Five Days in November Clint Hill, Lisa McCubbin Hill, 2013-11-19 Secret Service agent Clint Hill reveals the stories behind the iconic images of the five tragic days surrounding President John F. Kennedy's assassination in this 60th anniversary edition of the New York Times bestseller. On November 22, 1963, three shots were fired in Dallas, President John F. Kennedy was assassinated, and the world stopped for four days. For an entire generation, it was the end of an age of innocence. That evening, a photo ran on the front pages of newspapers across the world, showing a Secret Service agent jumping on the back of the presidential limousine in a desperate attempt to protect the President and Mrs. Kennedy. That agent was Clint Hill. Now Hill commemorates the sixtieth anniversary of the tragedy with this stunning book containing more than 150 photos, each accompanied by his incomparable insider account of those terrible days. A story that has taken Hill half a century to tell, this is a "riveting, stunning narrative" (Herald & Review, Illinois) of personal and historical scope. Besides the unbearable grief of a nation and the monumental consequences of the event, the death of JFK was a personal blow to a man sworn to protect the first family, and who knew, from the moment the shots rang out in Dallas, that nothing would ever be the same.

Slavery and Medicine Katherine Bankole, 2019-07-30 This study re-evaluates the field known as Negro/Slave Medicine,

which has traditionally focused on the efforts of slaveowners to provide medical care for their slaves, addressing the slaves' proactive management of medical care; brutality as a cause of the constant need for medical attention; and the health risks posed by arduous agricultural labor. This groundbreaking study offers insight into the health problems facing enslaved people, their attempts to deal with the causes and effects of illness and injury, and the slave owners' attitudes toward the medical treatment of slaves. The appendices present valuable data on the medical treatment of enslaved African Americans from the Touro Infirmary Archives that have never before been published.

Volcanic Hazards John H. Latter,2012-12-06 The contributions in this book were presented, orally or as posters, at the International Volcanological Congress held in New Zealand from 1 to 9 February 1986, the centenary year of the Tarawera eruption of 10 June 1886. More than 500 people, from 29 countries, attended the Congress. Most of these works formed part of Symposium 4, Volcanic Hazards - Prediction and Assessment, convened by J.H. Latter, R.R. Dibble, D.A. Swanson and C.G. Newhall. The collection represents over half of the published abstracts of Symposium 4, together with three papers given at the Symposium, which lacked abstracts, and two which were part of Symposium 1 on pyroclastic flow deposits. The contributions cover a good proportion of the volcanically active parts of the world, with Italy, Japan, the West Indies and the USA especially well represented. Mount Erebus, Vulcano and Rabaul are individual volcanoes which have been treated in particular detail. Unfortunately, there are no chapters in the book dealing with Africa, the Atlantic islands (except Iceland), Hawaii, Central America (except Mexico), or South America (in spite of the major disaster at Nevado del Ruiz Volcano in 1985).

Dr. Joseph Warren Sam Forman,2011-11-21 The definitive biography of the Revolutionary War doctor and hero. An American doctor, Bostonian, and patriot, Joseph Warren played a central role in the events leading to the American Revolution. This detailed biography of Warren rescues the figure from obscurity and reveals a remarkable revolutionary who dispatched Paul Revere on his famous ride and was the hero of the battle of Bunker Hill, where he was killed in action. Physician to the history makers of early America, political virtuoso, and military luminary, Warren comes to life in this comprehensive biography meticulously grounded in original scholarship.
