Journals of the Century Jim Cole, Tony Stankus, 2014-02-25 Get the experts' perspective on the top journals of the 20th century! The Journals of the Century project gathered some of America's top subject expert librarians to determine the most influential journals in their respective fields. Thirty-two contributing authors—led by Editor Tony Stankus—reviewed journals from over 20 countries that have successfully shaped the evolution of their individual specialties worldwide. Their choices reflect the history of each discipline or profession, taking into account rivalries between universities, professional societies, for-profit and not-for-profit publishers, and even nation-states and international ideologies, in each journal's quest for reputational dominance. Each journal was judged using criteria such as longevity of publication, foresight in carving out its niche, ability to attract & sustain professional or academic affiliations, opinion leadership or agenda-setting power, and ongoing criticality to the study or practice of their field. Journals of the Century presents wholly independent reviewers; none are in the employ of any publisher, but each is fully credentialed and well published, and many are award-winners. The authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty, students, and working professional clientele. The chapters are logically grouped together in six clusters that reflect the commonly shared interests of library liaisons and the range of like-minded academic departments they typically serve. These clusters include: The Helping Professionals (chapters on social work, education, psychology, sociology, and library and information sciences) Music, Museums, and Methodists (chapters on visual arts, anthropology, archaeology, philosophy, and the American religious experience) Business and Law (chapters on business and economics, plus legal literature) War and Peace (chapters on modern history, political science and international relations, and military affairs) Physical Sciences and Engineering (chapters on mathematics and the physical sciences as well as engineering and computer science) Life, Health, and Agriculture (chapters on medicine and surgery, pharmacy, physical therapy and nutrition, agriculture, and veterinary medicine) Journals of the Century answers questions such as: Which university press leads in high-ranking titles in the helping professions? In what crime-fighting journal, ironically mentioned within the Music, Museums, and Methodists cluster, do anthropologists routinely publish? What two journals cover the biggest yearly expense of most working Americans and rank highly within both chapters of the Business and Law cluster? What family of British publications has remained indispensable reading for political and military readers for

over a century in the War and Peace Cluster? What society in the Physical Sciences and Engineering cluster publishes more journals than any other publisher in this book, covering topics from light bulbs and computers to MRIs and windmills? What one-word-titled journal has joined the venerable pair of Nature and Science as the most important reporters of world-class breakthroughs in basic biomedical science? and many, many more! Journals of the Century includes extensive commentaries on each cluster by the editor, with graphical representations by world regions and publishing sectors contributing to each chapter. ISSN numbers for print editions, and URL addresses for online editions are provided in a comprehensive title index. This unique book is an essential resource for serials librarians in academia, new reference librarians familiarizing themselves with classic titles, and collection evaluators and college accreditation examiners.

Data Scholarship, digital original edition Christine L. Borgman,2015-04-01 Despite the media hyperbole about “Big Data,” having the right data is usually better than having more data; little data can be just as valuable as big data. This BIT examines the complex set of relationships between data and scholarly research. In it, Christine Borgman, an often-cited authority on scholarly communication, looks at, among other things, knowledge infrastructures, social and technical aspects of digital scholarship, collaboration and community, open access publishing, and open data.

Inspiring the Youth of America by Remington Registry J. Alex Ficarra,2016-08-10 Here at Remington, many people are curious about this powerful book commonly known as “Inspiring the Youth of America.” Well, as you may know, our youth today in America are in dire need of mentorship and guidance. This book is a whole new step forward for all of us as a civilization. For many years, and even today, young Americans wander aimlessly in a pool of confusion. They end up in meaningless careers with no past, no future, and nothing to hope for. Undoubtedly, the end result is misery and despair. The end result is poverty and surely a feeling of emptiness. Well, we at Remington, after interviewing over thirty thousand professionals, were shockingly surprised to find that many successful professionals were disgusted with vanity publications. They were disappointed with the meaningless dribble of a phone book-type registry that possibly required a magnifying glass just to read. But surprisingly enough, these professionals encouraged any use of their biography for humanitarian purposes. Undoubtedly, mentorship for our youth fell into that category. So there it was born. Our proudest moment as publishers was laid out before us. But there was one big problem. All these people needed to be interviewed in depth, and generic biographies certainly would not inspire. So with that, we swallowed hard, and our staff got to work. Yes, it was and still is a grueling, time-consuming mission and undertaking. But in the end, as you may witness as you read this book, the content is quite spectacular and certainly worth the effort. We would also like to mention that the participants in this book also spent much time sending us information and encouraging us to make this book worthy of their efforts. Now it was up to us to

uphold the dignity of these professionals and forge forward into a future where a student can explore his or her life with the ability to fulfill their own potentials. With that, this book is presented to you today, and we hope that you share in our dream to build a better America from where it really matters—our youth.
