*Future Prospects of Learning in the Clinical Environment: Exploring the Technological Revolution* Hani Salem

Atwa, Mohamed Hany Shehata, Enjy Abouzeid, Asmaa Abdelnasser, Doaa Kamal, Nourhan F. Wasfy, Komal Atta, 2025-10-13

Enhancing the quality of clinical education and training for medical students, residents, and practicing physicians is the goal of research in clinical learning. New teaching strategies such as team-based learning, learning by concordance, and interprofessional education have also been developed and subjected to intensive research to improve critical thinking, communication, teamwork skills, and collaboration among healthcare professionals. Also, to evaluate learners in the clinical environment more accurately, innovative and technology enhanced assessment methodologies are continually investigated. In the areas of technology, artificial intelligence (AI), and robotics, we are currently experiencing a period of invention and development creating a disruptive wave in medical and healthcare professions education. This includes high-tech simulation-based training, online clinical learning, AI-generated feedback, e-portfolios, and script concordance tests. These innovations in the education of medical professionals in the clinical environment have the potential to improve patient outcomes and ultimately enhance the quality of healthcare delivery. The aim of this research is to explore, assess, and advance the multifaceted realm of clinical education and training for medical students, residents, and practicing physicians. In a rapidly evolving landscape influenced by technological advancements such as artificial intelligence (AI) and robotics, the overarching goal is to drive innovations that enhance the quality of education and, consequently, improve patient outcomes in healthcare delivery. Areas of interest include:

- Finding efficient techniques for instruction and evaluation that will enhance the quality of clinical learning of medical students, residents, and practicing physicians.
- Addressing the use of cutting-edge technology and artificial intelligence to enhance the quality of clinical learning of medical students, residents, and practicing physicians.
- Utilizing data warehouses, AI-generated reports, and electronic medical records to provide trainee-centred feedback.

Ensuring faculty development in technology to keep educators stay abreast of the latest advancements, fostering innovation, and enhancing the clinical educational experience for both instructors and learners.

- Encouraging professionalism and self-reflection among medical practitioners to advance moral conduct, responsibility, and self-awareness in clinical practice.
- Promoting a culture of continuous learning and improvement in the healthcare industry to make sure that healthcare professionals stay up to date with the most recent developments in clinical practice and offer their patients the best

treatment possible. • Preparing healthcare professionals to provide culturally responsive care and address health inequities and diversity in clinical practice. For this Research Topic we welcome Brief Research Reports; Case Reports; Clinical Trials; Community Case Studies; Curriculum, Instruction, and Pedagogy articles; General Commentaries; Hypothesis and Theory articles; Methods; Mini Reviews; Opinions; Original Research; Perspectives; Reviews; Study Protocols; and Systematic Reviews. Physicians, healthcare professionals, educators, students, and other experts in this intriguing field are invited to share their knowledge and add to this collection.

Addressing Underserved Populations in Autism Spectrum Research Matthew Bennett, Emma Goodall, 2022-07-07

Addressing Underserved Populations in Autism Spectrum Research highlights five areas of autism spectrum research that currently lack a substantial body of literature. These include, autistic seniors, autistic women, fathers raising autistic children, autistics with intellectual disabilities, and autistics from ethnic minorities.

**Occupational Therapy with Aging Adults - E-Book** Karen Frank Barney, Margaret Perkinson, 2024-06-21 Get all the information you need to work holistically, creatively, and collaboratively when providing services for older adults with Karen Frank Barney, Margaret A. Perkinson, and Debbie Laliberte Rudman's Occupational Therapy with Aging Adults, 2nd Edition. Emphasizing evidence-based, occupation-based practice and a collaborative, interdisciplinary approach, this text walks students and practitioners through the full range of gerontological occupational therapy practice, inclusive of working with individual clients to working at systems and societal levels. Over 80 leaders in their respective topical areas contributed to the book's 33 chapters, including the conceptual foundations and principles of gerontological occupational therapy, biopsychosocial age-related changes, environmental forces shaping occupational participation for older adults, the continuum of health care as well as implications for communities, and the attributes, ethical responsibilities, and roles involved in gerontological occupational therapy. This edition also covers topical OT issues that are crucially important to an aging population — such as diversity and inclusion, disability and aging, sexuality, technology, telehealth and virtual environments, intergenerational connections, updates on dementia research and caring for someone with dementia, occupational justice and aging, age inclusive communities, and an expanded section on hearing — to ensure your students are well versed in every aspect of this key practice area. - UNIQUE! Intraprofessional and interprofessional approach to intervention emphasizes working holistically and collaboratively in serving older adults. - UNIQUE! Chapter on the wide range of physiological, musculoskeletal, and neurological changes among the aging patient population highlights related occupational performance issues. - Case examples help you learn to apply new information to actual client and community situations. - Chapter on evidence-based practice discusses how to incorporate evidence into clinical or community settings. - Questions at the end of each chapter can be used for discussion or other learning applications. - UNIQUE! Chapters on nutrition, food insecurity, and oral health explore related challenges faced by older adults. - Chapter on ethics provides a deeper

understanding of how to address challenging ethical dilemmas.

**Meta-analysis in Clinical Research: Principles and Procedures** Anoop Kumar, 2023-08-22 This book provides conceptual information on the various processes involved in meta-analysis. It examines the importance of meta-analysis for the analyses of clinical data to draw a valid conclusion using suitable software. The initial sections of the book introduce meta-analysis, how to perform a systematic literature review (SLR), quality assessment of studies, extraction, and analysis of data. The subsequent section of the book contains information on advanced topics including, meta-regression, network meta-analysis, issues, mistakes, and future perspectives. In summary, the book provides a statistical method for combining the results of different studies on the same topic and resolving conflicts among studies. This book is written with the intent to allow a wide range of readers including students, researchers, and health care professionals, including physicians, nurses, pharmacists, and paramedical, and is also helpful for a beginner who would like to do a meta-analysis.

**Introducing, Designing and Conducting Research for Paramedics** Alexander Olausson, Kelly-Ann Bowles, Bill Lord, Brett Williams, 2022-09-15 The profession of paramedicine is rapidly expanding and primary research relating to prehospital interventions is exploding worldwide. This new book provides, for the first time, a meaningful and easy to understand guide to research specifically tailored for paramedics. Written by experts in research, medicine and paramedicine, *Introducing, Designing and Conducting Research for Paramedics* introduces the reader to the concepts of research through real-life examples. The structure follows a logical sequence from an overview of the research process to how to generate, consume and implement evidence. This book will be a valuable resource for paramedics and prehospital clinicians at any level, worldwide, who wish to contribute to the rapidly emerging body of evidence on paramedicine and understand how they can make use of this in their practice. - Important concepts described in terms of their relevance to paramedicine, making the text meaningful and easy to understand - Written and edited by key academics and clinicians in the field of paramedic research - Paramedicine examples used throughout to explain aspects of research methodology (e.g. qualitative, quantitative, mixed methods and literature reviews) - Key objectives, relevant terms, reference lists, further suggested readings and useful resources support the reader to engage further with research - Discussion/review questions and reflective exercises in each chapter to reinforce learning - An eBook included with print purchase

**Health on the Move 3: the Reviews**, 2024-05-29 *Health on the Move 3: the Reviews*, Volume 13 covers this important field of interdisciplinary study. As part of the Transport and Health Science Group's process of updating *Health on the Move 2* it has commissioned a number of in-depth reviews of various aspects of the field. This new release includes chapters such as T&H, inequalities, social exclusion, etc., What are the impacts of disability on travel?, What interventions increase active travel?, Impact of active commuting to school on children's health: an overview of systematic reviews, How important is travel mode in determining injury and fatality rates related to travel?, and more. Other chapters in this new release include

What are the impacts of area-wide 20mph [30kph] speed limits?, What policies are effective in reducing congestion?, What are the economic and social impacts of public transport and how do these relate to health?, Health outcomes of public transport: a systematic review, Transport and Loneliness, Costs of transport and mental health and wellbeing, and What contribution does each of the factors affecting gender differences in travel patterns make? - Provides high quality, fully peer-reviewed, literature reviews on topics in Transport and Health - Includes self-contained chapters for readers with specific interests - Links transport and public health disciplines by providing up-to-date evidence on a range of topics and potential interventions

*An Introduction to Metascience* Gabriel Bennett, Emma Goodall, 2024-09-13 An Introduction to Metascience delves into core metascientific concepts, offering a critical examination of current knowledge creation processes and scrutinising researchers and their methodologies across disciplines. This book stands alone as a comprehensive guide to metascience, offering readers a singular resource for understanding and implementing metascientific principles into their research practices. Readers will find this book invaluable for perfecting their research skills and enhancing the quality of their academic work. It exposes the reader to the intricacies of research processes, prompting a reevaluation of preconceived notions and fostering a deeper understanding of the flaws and solutions inherent in knowledge creation. Furthermore, it offers thought-provoking insights into implementing strategies to enhance research productivity, and it elucidates both the benefits and pitfalls of incorporating artificial intelligence in research production. Designed for scientists and researchers seeking to gain insight into the scientific process, An Introduction to Metascience caters to those interested in understanding how research evolves over time. It appeals to individuals eager to explore methods, practices, and philosophies of science to refine their approach to knowledge creation.

**Quasi-experimentation** Thomas D. Cook, Donald Thomas Campbell, 1979 This book presents some quasi-experimental designs and design features that can be used in many social research settings. The designs serve to probe causal hypotheses about a wide variety of substantive issues in both basic and applied research. Each design is assessed in terms of four types of validity, with special stress on internal validity. Although general conclusions are drawn about the strengths and limitations of each design, emphasis is also placed on the fact that the relevant threats to valid inference are specific to each research setting. Consequently, a threat that is usually associated with a particular design need not invariably be associated with that design.
