

Uncle Tungsten Oliver Sacks

O García

Uncle Tungsten Oliver Sacks, 2013-12-11 From the distinguished neurologist who is also one of the most remarkable storytellers of our time—a riveting memoir of his youth and his love affair with science, as unexpected and fascinating as his celebrated case histories. “A rare gem.... Fresh, joyous, wistful, generous, and tough-minded.” —The New York Times Book Review Long before Oliver Sacks became the bestselling author of *The Man Who Mistook His Wife for a Hat* and *Awakenings*, he was a small English boy fascinated by metals—also by chemical reactions (the louder and smellier the better), photography, squids and cuttlefish, H.G. Wells, and the periodic table. In this endlessly charming and eloquent memoir, Sacks chronicles his love affair with science and the magnificently odd and sometimes harrowing childhood in which that love affair unfolded. In *Uncle Tungsten* we meet Sacks’ extraordinary family, from his surgeon mother (who introduces the fourteen-year-old Oliver to the art of human dissection) and his father, a family doctor who imbues in his son an early enthusiasm for housecalls, to his “Uncle Tungsten,” whose factory produces tungsten-filament lightbulbs. We follow the young Oliver as he is exiled at the age of six to a grim, sadistic boarding school to escape the London Blitz, and later watch as he sets about passionately reliving the exploits of his chemical heroes—in his own home laboratory. *Uncle Tungsten* is a crystalline view of a brilliant young mind springing to life, a story of growing up which is by turns elegiac, comic, and wistful, full of the electrifying joy of discovery.

Vintage Sacks Oliver Sacks, 2007-12-18 An introduction to the work of Oliver Sacks • “It is Dr. Sacks’s gift that he has found a way to enlarge our experience and understanding of what the human is.” —The Wall Street Journal Dubbed “the poet laureate of medicine” by The New York Times, Oliver Sacks was a practicing neurologist and a mesmerizing storyteller. His empathetic accounts of his patients’s lives—and wilyly observed narratives of his own—convey both the extreme borderlands of human experience and the miracles of ordinary seeing, speaking, hearing, thinking, and feeling. *Vintage Sacks* includes the introduction and case study “Rose R.” from *Awakenings* (the book that inspired the Oscar-nominated movie), as well as “A Deaf World” from *Seeing Voices*; “The Visions of Hildegard” from *Migraine*; excerpts from “Island Hopping” and “Pingelap” from *The Island of the Colorblind*; “A Surgeon’s Life” from *An Anthropologist on Mars*; and two chapters from

Sacks's acclaimed memoir Uncle Tungsten.

The Oxford Book of Modern Science Writing Richard Dawkins, 2009 Selected and introduced by Richard Dawkins, The Oxford Book of Modern Science Writing is a celebration of the finest writing by scientists for a wider audience - revealing that many of the best scientists have displayed as much imagination and skill with the pen as they have in the laboratory. This is a rich and vibrant collection that captures the poetry and excitement of communicating scientific understanding and scientific effort from 1900 to the present day. Professor Dawkins has included writing from a diverse range of scientists, some of whom need no introduction, and some of whose works have become modern classics, while others may be less familiar - but all convey the passion of great scientists writing about their science.

Chip Kidd Véronique Vienne, 2003 Chip Kidd is best known for his book jacket designs, which have been credited with spawning a revolution in the art of the book cover in the US. Master of the graphic non-sequitur, Kidd has designed covers for books by authors such as John Updike, Dean Koontz, Michael Crichton, Peter Carey and William Boyd that engage the reader's intelligence as well as imagination. This illustrated volume presents an appraisal of his oeuvre.

The Nostalgia Factory Douwe Draaisma, 2020-08-11 An entertaining discussion of the role memory plays in our lives as we age, including an interview with Oliver Sacks (Times Higher Education Supplement). When we can't call to mind the name of someone we've known for years, or walk into a room and forget what we came for, we start worrying. Are these lapses just senior moments, or something serious like dementia? In this book, a renowned specialist explores the topic of memory in later life—not only the problems but the surprisingly unexpected pleasures it can offer, such as the reminiscence effect. Avoiding jargon, Douwe Draaisma explains neurological phenomena and also includes a long interview with Oliver Sacks, who speaks of his own memory changes as he entered his sixties. Draaisma moves smoothly from anecdote to research and back, weaving stories and science into a compelling description of the terrain of memory and forgetfulness, dismantling myths and helping us to value the abilities of the aging mind. For readers, the most welcome aspect of this book may be his heartening examples of the wisdom that comes with old age.— The Washington Post He engages with topics of considerable social and psychological importance...his use of varied sources is refreshing.— Times Higher Education Supplement

Literature and Chemistry Margareth Hagen, Margery Vibe Skagen, 2014-02-21 Literature and Chemistry: Elective Affinities investigates literary and chemical encounters, from medieval alchemy to contemporary science fiction, in works of the likes of Dante, Goethe, Baudelaire and Dag Solstad as well as in literary writing of scientists such as Humphry Davy, Ludwig Boltzmann and Oliver Sachs. Sixteen authors break new ground in demonstrating chemistry's particular status as one of the sciences in which humanities should interest itself, the overlaps and reciprocities of the two fields, and - perhaps most importantly - chemistry's role in the production of narrative, metaphor, and literary form. The anthology makes the silent

presence of chemistry perceptible, uncovering its historical and present appeal to material sensitivity, imagination, and creativity, as well as its call for philosophical and ethical concern, and for wonder.

Sunday Best John Carey, 2022-11-15 A collection of John Carey's greatest, wisest, and wittiest reviews—amassed over a lifetime of writing. In 1977, newly installed as a professor of English at Oxford, John Carey took the position of chief reviewer for the Sunday Times. In a career spanning over 40 years and upwards of 1,000 reviews, Carey has kept abreast of the brightest and best books of the day, distilling his thoughts each week for the entertainment of Sunday readers. Contained in this volume is the cream of that substantial crop: a choice selection of the books which Carey has most cherished. Covering subjects as diverse as the science of laughter, the art of Grayson Perry, the history of madness, and Sylvia Plath's letters, this is a collection of treats and surprises, suffused with careful thought, wisdom, and enjoyment. The result is a compendium of titles that have stood the test of time, offered with Carey's warmest recommendation.

The Cycad Botanists Roy Osborne, Dennis Wm Stevenson, 2025-03-25 This work provides short biographies of 50 historical figures in cycad biology. It covers those starting in the early 17th century through the 21st century. Each of the biographies covers a career including birth and death, schooling, places of employment, travel in field work, publications, place of their cycad type specimens, list of species described and list of species named for them. The latter two items are illustrated along with any honorific items such as currency, stamps, and so on. Additionally, each entry has a portrait. The purpose of this work is to bring together in one place treatments on the lives, work, publications, illustrations, and type specimens of the historic figures in cycad biology. It will be of interest to researchers in cycads but also to the large, amateur community of cycad enthusiasts and others interested in gymnosperms and the history of botany. The book will be featured at the triennial meetings on cycad biology at New York Botanical Garden.
