Body and Earth Andrea Olsen,2020-02-04 Body is our first environment, writes Andrea Olsen. It is the medium through which we know the earth. In a remarkable integration of environmental science, biology, meditation, and creative expression, Olsen, a dancer who teaches in the environmental studies program at Middlebury College, offers a guide to a holistic understanding of person and place. Part workbook, part exploration, Body and Earth considers the question of how we can best, most responsibly inhabit both our bodies and our planet. Olsen displays an easy command of fields as diverse as geology, biochemistry, ecology, and anatomy as she explores the ways in which our bodies are derived from and connected to the natural world. But Body and Earth is not just a lesson, it is also an investigation. Arranged as a 31-day program, the book offers not only a wealth of scientific information, but also exercises for both exploring the body and connecting with place; illustrations and works of art that illuminate each chapter's themes; and Olsen's own meditations and reflections, connecting the topics to her personal history and experience. Olsen insists that neither body nor landscape are separate from our fundamental selves, but in a culture which views the body as a mechanism to be trained and the landscape as a resource to be exploited, we need to learn to see again their fundamental wholeness and interconnection. Through hard data, reflection, exercises, and inspiration, Body and Earth offers a guide to responsible stewardship of both our planet and our persons.

Body disciplines and therapies have enjoyed phenomenal growth in the past decade, becoming a major alternative to mainstream medicine and traditional psychotherapy. But with more than 100,000 practitioners and dozens of methods available in the United States alone, how can consumers choose the right one for themselves? Mirka Knaster's richly informative guide provides an overview of the principles and theories underlying the major Eastern and Western body therapies, or bodyways. It shows readers how to befriend their own bodies, getting back in touch with their internal sources of health and wisdom. It also describes more than 75 individual approaches, answering such questions as: How does each therapy work? What can we expect from one session or a series? What are the reasons for selecting this method? How do we find a qualified practitioner? What, if any, are the consumer-bewares?

Wisdom of the Body Moving Linda Hartley, 1995-10-17 This comprehensive guide introduces Body-Mind Centering, the internationally recognized field pioneered by dancer and occupational therapist Bonnie Bainbridge Cohen. Devoting thirty-five years to a systematic investigation of the relations between bodily experience and the anatomical maps of science, Bainbridge Cohen independently discovered many of the principles that underlie Feldenkrais work, cranial osteopathy, Rolfing, dance therapy, and Zero Balancing. Experienced BMC practitioner Linda Hartley demonstrates the basic philosophy and key elements of Body-Mind Centering. Drawing on animal and infant movements, she takes readers through the wondrous realms of Bainbridge Cohen's pantheon—from the 'minds' of the skeletal and muscular systems to the quite different inner lives of digestive, lymphatic, urinary, respiratory, vocal, circulatory, endocrine, and reproductive organs. Her choreography ultimately brings us into the states of consciousness of skins, cells, blood, fat, cerebrospinal fluid, nervous

system, and brain. Hartley's explorations of the images, feelings, sensations, and intuitions of the diverse organs and cells lead to exercises that gently guide students in ways of discovering and integrating their bodies' multidimensional aspects.
