The Fortney Encyclical Black History Albert Fortney Jr.,2016-01-15 The Encyclical Black History has been created for the critical and lack of vital Afro-Centric Multi-Curriculum text in urban school systems and is a necessity for African Americans. This book was created with careful and serious attention to biographical names that identifies history, culture as well as biblical characters. The reason why of this encyclical history can be explained with the facts and proof/evidence of the following. The point that has socio-psychological implications at the unconscious as well as the conscious level is the great little white racist lie, seen long enough, becomes the truth; like, portraying a white Jesus Christ who was a black man. Dr. Alvin Poussaint, a Black psychiatrist associated with Harvard University and others have observed and explained the most tragic part of all of this is that the African American has come to form his self image and self-concept on the basis of what white racists have laid down as a guide or prescribed. Therefore, black men and women learn quickly to hate themselves and

each other more than their white oppressor. There is almost infinite evidence that racism has left almost irreparable scars on the psyche of Afro-Americans that burden with an unrelenting, painful anxiety that drives the psyche to reach out for a sense of identity and self-esteem. Poussaint and others say that black children, especially learn to hate themselves at very early ages. Studies reveal their preference for white dolls over black ones. One study reported that black children in their drawings tend to show blacks as small, incomplete people and whites as strong and powerful. To conclude, in western color symbolism white is positive and black negative. Many people might ask why the contributions of Africa should be included in American curriculum? Is because they bleach and still rob black history and culture with black pictured as white that lie, leaves us mentally-dead, angry, and without purpose, of where we are going! Human culture is the product of all humanity, not the possession of a single racial or ethnic group. Afro-centric Multicultural educations major aim is to close the gap between Western ideals of equality, justice and practices that contradict these ideas. Stereotype people of color and people who are poor have just about no opportunities to become free of perspectives that are monoculture, that devalue African culture victimize them mostly having an inability to fully, function effectively in society. Many of these problems could be miraculously remedied with astonishing results if explained of black scientific achievements, which occurred in black Africa. There are also white African Americans living in the U.S.A. besides black African Americans, should make the distinction. Carl Sandburg (1979) related a dialogue between a white American and an American Indian which illustrates the need for multicultural education: The white man drew a small circle in the sand and told the red man, This is what the Indian knows, and drawing a big circle around the small one, this is what is what the white man knows. The Indian then took the stick and swept an immensely big ring around both circles and said, this is where the white man and the red man knows nothing.

Black History and Black Identity William D. Wright, 2002-02-28 This study contends that historians and intellectuals failed to understand the difference between race and ethnicity, which has in turn impaired their ability to understand who Black people are in America. The author argues that Black Americans are to be distinguished from other categories of black people in the country: black Africans, West Indians, or Hispanics. While Black people are members of the black race, as are other groups of people, they are a distinct ethnic group of that race. This conceptual failure has hampered the ability of

historians to define Black experience in America and to study it in the most accurate, authentic, and realistic manner possible. This confusing situation is aggravated further by the fact that many scholars tend to describe Black people in an arbitrary manner, as Africans, African Americans, Afro-Americans, black or Black, which is insufficient for precision. They sometimes downplay the historical evidence regarding African identity, and the identity of Blacks in America. Wright offers a new methodological basis for undertaking Black history: namely, the framework of historical sociology. He argues that this approach will produce a more useful history for Black people and others in America.

Pan-Africanism: Political Philosophy and Socio-Economic Anthropology for African Liberation and Governance Kini-Yen Kinni, 2015-09-04 This Book is the outcome of a long project begun thirty years ago. It is a book on the makings of pan-Africanism through the predicaments of being black in a world dominated by being white. The book is a tribute and celebration of the efforts of the African-American and African-Caribbean Diaspora who took the initiative and the audacity to

fight and liberate themselves from the shackles of slavery. It is also a celebration of those Africans who in their own way carried the torch of inspiration and resilience to save and reconstruct the Free Humanism of Africa. As a story of the rise from the shackles of slavery and poverty to the summit of Victors of their Renaissance Identity and Self-Determination as a People, the book is the story of African refusal to celebrate victimhood. The book also situates women as central actors in the Pan-African project, which is often presented as an exclusively masculine endeavour. It introduces a balanced gender approach and diagnosis of the Women actors of Pan-Africanism which was very much lacking. The problem of balkanisation of Africa on post-colonial affiliations and colonial linguistic lines has taken its toll on Africa's building of its common identity and personality. The result is that Africans are more remote to each other in their pigeon-hole-nation-states which put more restrictions for African inter-mobility, coupled by education and cultural affiliations, the communication and transportation and trading networks which are still tied more to their colonial masters than among themselves. This book looks into the problem of the new wave of Pan-Africanism and what strategies that can be proposed for a more participatory Pan-Africanism inspired by the everyday realities of African masses at home and in the diaspora. This book is the first book of its kind that gives a comprehensive and multidimensional coverage of Pan-Africanism. It is a very timely and vital compendium.

Ancient Black Civilizations Matter Procopius Canning, 2021-05-04 Get ready for one of the most interesting ancient history books that you have ever read! This exciting and important new book, a thoroughly researched, highly readable, yet meticulous, popular history pertaining to the role of Blacks and Black culture in the ancient Classical world, was penned by a history professional with over 35 years of experience in the field. In it you will learn not only a prodigious amount of thought-provoking facts, you will also gain the substantial historical knowledge and context, that too many still do not know, and astoundingly, some still deny, about Black lives and Black culture in ancient Classical Civilizations. We all know that we live in a crazy world. Insensibly, some of the supremacist groups who stormed the Capitol Building even wore symbols from ancient Roman history as symbols of white power. Certain types will even state that believing *Ancient Black Civilizations Matter* is romantic fiction. Of course, the truth is very much different than this, and happily for us, deeply fascinating to read about as well. In fact, professional scholars have been studying, and have known and agreed upon many of the details of the rich and vast substance of ancient Black history, for decades. You will be intrigued to read about Lusius Quietus, ancient Rome's first known Black military general, the vicious battles he fought, how he later notably became ancient Rome's first known Black senator, and almost (he was murdered), Roman emperor. Explore the interesting and exciting details, too often left out of other histories, about Africans who did become Roman emperors, including The Severan Dynasty, which originated in Africa and ruled the ancient Roman empire for decades. Learn how important African Kingdoms, such as Nubia and Numidia, helped shaped history's destiny for the ages to come, as well. I am very grateful for the overwhelming support that the book has received, including the fact that over 350 US news media sites announced its release. Details on my Amazon
