Green Building Illustrated Francis D. K. Ching, Ian M. Shapiro, 2014-04-08 "Green Building Illustrated is a must-read for students and professionals in the building industry. The combination of incredibly expressive illustrations and accessible technical writing make concepts of green building on paper as intuitive as they would be if you toured a space with experts in sustainable building." —Rick Fedrizzi, President, CEO, and Founding Chair of the U.S. Green Building Council "The authors of Green Building Illustrated deliver clear and intelligent text, augmented by straightforward but compelling illustrations describing green building basics. This comprehensive book covers everything from the definition of green building, to details of high performance design, to sensible applications of renewable energy. This is a book with appeal for all architects and designers, because it addresses general principles such as holistic and integrated design, along with practical realities like affordability and energy codes. Green Building Illustrated describes a pathway for reaching Architecture 2030's carbon emission reduction targets for the built environment." —Ed Mazria, founder of Architecture 2030 "...a neophyte will have a very good overview of all the factors involved in green building. I see some excellent pedagogy at work!" — Jim Gunshinan, Editor, Home Energy Magazine Francis D.K. Ching brings his signature graphic style to the topic of sustainable design In the tradition of the classic *Building Construction Illustrated*, Francis D.K. Ching and Ian M. Shapiro offer a graphical

presentation to the theory, practices, and complexities of sustainable design using an approach that proceeds methodically. From the outside to the inside of a building, they cover all aspects of sustainability, providing a framework and detailed strategies to design buildings that are substantively green. The book begins with an explanation of why we need to build green, the theories behind it and current rating systems before moving on to a comprehensive discussion of vital topics. These topics include site selection, passive design using building shape, water conservation, ventilation and air quality, heating and cooling, minimum-impact materials, and much more. Explains the fundamental issues of sustainable design and construction in a beautifully illustrated format Illustrated by legendary author, architect, and draftsman Francis D.K. Ching, with text by recognized engineer and researcher Ian M. Shapiro Ideal for architects, engineers, and builders, as well as students in these fields Sure to be the standard reference on the subject for students, professionals, and anyone interested in sustainable design and construction of buildings, *Green Building Illustrated* is an informative, practical, and graphically beautiful resource.

Building Structures Illustrated Francis D. K. Ching, Barry S. Onouye, Douglas Zuberbuhler, 2014-03-04 A new edition of Francis D.K. Ching's illustrated guide to structural design Structures are an essential element of the building process, yet one of the most difficult concepts for architects to grasp. While structural engineers do the detailed consulting work for a project, architects should have enough knowledge of structural theory and analysis to design a building. *Building Structures Illustrated* takes a new approach to structural design, showing how structural systems of a building—such as an integrated assembly of elements with pattern, proportions, and scale—are related to the fundamental aspects of architectural design. The book features a one-stop guide to structural design in practice, a thorough treatment of structural design as part of the entire building process, and an overview of the historical development of architectural materials and structure. Illustrated throughout with Ching's signature line drawings, this new Second Edition is an ideal guide to structures for designers, builders, and students. Updated to include new information on building code compliance, additional learning resources, and a new glossary of terms Offers thorough coverage of formal and spatial composition, program fit, coordination with other building systems, code compliance, and much more Beautifully illustrated by the renowned Francis D.K. Ching *Building Structures Illustrated*, Second Edition is the ideal resource for students and professionals who want to make informed decisions on architectural design.

Building Codes Illustrated: The Basics Francis D. K. Ching, Steven R. Winkel, 2022-10-04 A visual introduction to the fundamentals of the 2021 International Building Code In *Building Codes Illustrated: The Basics*, architectural illustration expert Francis D.K. Ching and California architect and engineer Steven R. Winkel deliver a concise visual introduction to the 2021 International Building Code (IBC) distilled from the industry bestseller *Building Codes Illustrated*. With clear language and Frank Ching's distinctive illustrations, the book offers readers a sound understanding of the foundations of the IBC. The

authors cover only the most relevant topics, and have designed this book to serve as a companion textbook for students taking introductory courses. *Building Codes Illustrated: The Basics* is also an essential study resource for the Codes and Regulations section of the Architect Registration Exam developed by NCARB. This book also provides: A solid understanding of the fundamentals of the 2021 International Building Code for students without a background in architecture or engineering Intuitive and memorable study material for people seeking licensure via the Architect Registration Exam Visually striking and memorable material designed to catch the reader's eye, hold attention, and improve retention Perfect for undergraduate students in 2- to 4-year courses studying building codes and specifications, *Building Codes Illustrated: The Basics* is also ideal for early-career professionals in architecture, interior design, construction management, and engineering.

Building Structures Illustrated Francis D. K. Ching, Barry S. Onouye, Douglas Zuberbuhler, 2009-01-14 Francis D.K. Ching brings his trademark presentation to the structural design studio with this major new work co-authored by Barry Onouye and Douglas Zuberbuhler. Taking a new approach to structural design, Ching and his co-authors show how structural systems of a building -- as an integrated assembly of elements with pattern, proportions, and scale -- are related to the essential aspects of architectural design: formal and spatial composition, program fit, coordination with other building systems such as enclosure and mechanical systems, code compliance, etc. No other work by Francis D.K. Ching brings together so many aspects of architectural design as an integrated reference. Designers, builders, and students alike will gain a new understanding of structural principles and planning, without the need for mathematics. Using Ching's trademark presentation, *Structural Patterns* is illustrated throughout with line drawings to present the essential presence of structural systems in buildings, but

also helps the reader make informed decisions for architectural design.

Dwell, 2004-03 At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.

Materials for Interior Environments Corky Binggeli, 2008 Covering all aspects of interior design materials, this book includes health and safety codes; human factors and material selection; economic criteria; environmental criteria; finishes for walls, windows, ceilings, flooring, and millwork and furniture materials.
