations), or are watchdogs of them (for example watchdogs of the Bretton Woods institutions). In doing so, NGOs naturally work permanently with state-agencies and it is probably hard to find an NGO which is totally free of any governmental support (in financial, logistical or informative matters). Thus, there are strong NGO-government connections on a daily-work basis. NGOs run multiple attempts to contribute to the resolution of conflicts on all political levels. They bring together people on the grass-root level, they try to influence high officials through public pressure and they organise conferences and discussions with members and consultants of the concerned parties. The latter approach is analysed in this study. But how do NGOs influence the level of official international relations? To which degree can NGOs improve the relations of two conflicted parties, especially when the conflict is protracted and severe? The aim of this book is to define the preconditions of successful NGO mediation, to measure the NGO influence as an 'antecedent condition' for successful mediation, and to exhibit its limits. The underlying assumption is that conflict resolution is more likely if NGO mediation supports this attempt. This approach can be labelled as an 'assumption of constant effect' since the focus is on understanding the NGOs influence on international conflict resolution.

NGO-Diplomacy - Manager Diplomat Dominik Naab, 2012-07-20 Seminar paper from the year 2010 in the subject Politics - Topic: International Organisations, Sciences Po Paris, Dijon, Nancy, Poitiers, Menton, Havre, language: English, abstract: The realistic point of view that international relations are only ruled by states is definitely passé. The states are no longer a black box. The increasing number and impacts of civil society influences not only the national sphere but also the international arena. This development has its impacts on diplomacy. Diplomacy is no longer state-centric. Non-state actors like non-governmental organisations (NGO) and multinational corporations (MNC) play a significant role in international relations. Some scholars even state that they are more important than states. (Cooper/Hocking 2000:362) We can assume that certain NGOs and MNCs are definitely more relevant than some states. The fact that some MNCs earning capacity and financial resources are higher than the one of states has a lot to commend this assumption. In a ranking of states and MNCs by size of earning in 2005-2006 the twentieth is Wal-Mart with \$288 billion after Sweden with \$321.4. Beside Wal-Mart there are British Petroleum (\$285.1 billion) and Exxon Mobil (\$270.8 billion) which are in the ranking before states like Turkey (\$268.7 billion) and Austria (25. / \$262.1 billion). In the top fifty are fourteen MNCs and in the following fifty up to place one hundred there are thirty-six MNCs and only fourteen states. It's the contrast to the top fifty and with a total look on the top hundred there are fifty percent states and fifty percent MNCs. These numbers illustrate well the huge impact of non-state actors in global and national governance.

The Power of Sustainable Development in Vietnam: Environmental Narratives, NGOs and the State's Environmental Rule

Julia L. Behrens, 2024-12-12 Sustainable development is present everywhere in Vietnam. This book analyses the Sustainable Development narrative and its use by different actors in Vietnam. It examines how narratives are used to establish environmental rule in the socialist state. By focusing on NGOs and their positions in the Vietnamese context, the book illustrates how different actors use the Sustainable Development narrative to navigate power relations with the authoritarian state and the international donors, and how the narrative differs from theory to the actual practices on the ground. The book will be of interest to scholars of Vietnam who wish to understand development and state-society relations in environmental governance. It is an important read for development practitioners.

The contribution of NGOs to international conflict resolution Tilman Pradt, 2014-04-11 Non-governmental organisations (NGOs) have become important actors in the globalised world. They run aid and relief programmes in the poorest countries, support international institutions (like the United Nations), or are watchdogs of them (for example watchdogs of the Bretton Woods institutions). In doing so, NGOs naturally work permanently with state-agencies and it is probably hard to find an NGO which is totally free of any governmental support (in financial, logistical or informative matters). Thus, there are strong NGO-government connections on a daily-work basis. NGOs run multiple attempts to contribute to the resolution of conflicts on all political levels. They bring together people on the grass-root level, they try to influence high officials through public pressure and they organise conferences and discussions with members and consultants of the concerned parties. The latter approach is analysed in this study. But how do NGOs influence the level of official international relations? To which degree can NGOs improve the relations of two conflicted parties, especially when the conflict is protracted and severe? The aim of this study is to define the preconditions of successful NGO mediation, to measure the NGO influence as an antecedent condition for successful mediation, and to exhibit its limits. The underlying assumption is that conflict resolution is more likely if NGO mediation supports this attempt. This approach can be labelled as an assumption of constant effect since the focus is on understanding the NGOs influence on international conflict resolution. Three cases of NGO-led mediation attempts are analysed. The cases are selected because of their problematic official relations are chosen under criteria of comparability. Thus, they have similar conditions (framework) in common; namely, in matters of time, territory and main actors. The case studies analysed are seated in the Middle East because negotiations between Israel and Palestine were (and still are) highly conflicted, protracted and many mediation attempts by third-parties have taken place there. The analysis of these three cases - their differences and similarities - shall lead to a better general understanding of the possibilities and limits of NGOs and the necessary preconditions.

NGOs as Legitimate Partners of Corporations Dorothea Baur, 2011-08-21 The interaction between corporations and non-governmental organizations (NGOs) has become an important topic in the debate about corporate social responsibility (CSR). Yet, unlike the vast majority of academic work on this topic, this book explicitly focuses on clarifying the role of NGOs, not of

corporations, in this context. Based on the notion of NGOs as political actors it argues that NGOs suffer from a multiple legitimacy deficit: they are representatives of civil society without being elected; the legitimacy of the claims they raise is often controversial; and there are often doubts regarding the legitimacy of the behaviour they exhibit in putting forward their claims. Set against an extended sphere of political action in the postnational constellation this book argues that the political model of deliberative democracy provides a meaningful conceptualization of NGOs as legitimate partners of corporations and it develops a conceptual framework that specifically allows distinguishing legitimate partner NGOs from two related actor types with whom they share certain characteristics but who differ with respect to their legitimacy. These related actor types are interest groups on the one hand and activists on the other hand. In conclusion it argues that a focus on the behaviour of NGOs is most meaningful for distinguishing them from interest groups and activists.

Effective Nonprofit Management Shamima Ahmed, 2021-11-29 Underlining the relationship between the public and nonprofit sectors, *Effective Nonprofit Management: Context, Concepts, and Competencies*, 2nd Edition comprehensively explores of the practical art of forming, managing, and leading nonprofit organizations, contextualizing the changing socio-political conditions and expectations of key stakeholders in nonprofit organizations. Grounded in the practical experiences of real-life nonprofit managers, this thoroughly revised second edition explores contemporary issues that are becoming central to effective nonprofit management, including: an increasing emphasis on outcome assessment and accountability; innovative use of social media; big foundations' impacts on nonprofits and public policy making; tensions between federal, state, and local governments with nonprofits; and the importance of instilling a culture of ethics in the sector. A completely new chapter on nonprofit ethics and accountability has been added. Each chapter introduces the reader to relevant and current scholarship on the topic, utilizes the language of nonprofit practice, explores contemporary issues and examples, provides practical tips, includes text boxes with profiles of nonprofit organizations and best practices, and ends with a short and practical case study followed by discussion questions. *Effective Nonprofit Management*, Second Edition will be of interest to practitioners as well as graduate and upper division undergraduate students enrolled in nonprofit and public management courses.

NGOs in International Law Pierre-Marie Dupuy, Luisa Vierucci, 2008-01-01 The essays are persuasive and well-written and, all in all, the book makes an indelible contribution to the legal discourse surrounding this subject. Although the essays are presented with sufficient detail and structure for legal specialists, it would be extremely useful for lobbying practitioners. It is equally essential reading for larger NGOs who wish to improve existing partnership efforts as well as smaller NGOs in developing countries who would like to know more about the policy considerations underpinning current limitations to the NGO's role. Akima Paul, Vienna Online Journal on International Constitutional Law The increasing importance of NGOs has forced international institutions to pay attention to issues of participation and transparency. This excellent book provides

comprehensive and insightful analyses of how international bodies accommodate NGOs and their concerns. It forthrightly addresses the uncertain legal status of NGOs in international law. Edith Brown Weiss, Georgetown University Law Center, US No one can deny the significance that NGOs have at the international level, or the dynamism some of them have shown in promoting change, whether in the context of the International Criminal Court or the environment, etc. This is a lively and well-informed account of the wide range of NGOs at the international level, their continuing search for status and (what is more important) access, and also of the abuses sometimes involved, e.g. with servile NGOs in the human rights field. This collection provides an important source of information about an important source of influence on our lives. James Crawford, Cambridge University, UK A timely and useful book that highlights the multi-faceted role of NGOs on the international scene and the rules and practices which have been designed to this end. Laurence Boisson de Chazournes, University of Geneva, Switzerland This book offers a refreshing and well-informed approach to the contentious issues of the role, legal status and consequences of NGOs in international law. The authors provide insightful and high quality analyses of the theories, applications and realities of NGO participation in a wide range of international activity. Robert McCorquodale, University of Nottingham, UK This is a timely and important contribution. It assists in our understanding of developments that have theoretical and practical implications for the changing international legal order. Philippe Sands, University College London, UK The increasing role that NGOs play at different levels of legal relevance from treaty-making to rule implementation, and from support to judges to aid delivery calls for reconsideration of the international legal status of those organizations. This book shows that the degree of flexibility currently enjoyed by NGOs in fields as varied as human rights, the environment and the European Union development cooperation policy constitutes the best arena for all actors involved, with the consequences that the instances where more strict regulation of NGOs participation is desirable are very limited. With each chapter focusing on a different modality of NGO participation in international affairs (from formalised legal statuses to informal ways of dealing with issues of international relevance), this book will be of great interest to academics specialised in international law, political scientists, international officials working for both international organisations and non-governmental organisations, and legal practitioners (legal counsels of international organisations, lawyers and judges).

Civil Society, NGOs and Democratic Governance in developing countries. A case of KHRC in Kenya Timothy Mugo, 2018-05-17 Master's Thesis from the year 2014 in the subject Politics - Topic: Development Politics, grade: 7, University of Aarhus (Institute of Culture and Society), course: International Relations, language: English, abstract: Scholars agree that modern political democracies are almost impossible without vibrant, free and activist civil societies. In Africa, as in many other parts of the developing world, civil societies have arisen as a response to the dysfunction and despotism of the postcolonial state. Given the current political developments in Kenya, including a new constitution promulgated in August 2010 that has been applauded as being very progressive and with an elaborate chapter on Bills of Rights, and its continuing

implementation, the relatively peaceful, largely “free and fair” general elections of March 2013 that KHRC monitored, it can be said that the organization has positively played a positive role in the last quarter of a century but there is still a long way to go for real democratic principles to be permanently enshrined among the Kenyan political elites and state institutions and as such KHRC must continue on its struggle to keep the various regimes that come into power on their toes and engage them on the way towards ensuring a strong and stable Kenyan state that is deeply rooted in democratic governance and that has accountability, transparency and respect for human rights. This thesis there seeks to examine how civil society, represented in this case study by KHRC have contributed to the increased democratic space in Kenya, and therefore be able to conclude whether civil society and NGOs contribute to democratization and democratic governance within the state. Scholars agree that modern political democracies are almost impossible without vibrant, free and activist civil societies. In Africa, as in many other parts of the developing world, civil societies have arisen as a response to the dysfunction and despotism of the postcolonial state.

Placing Latin America Edward L. Jackiewicz, Fernando J. Bosco, 2012-02-16 This comprehensive study offers a thematic approach to Latin America, focusing on the dynamic connections between people, places, and environments rather than on pre-defined notions about the region. The book’s well-rounded and accessible analysis includes discussions of borders and migration; transnationalism and globalization; urbanization and the material, environmental and social landscapes of cities; and the connections between economic development and political change. The authors also explore social and cultural themes such as the illegal drug trade, tourism, children, and cinema. Offering a nuanced and clear perspective, this book will be a valuable resource for all those interested in the politics, economy, and society of a rapidly globalizing continent.

The Role of Non-governmental Organizations (NGOs) in Fostering Good Governance and Development at the Local Level in Africa, 2002

A Cyclopaedic Dictionary of the Mang'anja Language David Clement Scott, 1892

Non-Governmental Organizations and the Global Refugee Regime Eva Virag Suhajda, 2008 Noone questions today the increasing role of non-governmental organizations in international relations. The field of refugee protection requires a complex attitude from NGOs, as here they meet with growing reluctance of state actors, whose interests are more formulated

by economic and security aspects. That is why NGOs does not only provide first-hand assistance to those in need, but also try to influence state's actions, force them to comply with their obligations, sets up new issues on the international agenda, and cooperates with other actors in policy-formulation. Present essay aims to examine this complex role of the non-governmental actors in international relations, and more particularly in the global refugee regime from both NGO and regime analysis points of view. While this essay proves clearly the importance of NGOs, it also shows those faults the regime actors have to overcome and those areas where closer cooperation is needed between them in order to reach the regime's ultimate goal of providing international protection and seeking permanent solutions for the problems of refugees.

NGOs in International Politics Shamima Ahmed, David M. Potter, 2006 Non-governmental organizations have gained a great deal of popularity in recent years. The awarding of the Nobel Prize to The International Campaign to Ban Landmines in 1997 and to Medicins Sans Frontieres in 1999 has highlighted the emergence of these organizations as new forces in international politics. Yet, there is no work to date that has provided an overview of the varieties of interaction between NGOs and states, international organizations and in international politics. This is especially true of books aimed at undergraduates. *NGOs in International Politics* surveys a range of NGO activities and relationships in a manner accessible to students in the classroom. Despite the gap in the textbook literature, non-governmental organizations are being taught in undergraduate courses, either in theoretical terms or as components of service learning. This book is designed to remedy the gap between interest in NGOs and accessible literature for use in the classroom.
