**Teaching and Learning in a Digital World** Michael E. Auer, David Guralnick, Istvan Simonics, 2018-02-09 This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning (ICL2017), held in Budapest, Hungary on 27-29 September 2017. The authors are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of technological developments and global markets, and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general, but especially in engineering education. To face these current real-world challenges, higher education has to find innovative ways to quickly respond to them. Since its inception in 1998, this

conference has been devoted to new approaches in learning with a focus on collaborative learning. Today the ICL conferences offer a forum for exchange concerning relevant trends and research results, and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context.

**Who's the Teacher?** Charles St. Anthony, 2024-11-12 After more than a decade teaching ESOL (ESL) classes in the USA and Japan, Charles St. Anthony has put together a collection of fun and educational activities that he has used in classrooms across the world. Some activities address grammatical pain points for English learners such as preposition use and the differences between the verbs look, see, and watch. Years of in-class experience have helped Charles craft this collection of activities which includes exercises to learn vocabulary found in mobile phone apps and the differences between US and UK English. In addition to grammar-based exercises, there are also just for fun activities—for example, there's an activity for learning vocabulary used for love and relationships and also activities for the holidays. This edutainment book includes answer keys and an extra bonus crossword puzzle! What's more, the activities have corresponding Kahoot online games to reinforce the lessons students learned in the book. *Who's the Teacher?* will help students expand their knowledge of the English language while having fun at the same time.

**Starting to Teach Latin** Steven Hunt, 2016-02-11 This handbook for teachers provides both practical, up-to-date guidance and a theoretical overview on a number of key topics in Latin teaching. Using a wealth of interviews, observations and pupil transcripts, Steven Hunt title utilizes case-study evidence of excellent practice in teaching and learning from a wide variety of institutions: from outreach programmes, community schools and academies in the UK, to New York Charter Schools, KIP schools and schools in Eastern Seaboard states in the USA. Offering practical advice on topics such as essay writing, teaching controversial topics including women, slavery, ethnicity and social hierarchy, making use of primary sources and using ICT to advance language skills, the book also engages with broader questions of approach and theory. These include a survey of the three main approaches to Latin teaching: grammar-translation, communicative and reading approaches; explanation of cognitive and social approaches to learning; and analysis of the differences between intrinsic and extrinsic motivation. Moreover, traditional arguments about the value and purpose of learning Latin at school level are re-examined in the light of current educational thinking and government policy-making. This book is invaluable for trainees, newly qualified teachers and more experienced practitioners looking for practical ideas and strategies to motivate and engage learners of Latin. A companion website [www.startingtoteachlatin.org](http://www.startingtoteachlatin.org) is under construction and will contain a range of resources and information for teachers.

*Data-Driven Learning for the Next Generation* Peter Crosthwaite, 2019-10-21 Despite advancements in and availability of corpus software in language classrooms facilitating data-driven learning (DDL), the use of such methods with pre-tertiary learners remains rare. This book specifically explores the affordances of DDL for younger learners, testing its viability with teachers and students at the primary and secondary years of schooling. It features eminent and up-and-coming researchers from Europe, Asia, and Australasia who seek to address best practice in implementing DDL with younger learners, while providing a wealth of empirical findings and practical DDL activities ready for use in the pre-tertiary classroom. Divided into three parts, the volume's first section focuses on overcoming emerging challenges for DDL with younger learners, including where and how DDL can be integrated into pre-tertiary curricula, as well as potential barriers to this integration. It then considers new, cutting-edge innovations in corpora and corpus software for use with younger learners in the second section, before reporting on actual DDL studies performed with younger learners (and/or their teachers) at the primary and secondary levels of education. This book will appeal to post-graduate students, academics and researchers with interests in corpus linguistics, second language acquisition, primary and secondary literacy education, and language and educational technologies.
