The Wiley International Handbook of Educational Leadership Duncan Waite,Ira Bogotch,2017-03-16 A provocative and authoritative compendium of writings on leadership in education from distinguished scholar-educators worldwide. What is educational leadership? What are some of the trends, questions, and social forces most relevant to the current state of education? What are the possible futures of education, and what can educational leadership contribute to these futures? To address these questions, and more, editors Duncan Waite and Ira Bogotch asked distinguished international thought leaders on education to share their insights, observations, and research findings on the nature of education and educational leadership in the global village. The Wiley International Handbook of Educational Leadership brings together contributions from authors in twenty-one countries, spanning six continents. Topics examined include leadership and aesthetics, creativity, eco-justice, advocacy, Big Data and technology, neoliberalism, emerging philosophies and theories, critical democracy, gender and radical feminism, political economies, emotions, postcolonialism, and new directions in higher education. A must-read for teachers, researchers, scholars, and policy makers, this Handbook: Champions radical pluralism over consensus and pseudoscientific or political solutions to problems in education Embraces social, economic, and political relevance alongside the traditions of careful and systematic rigor Challenges traditional epistemological, cultural, and methodological concepts of education and educational leadership Explores the field's historical antecedents and ways in which leadership can transcend the narrow disciplinary and bureaucratic constraints imposed by current research designs and methods Advances radically new possibilities for remaking educational leadership research and educational institutions

Policy Actors Stephen Ball,2019-06-20 Policy analysis has always attended to the role of elite actors, but much less often has the policy activity of 'street level' actors been attended to. The 'implementation' paradigm has tended to caricature the

level of practice in terms of 'resistors' or policy failure, and ignored the demanding, creative and complex processes of enacting policy. The move from policy texts to policy in action involves sophisticated processes of interpretation and translation, as well as, at times, opposition, subversion and strategic compliance. The chapters in this book, in different ways, seek to get inside the policy process to understand what policy actors really do – how they manage impossible and multiple policy expectations, how they attempt to do policy with limited resources in conditions often unimagined by those who write policy, and how they translate abstract policy formulations into things that are doable, immediate and relevant. The collection re-writes the policy process and offers new ways of researching policy and policy outcomes. This book was originally published as a special issue of the Journal of Education Policy.

Más y mejor educación en Guatemala, 2008-2021 ,2007 This study, prepared by the Central American Institute for Fiscal Studies (ICEFI), is in five parts. In the first part, the different proposals and goals for education have been collected, systematized and harmonized. The second part describes the methodology used to calculate resources. The third part contains a comprehensive diagnosis of education and conditioning factors which have served as a basis for calculating cost. The fourth part contains interventions which will make it possible to meet the existing goals. The fifth part explores some options for funding additional spending to achieve education goals from 2008 to 2021.
