Dread Trident Curtis D. Carbonell, 2019 *Dread Trident* examines the rise of imaginary worlds in tabletop role-playing games (TRPGs), such as *Dungeons and Dragons*. With the combination of analog and digital mechanisms, from traditional books to the internet, new ways of engaging the fantastic have become increasingly realized in recent years, and this book seeks an understanding of this phenomenon within the discourses of trans- and posthumanism, as well as within a gameist mode. The book explores a number of case studies of foundational TRPGs. *Dungeons and Dragons* provides an illustration of pulp-driven fantasy, particularly in the way it harmonizes its many campaign settings into a functional multiverse. It also acts as a supreme example of depth within its archive of official and unofficial published material, stretching back four decades. *Warhammer 40k* and the *Worlds of Darkness* present an interesting dialogue between Gothic and science-fantasy elements. The *Mythos* of HP Lovecraft also features prominently in the book as an example of a realized world that spans the literary and gameist modes. Realized fantasy worlds are becoming ever more popular as a way of experiencing a touch of the magical within modern life. Reworking Northrop Frye's definition of irony, *Dread Trident* theorizes an ironic understanding of this process and in particular of its embodied forms.

3D Printing, Intellectual Property and Innovation Rosa Maria Ballardini, Marcus Norrgård, Jouni Partanen, 2016-04-24 3D printing (or, more correctly, additive manufacturing) is the general term for those software-driven technologies that create physical objects by successive layering of materials. Due to recent advances in the quality of objects produced and to lower processing costs, the increasing dispersion and availability of these technologies have major implications not only for manufacturers and distributors but also for users and consumers, raising unprecedented challenges for intellectual property protection and enforcement. This is the first and only book to discuss 3D printing technology from a multidisciplinary perspective that encompasses law, economics, engineering, technology, and policy. Originating in a collaborative study spearheaded by the Hanken School of Economics, the Aalto University and the University of Helsinki in Finland and engaging an international consortium of legal, design and production engineering experts, with substantial contributions from industrial partners, the book fully exposes and examines the fundamental questions related to the nexus of intellectual property law, emerging technologies, 3D printing, business innovation, and policy issues. Twenty-five legal, technical, and business experts contribute sixteen peer-reviewed chapters, each focusing on a specific area, that collectively evaluate the

tensions created by 3D printing technology in the context of the global economy. The topics covered include: • current and future business models for 3D printing applications; • intellectual property rights in 3D printing; • essential patents and technical standards in additive manufacturing; • patent and bioprinting; • private use and 3D printing; • copyright licences on the user-generated content (UGC) in 3D printing; • copyright implications of 3D scanning; and • non-traditional trademark infringement in the 3D printing context. Specific industrial applications – including aeronautics, automotive industries, construction equipment, toy and jewellery making, medical devices, tissue engineering, and regenerative medicine – are all touched upon in the course of analyses. In a legal context, the central focus is on the technology's implications for US and European intellectual property law, anchored in a comparison of relevant laws and cases in several legal systems. This work is a matchless resource for patent, copyright, and trademark attorneys and other corporate counsel, innovation economists, industrial designers and engineers, and academics and policymakers concerned with this complex topic.

5th Edition Adventures - C5 - Falls the Divide Troll Lord Games,2019-02 Built high on cliffs overlooking the confluence of two rivers, Gurthap Keep was a bastion of strength and a haven for the Cult of the Red God. Here, priests of old sacrificed over the tomb of long dead Kha M Thir, honoring him for his long service to the Red God. They added bastions to the keep, walls, a temple and barracks. From there they terrorized the surrounding country, raiding the villages of Alice, Greenbriar and Ends Meet until at last the rangers gathered against the Cult and overthrew it. They drove them from their

walls and those they did not slay, fled into the Darkenfold to the south. The castle has sat thus ever since, a grim testament to the gods of the old world. The forest has consumed it and only the memories of men keep it alive. But within its abandoned walls lie the shadows of yesteryear. For the tomb of Kah M Thir was never found and the secrets of the priests of the Red God never fully revealed. Falls the Divide is an adventure for 3-5 characters of around 5th to 8th level.
